Average realized gold price per ounce	\$ 1,262	\$ 1,317

(1) Cash costs, after by-product credits, per silver and gold ounce represent non-U.S. generally accepted accounting principles (GAAP) measurements. The primary metal produced at Casa Berardi is gold, with a by-product credit for the value of silver production. A reconciliation of total cash costs to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion, and Amortization (GAAP) section in the company's Form 10-K, included in this report.

(1) Adjusted EBITDA represents a non-GAAP measurement, a reconciliation of which to net income, the most comparable GAAP measure, can be found in the Reconciliation of Earnings Before Interest, Taxes, Depreciation, and Amortization (non-GAAP) to Net Income (Loss) (GAAP) section in the company's Form 10-K, included in this report.

(2) Includes: Capex, exploration & pre-development, dividends, capital leases, reclamation activities, investments, foreign exchange gains/losses, etc. Numbers might not add up due to rounding.

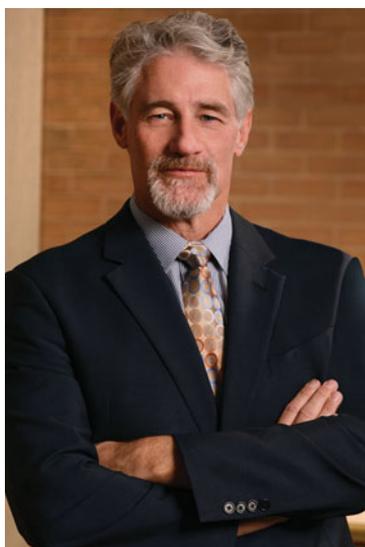

Mechanized rock bolter at Lucky Friday mine.

# strength through flexibility

shareholder letter

As you well know, the mining sector has been hit hard by price volatility. Silver alone lost 20 percent of its value in 2014. Gold, while more stable, is still down from where it was a year ago. Listening to other companies talk about their business, you hear a lot about headwinds. At Hecla, we're not talking about that. We're stronger than ever.

**Phillips S. Baker, Jr.**  
*president and chief executive officer*

While the downturn in the precious metals market has certainly changed the way we do business, we have both the assets and the long-term view that will enable us to invest through these challenging times. We're taking advantage of the situation, developing these assets and moving forward at a time when our peers are cutting back.

Hecla is nearing its 125th year in business, and, quite frankly, the price cycle we're currently experiencing is not that low. Yes, silver is down almost 70 percent from its high in 2011, but it's also four times the price it was in 2001. And when you look at our philosophy – large land packages, big reserves and resources, and cost structures that allow us to develop efficient, long-lived mines that we can rely on in tough times – well, it's working. Hecla is stronger than it's ever been, a strength that comes from production growth, diversification of metals, our low-cost profile, our strong cash balance, and the ability to manage both our capital and our exploration investments, depending on the prevailing metals prices.

## **Production Growth**

2014 was a successful year for Hecla, with all three mines operating well and showing consistent growth. Lucky Friday continues to impress, with production more than double that of last year and a cash cost, after by-product credits, per silver ounce of \$9.44. Greens Creek continued its solid, low-cost, consistent cash-generating performance, producing 7.8 million ounces of silver at a cash cost, after by-product credits, per silver ounce of \$2.89. (A reconciliation of cash cost, after by-product credits, can be found in the company's Form 10-K on pages 34-36.) We continue to make improvements at Casa Berardi (acquired from Aurizon Mines Ltd. on June 1, 2013), which saw an overall increase in its production from 62,532 ounces of gold under our ownership in 2013 to 128,244 ounces last year. And total silver equivalent production of 34.5 million ounces (see price assumptions on page 7) is the largest in our history.

## **Diversified Revenue Stream**

One of Hecla's competitive advantages is that we produce four metals: silver, gold, lead, and zinc. Thirty-nine percent of our revenue at Greens Creek came from base metals in 2014; 45 percent at Lucky

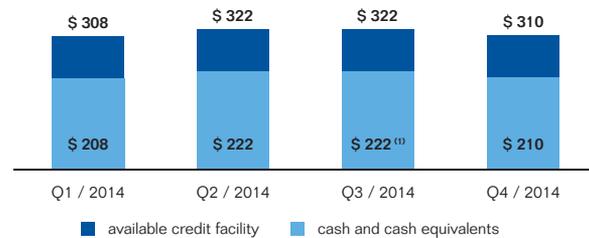

Friday. While silver and gold prices have dropped, the price of lead has fallen slightly and the zinc price has risen by more than 10 percent. What that does for Hecla – the number-three zinc and lead producer in the United States – is it gives us a natural revenue hedge. It also reduces our dependence on the price of silver and gold. And, of course, we also hedge a portion of our lead and zinc production, cushioning us against further price volatility.

Going forward, we expect to earn more revenue from silver than from gold. We believe that the silver price will outperform gold, bringing the gold-silver ratio back in line with more historical levels rather than the current 75:1 (source: Bloomberg). Additional silver revenue is expected to come from mining higher-grade material from deeper in the Lucky Friday and, potentially, from the high-grade vein discoveries at San Sebastian, Mexico. At Greens Creek I'm seeing the best drill results I've seen since I started at Hecla. In fact, over the next two to three years, we should add high-grade resources to the mine plan. It will possibly be not only a higher-grade resource, but also a larger one: three, four, maybe five years' worth of additional mine life. And the same thing is happening at Casa Berardi. It may end up being more like Greens Creek and Lucky Friday in that the great exploration potential should enable us to find more and better material to extend the mine life.

### Low-Cost Profile Leads to a Strong Cash Balance

We set the goal at the beginning of 2014 to operate within adjusted EBITDA to preserve our financial strength, and we have more than met that objective. In fact, when you look at our cash balance compared to last year's, you'll see that we generated sufficient cash flow to fund the second-largest annual capital program in our history and still end the year with basically the same cash balance that we started with. It all starts with production, of course, which drives financial metrics. Revenue increased 31 percent to \$500.8 million, adjusted EBITDA increased 29 percent to \$174.4 million, and operating cash flow increased \$56.5 million, even after the payments of \$55 million in the third quarter to satisfy our remaining obligation of the Coeur d'Alene Basin settlement – putting that forever behind us. Cash costs, after

### LIQUIDITY (US\$ millions)

(1) Includes \$14.1 million of warrant proceeds subsequently paid over to the plaintiffs in the Coeur d'Alene Basin Settlement.

by-product credits, per silver ounce declined almost 30 percent to \$4.81 – industry-leading numbers that led to operating cash flow for the year of \$83.1 million, a 212 percent increase. Cash costs, after by-product credits, per gold ounce declined by 13 percent to \$826.

### Who Is Hecla?

One of the things I've come to realize recently is that our nearly 125-year history can be a double-edged sword. Whether it's analysts who have followed HL for years or long-time shareholders, there's a tendency to think of Hecla the way it was 10 or 20 years ago. But quite honestly, while we have the same values and core competencies we're not the same company. Our mines have the benefit of our 100 percent ownership and years of exploration and capital investment that reduces operating risk, lowers costs, and extends their lives. We're challenging the conventional wisdom that precious metals companies don't generate free cash flow – a notion that stems from other companies making poor investments that force them to take big write-offs. Over the last five years, Hecla has invested in the largest capital, exploration, and pre-development projects in our history. We settled the Coeur d'Alene Basin litigation, and we continued to grow by acquiring the Casa Berardi gold mine, all while maintaining a cash balance of over \$200 million.

### Smart Mining

Lately, we've been focusing on technology and process

improvement. On the technology side we have Mark Board, one of the world's foremost geotechnical engineers. Mark was recently elected to the National Academy of Engineering, one of the highest professional distinctions accorded to an engineer. And for process improvement we have Christian Bourcier, most recently the general manager at Casa Berardi. Upon our acquisition of Casa Berardi in 2013, we found a number of practices – like maintenance, for one – that were best in class. Christian will be applying his knowledge and experience in process improvement company-wide.

### **The Promise of Silver**

For the past couple of years, I've talked about silver as an indispensable element. How industry demands it, technology requires it, and emerging economies depend on it. How its amazing utility has led to an 80 percent increase in demand in just 20 years (source: World Bank, GFMS), and a dramatic increase in consumption in emerging economies worldwide. And how its growing necessity should enable Hecla to deliver value to its shareholders. If anything, I'm even more sold on the long-term potential for silver today – both in terms of its applications and in terms of the number of people using those applications. In fact, I believe that going from the current billion-ounce market to a billion-and-a-half-ounce market in the next 20 to 30 years is not out of the question.

### **2015**

In addition to the competitive advantages that have made Hecla stronger than ever, we are also taking steps to de-risk the business. Our planned exploration expenditures for 2015 are reduced, in part because the long lives of our high-quality assets mean that exploration for reserves and resources can be reduced in times of weak metals prices. As part of our 2015 planning process, we run scenarios at significantly lower prices than current spot prices for all our metals. If prices were to deteriorate significantly, you would see us alter our plans accordingly. At current prices, we're very comfortable with this year's capital spending plans, because we know the value that our capital projects can bring to Hecla, both in terms of our growing production

and EBITDA from our existing assets, as well as increasing the consistency of the performance of those assets.

And when it comes to growth over the next few years, our main initiative is the #4 Shaft at the Lucky Friday, which is proceeding on track and on budget, and is designed to give us access to richer ore at depth. We are within two years of the planned completion of this long-term project, and the higher-grade material we expect to access should be the driver of Lucky Friday's production and Hecla's EBITDA growth. In addition, you'll hear us talking more about San Sebastian, which is looking like it could become a producing mine in the near term. San Sebastian is in a district that we believe will ultimately have more than 100 million silver equivalent ounces. The resource there is expanding rapidly, with the discovery of new veins in close proximity to each other that have impressive and increasing strike lengths. And the near-surface material is high-grade and could be very low-cost to access, potentially generating very good returns.

### **Thank You**

Finally, in my almost 30 years in precious metals mining I have not worked for a company that has the characteristics that Hecla now has: long-lived, low-cost mines in some of the best places to mine in the world – Alaska, Idaho, Quebec; a strong technical knowledge of our properties' geology and operations that is ever growing; and finally – and maybe most importantly – colleagues who care so deeply about their community, company, and fellow employees. So I thank the entire Hecla workforce, board of directors, and management team for such a strong performance in a tough environment. And, most of all, I have our shareholders to thank for your continued support.

**Phillips S. Baker, Jr.**

# strength through diversification

precious and base metals

## 2014 CONSOLIDATED REVENUE BY METAL <sup>(1)</sup>

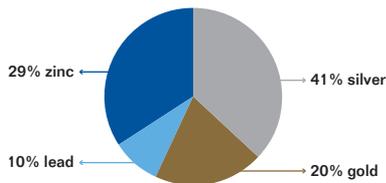

(1) Based on realized prices 2014: \$18.46 Silver; \$1,262 Gold; \$0.98 Lead; \$0.99 Zinc

While Hecla is known as a silver company that produces gold as well, we're also the third-largest producer of lead and zinc in the U.S. This is a great advantage in a volatile price environment: the price of gold and silver tend to move together, but lead and zinc often don't move with the precious metals, giving us a natural revenue hedge. We also hedge a portion of our lead and zinc production, cushioning us further against price volatility and de-risking the business.

A large yellow Load-Haul-Dump (LHD) loader is shown in an underground mine, dumping a large pile of dark, fragmented coal into the bed of a red haul truck. The scene is dimly lit with artificial lights, highlighting the heavy machinery and the texture of the coal. The haul truck's large, treaded tires and red metal body are prominent in the foreground.

**“We delivered steady, consistent, low-cost production that was well above target. And we’re better prepared than ever to continue operating successfully in this challenging price environment.”**

Scott Hartman, general manager, Greens Creek Mine

Underground haul truck and Load-Haul-Dump loader (LHD) at Greens Creek mine.

# strength through production

Greens Creek Mine, Alaska, USA

Hecla's Greens Creek mine in southeast Alaska is one of the largest and lowest-cost primary silver mines in the world. It produced 7.8 million ounces of silver in 2014 at a cash cost, after by-product credits, per silver ounce of \$2.89 (a non-GAAP measure). Production in 2015 is expected to be 7.3 million ounces.

Greens Creek holds current proven and probable reserves of 94 million ounces of silver, 739,000 ounces of gold reserves, as well as 240,850 tons of lead and 639,930 tons of zinc. There are an additional 9.1 million ounces of silver measured and indicated resources and 46.9 million ounces of silver inferred resources. Measured and indicated gold resources measure 102,000 ounces; inferred gold resources measure 315,000 ounces.

The mine has been operating for more than 25 years, generating \$4.4 billion in total revenue and significant free cash flow. In fact, Greens Creek accounted for almost half of Hecla's revenue in 2014, a

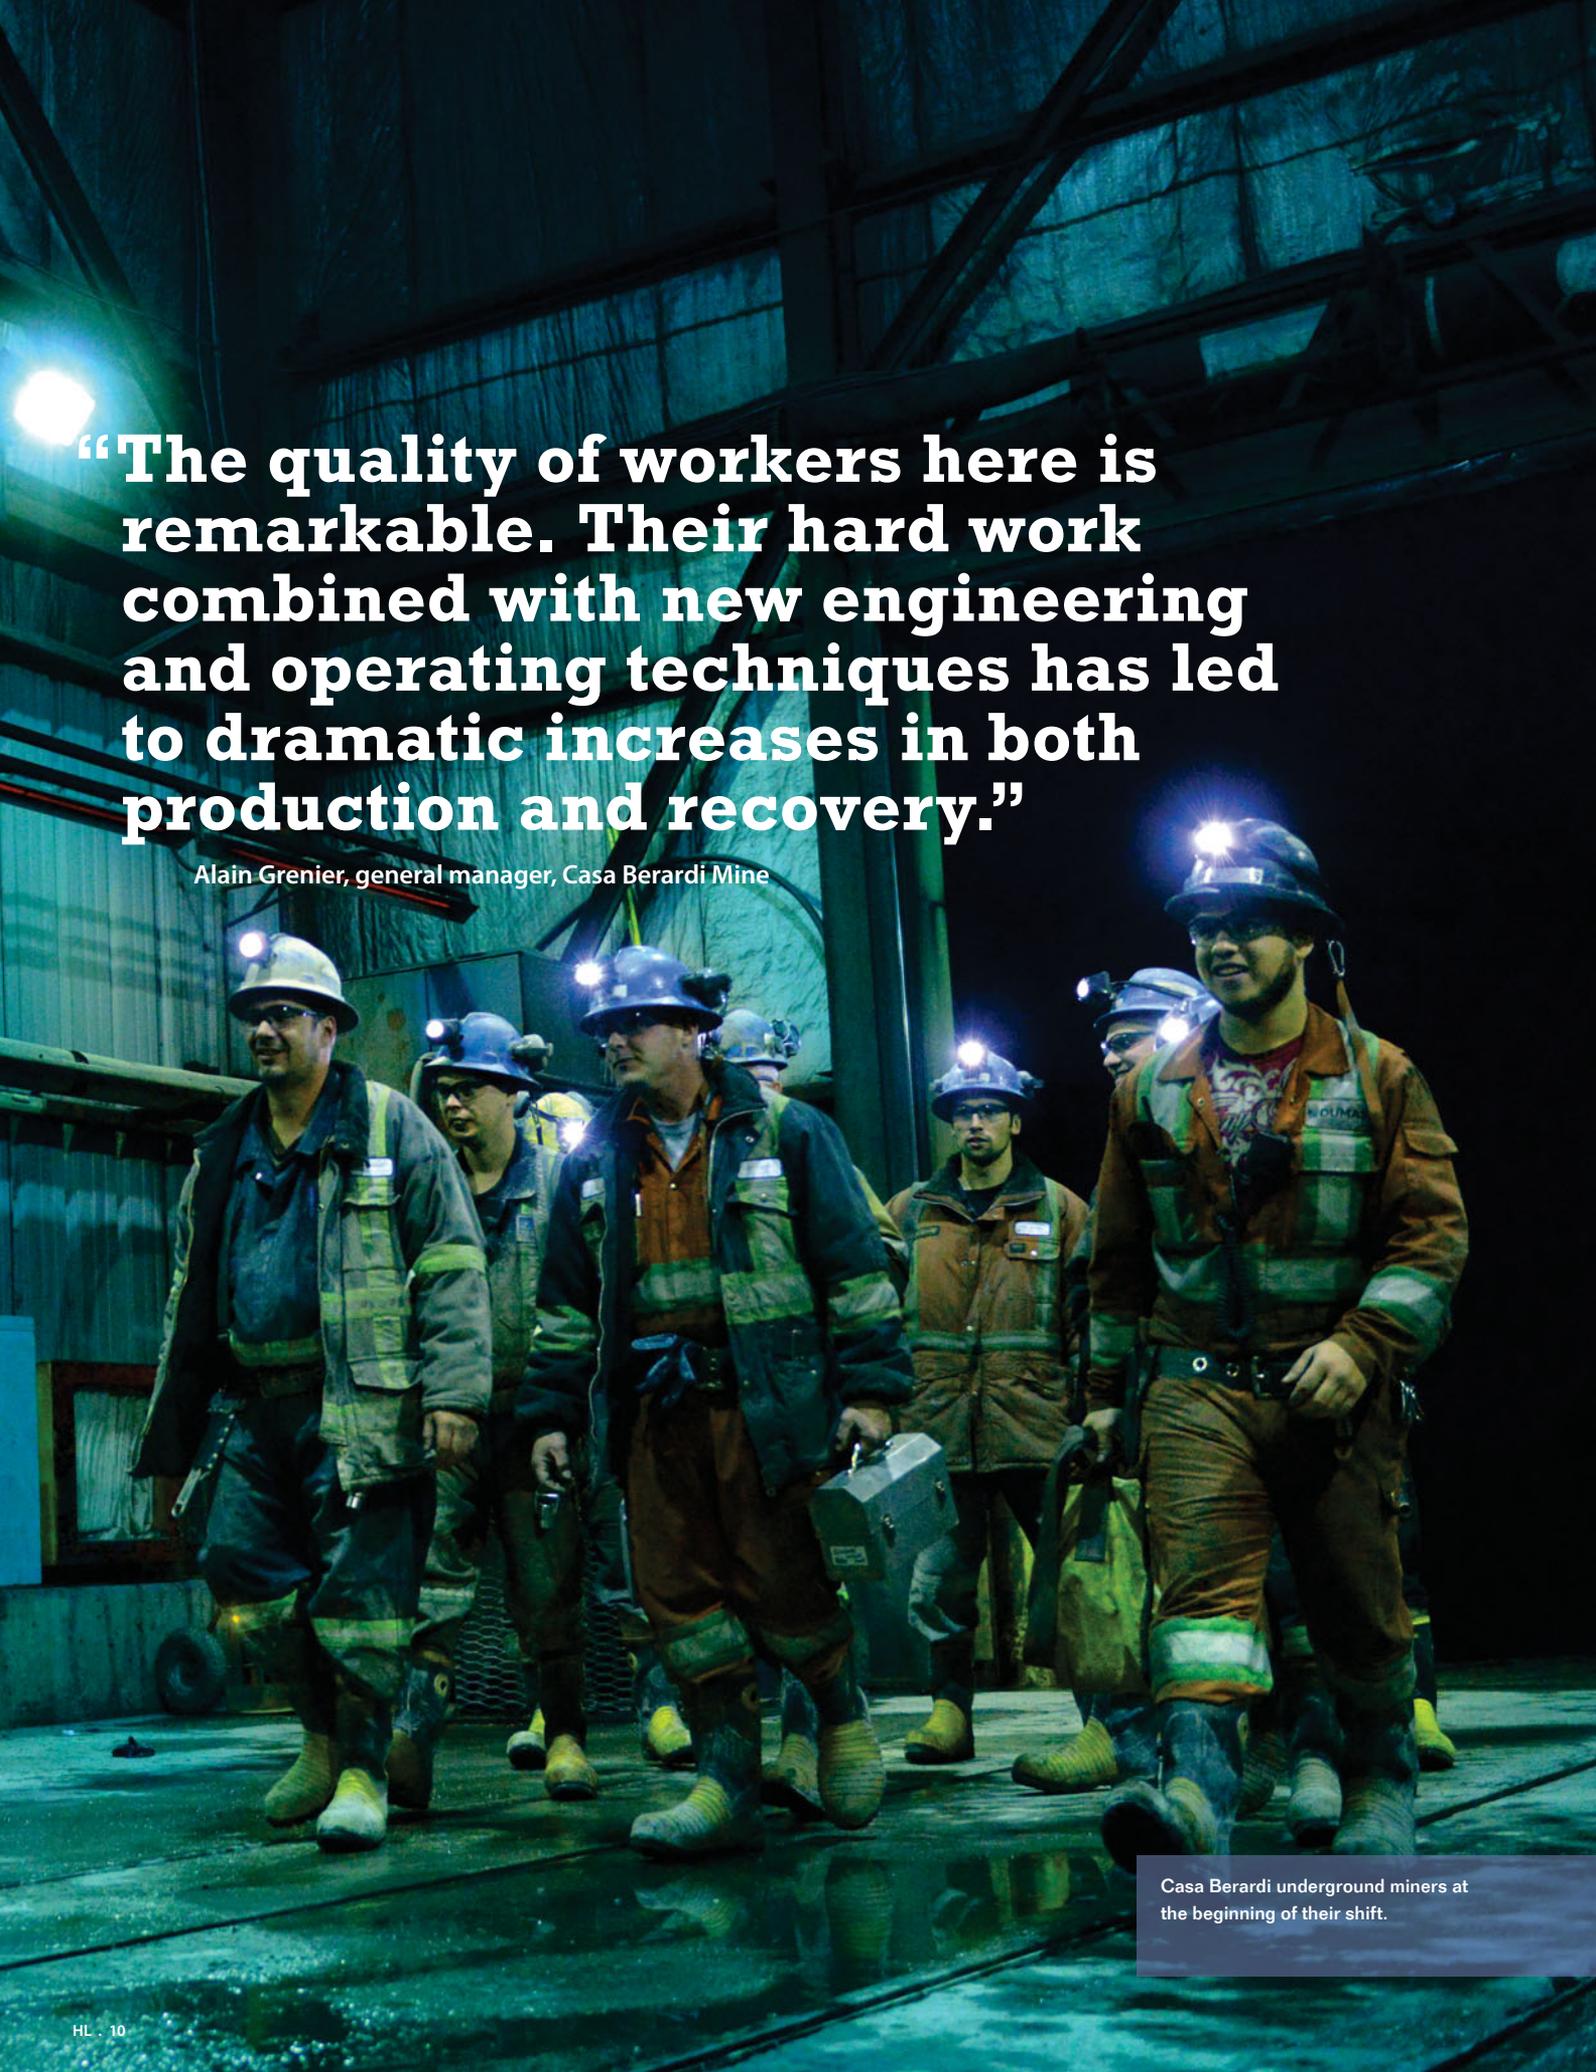

year of steady performance in production, recovery, and costs. The mine's reliability and consistency is due not only to the quality and diversity of the deposit, but also to the ongoing investment in infrastructure to decrease operating risks. And, of course, to Scott Hartman's team that continues to improve in planning and execution – yielding efficiencies in overall costs.

In addition to the tailings facility expansion – for which all major permits are in place – 2015 will see a sizeable definition drilling program at Greens Creek that should further boost resources and reserves and continue to extend the mine life. As both the size and the quality of the resource has grown, a significant development program is underway to prepare those areas for production in the future. We're optimistic this should generate significant increases in reserves over the next three years. Production-wise, planned changes in the mill in the coming year should yield recovery improvements as well.

## GREENS CREEK BY THE NUMBERS

acquired:	28.0% in 1987; 29.7% in 1994
	100% in 2008
2014 production:	silver – 7.8 M oz
	gold – 58,753 oz
production to date:	silver – 191.4 M oz
	gold – 1.4 M oz
	lead – 0.5 M tons
	zinc – 1.4 M tons
total revenue to date:	\$4.4 billion
mine life:	9 years

**“The quality of workers here is remarkable. Their hard work combined with new engineering and operating techniques has led to dramatic increases in both production and recovery.”**

Alain Grenier, general manager, Casa Berardi Mine

Casa Berardi underground miners at the beginning of their shift.

# strength through teamwork

Casa Berardi Mine, Quebec, Canada

With the acquisition of Aurizon Mines Ltd. in 2013, Hecla gained ownership of the Casa Berardi mine, an underground gold mine located in western Quebec – a politically stable and mining-friendly region with good geology and infrastructure in place. Last year, the mine produced 128,244 ounces of gold at a cash cost, after by-product credits, per gold ounce of \$826. Casa Berardi holds current proven and probable gold reserves of 1.3 million ounces, with an additional 1.3 million ounces of measured and indicated resources. A modest exploration drilling program in 2014 was successful in replacing mined ounces with additional resources.

Situated 95 kilometres north of La Sarre, the mine straddles a 37-kilometre section of the Casa Berardi fault. It has produced 1.9 million recovered gold ounces since commencing production in 1988, including 803,000 recovered ounces since production recommenced in November 2006. Current mine life is 10 years.

2014 saw a number of developments at Casa Berardi that have the potential to provide benefits for years to come. Deepening of the West Mine Shaft was completed in the fourth quarter. The shaft deepening, combined with the 985 drift, is expected to lower operating costs as the mining horizon deepens, as well as eventually providing a platform for deeper exploration. And though major improvements in the mill were scheduled for 2015, improvements in recovery – an increase from 86 percent to 90.1 percent – postponed the project as it may not be necessary.

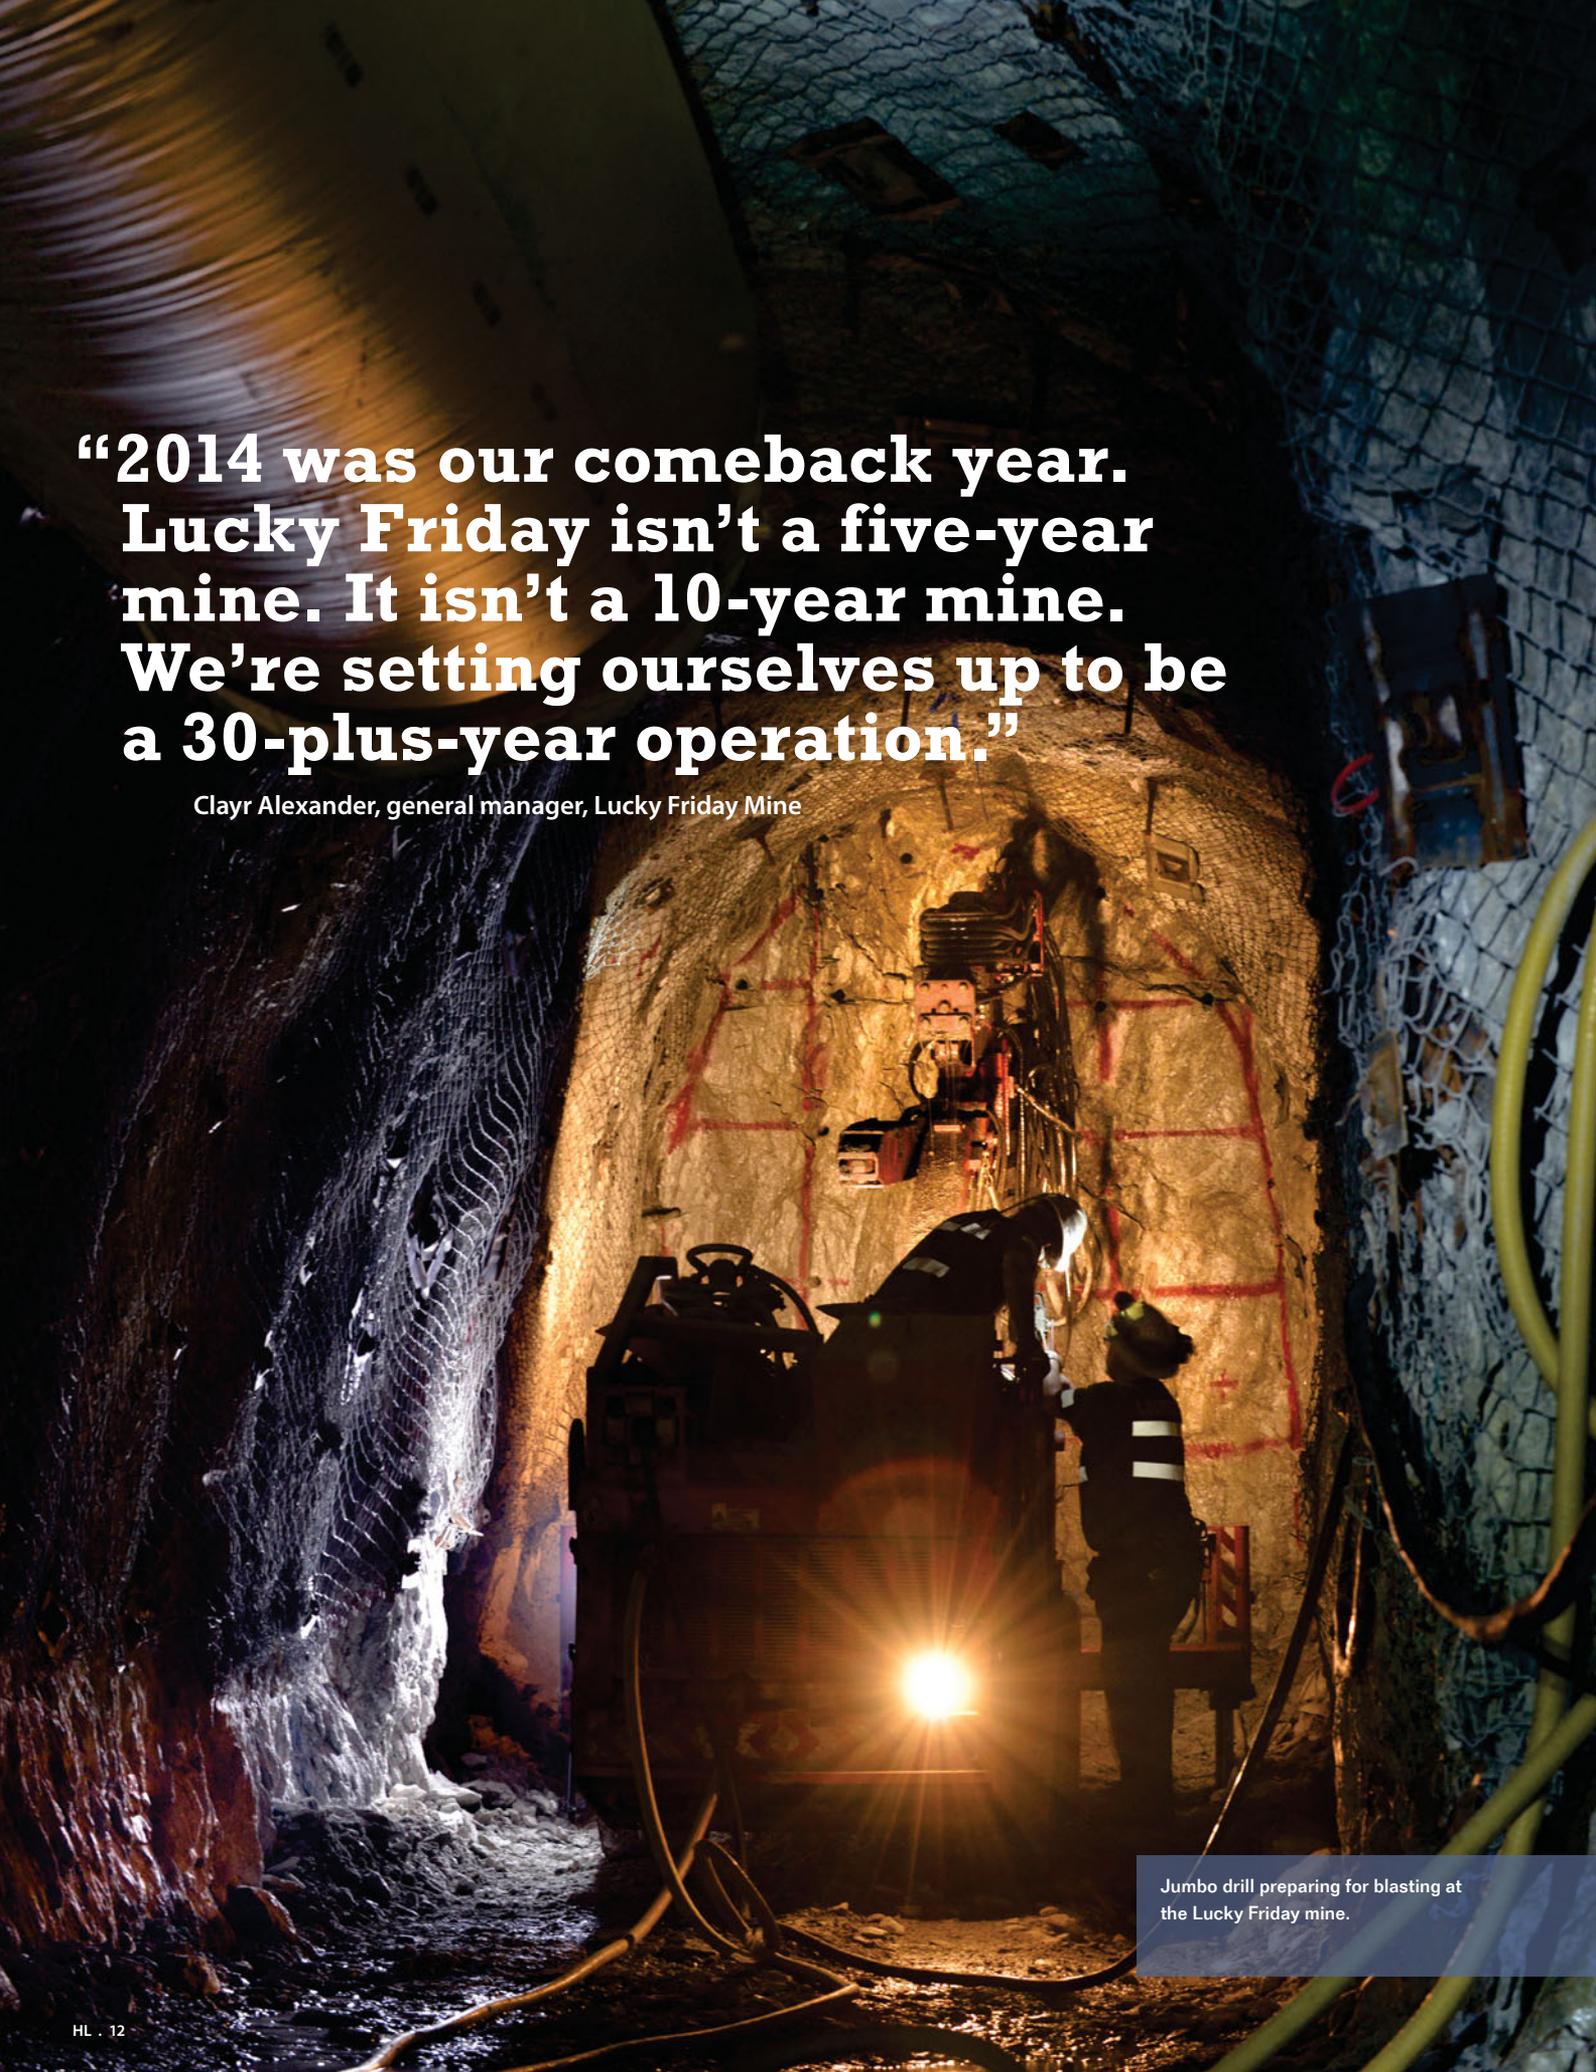

Because Casa Berardi is a Canadian operation, the mine has had a positive impact on Hecla's financial results even in the midst of a downturn in the precious metals market, since the drop in gold prices is helped by changes in the currency exchange rate between the two countries.

## CASA BERARDI BY THE NUMBERS

acquired:	100% in June 2013
2014 production:	gold – 128,244 oz
production to date*:	gold – 1.9 M oz
total revenue to date:	\$1.6 billion
mine life:	10 years

\* production from 1988-1997 and 2006 to present

A large jumbo drill is positioned in a mine tunnel. Two workers in hard hats and safety gear are visible near the machine. The tunnel walls are lined with a blue mesh netting. A bright light source is visible in the foreground, creating a lens flare effect. The overall scene is dimly lit, with the primary light coming from the drill's headlamp and the foreground light source.

**“2014 was our comeback year. Lucky Friday isn’t a five-year mine. It isn’t a 10-year mine. We’re setting ourselves up to be a 30-plus-year operation.”**

Clayr Alexander, general manager, Lucky Friday Mine

Jumbo drill preparing for blasting at the Lucky Friday mine.

# strength through perseverance

Lucky Friday Mine, Idaho, USA

Lucky Friday is a long-lived, deep underground silver, lead, and zinc mine located in the Coeur d'Alene Mining District in northern Idaho, one mile east of Mullan and adjacent to U.S. Interstate 90. The mine holds current proven and probable silver reserves of 78.9 million ounces, as well as 470,200 tons of lead and 143,140 tons of zinc in proven and probable reserves. There are an additional 125 million ounces of silver measured and indicated resources and 41.1 million ounces of silver inferred resources.

Despite the Lucky Friday being in operation since 1958, it's a new mine in many ways: a new team, new equipment, a new strategy, and new engineering. And the deeper we go, the grade seems to be getting better and better.

Upon completion of rehabilitation and enhancement of the 6,100-foot Silver Shaft in 2013 – the main access to the mine – Hecla work crews resumed sinking of the #4 Shaft project. It's the largest capital project in Hecla's long history, is expected to provide deeper access to higher-grade material, and should extend Lucky Friday's

operational life and increase silver production to approximately 5 million ounces in 2018. In 2014 we saw a lot of progress on the project, with our contractors currently at the 7580 level, where one of the shaft's loading pockets will be. The plan is to continue sinking until we reach the 8800 level, which is expected to be completed in the fourth quarter of 2016. We expect that will be followed by nine months of construction: equipping the shaft with guides and conveyances, and installing ore and waste bins, chutes, loading pockets, and power, piping, and pumping systems – all the construction activities that are needed to complete the shaft.

Additional plans for 2015 at Lucky Friday include advancing our environmental, safety, and health management systems, continuously improving our performance, and testing two electric-powered (via electric cable connection) vehicles at the mine, with an eye toward reducing both diesel particulate matter (DPM) emissions, as well as decreasing the heat generated by operating machinery deep underground.

## LUCKY FRIDAY BY THE NUMBERS

acquired:	100% in 1958
2014 production:	silver – 3.2 M oz
production to date:	silver – 155.4 M oz
	lead – 1.0 M tons
	zinc – 180,363 tons
total revenue from 1981 to date:	\$1.1 billion
mine life:	25+ years

**“To put it simply, our exploration program at San Sebastian has gone from one success to another. It’s a story that just keeps getting better.”**

Dean McDonald, senior vice president – exploration

Surface core drilling at the San Sebastian property, Mexico.

# strength through exploration

San Sebastian, Durango, Mexico

As a result of the success of our San Sebastian exploration program in 2014 – which included a significant increase in high-grade, near-surface resources – Hecla bucked the industry-wide trend by increasing the project's exploration budget to \$3 million mid-year and finished the year at over \$4 million in expenditures. That success could be instrumental in the project becoming a viable operation.

Our concession holdings at San Sebastian are located in the middle of the prolific Mexican Silver Belt. The silver equivalent indicated resource increased 46 percent to 37.7 million silver ounces, and the silver equivalent inferred resources increased 18 percent to 34.9 million ounces over 2013 levels (see Reserves and Resources table at the end of this report). From 2001 to 2005, Hecla produced 545,476 tons of ore containing 177,541 ounces of gold and 11.6 Moz of silver from the Francine Vein, making San Sebastian one of the highest-grade producers in Mexico at the time.

This year's discovery of the East Francine Vein, with indicated resources grading 81 oz/ton AgEq, when combined with the North and Middle Veins, provides San Sebastian with near-surface, high-grade resources. Near-surface mineralization appears amenable to cyanide leaching; additional testing is underway.

We believe we're still in the early stages of discovery, with over six kilometers (3.7 miles) of mineralized strike length identified already, and we're focusing on further exploration and engineering in an effort to quickly return San Sebastian to production. A Preliminary Economic Assessment (PEA) with AMC Consultants and M3 Engineering and Technology Corp is expected this year.

In terms of exploration beyond San Sebastian, Hecla has focused on brownfields exploration surrounding its three operating mines, and greenfields exploration in Quebec, Canada. 2014 marks our ninth consecutive year of increasing silver reserves – to 173 million ounces proven and probable – despite using a lower silver price assumption than 2013. The strength of our reserves is a good indication of the underlying quality of our assets, their ability to withstand lower prices, and our skilled exploration teams that continue to be successful in finding new resources.

We also looked beyond our mines, exploring on several of our Quebec properties – like Opinaca/Wildcat, Fayolle, and Heva-Hosco – as well as at Creede, Colorado; Republic, Washington; and in Idaho's Silver Valley.

## SAN SEBASTIAN BY THE NUMBERS

	gold – 129,000 oz

# strength through sustainability

## Corporate Responsibility

At Hecla, we're not just concerned with tons and grade. We're thinking about the community, the environment, and health and safety – and increasing that awareness among our more than 1,300 employees.

Our Integrated Corporate Responsibility Policy (ICR) begins, first and foremost, with the belief that a safe mine is a productive mine. Further, we strive to be responsible environmental stewards and to minimize environmental effects during exploration, development, and operations – and then reclaim our projects to productive post-mining land uses. Finally, we believe that by becoming responsive to community needs, we'll build trust and relationships that foster our social license to operate.

We're currently in the midst of systemizing both our environmental and health and safety programs, adopting the National Mining Association's CORESafety® Management System Program – which is being implemented at all of our operations – and developing and executing an integrated environmental management system that links with health and safety. Each will also link to a more comprehensive system we're developing for community engagement, which we expect to roll out in 2015.

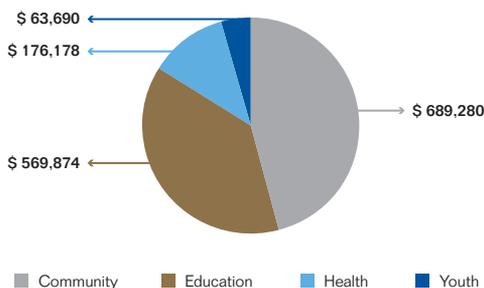

Hecla's strength was evident in 2014 when we completed our financial obligations under the Coeur d'Alene Basin litigation settlement, and ended the year with the same amount of cash with which we began. We obtained the release of financial assurance requirements for the successful conclusion of reclamation of the Grouse Creek tailings facility. Lucky Friday recently went from a year-long shutdown to full production with no lost-time incidents. And even in a less-than-favorable metals market, our Hecla Charitable Foundation continues to give, donating some \$1.5 million since forming in 2008. Our employees are invested in the communities in which they live and work, volunteering in schools, serving on various boards, and participating in local government. Only by becoming responsive to community needs in a real way can we build the trust and relationships necessary to foster our social license to operate.

Health and safety, environmental stewardship, community engagement: each is key to our core business strategy and continued profitability, each is fully integrated into our business planning. It's our corporate responsibility bottom line – the very foundation of Hecla Mining Company.

## SPECIAL NOTE ON FORWARD-LOOKING STATEMENTS

Certain statements contained in this report (including information incorporated by reference) are “forward-looking statements” and are intended to be covered by the safe harbor provided for under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Our forward-looking statements include our current expectations and projections about future production, results, performance, prospects and opportunities, including reserves and other mineralization. We have tried to identify these forward-looking statements by using words such as “may,” “might,” “will,” “expect,” “anticipate,” “believe,” “could,” “intend,” “plan,” “estimate” and similar expressions. These forward-looking statements are based on information currently available to us and are expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to a number of risks, uncertainties and other factors that could cause our actual production, results, performance, prospects or opportunities, including reserves and mineralization, to differ materially from those expressed in, or implied by, these forward-looking statements.

These risks, uncertainties and other factors include, but are not limited to, those set forth under *Item 1A. Risk Factors* and *Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations*. Given these risks and uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements. Projections and other forward-looking statements included in this report have been prepared based on assumptions, which we believe to be reasonable, but not in accordance with United States generally accepted accounting principles (“GAAP”) or any guidelines of the Securities and Exchange Commission (“SEC”). Actual results may vary, perhaps materially. You are strongly cautioned not to place undue reliance on such projections and other forward-looking statements. All subsequent written and oral forward-looking statements attributable to Hecla Mining Company or to persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Except as required by federal securities laws, we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## PART I

### ITEM 1. BUSINESS

For information regarding the organization of our business segments and our significant customers, see *Note 11 of Notes to Consolidated Financial Statements*.

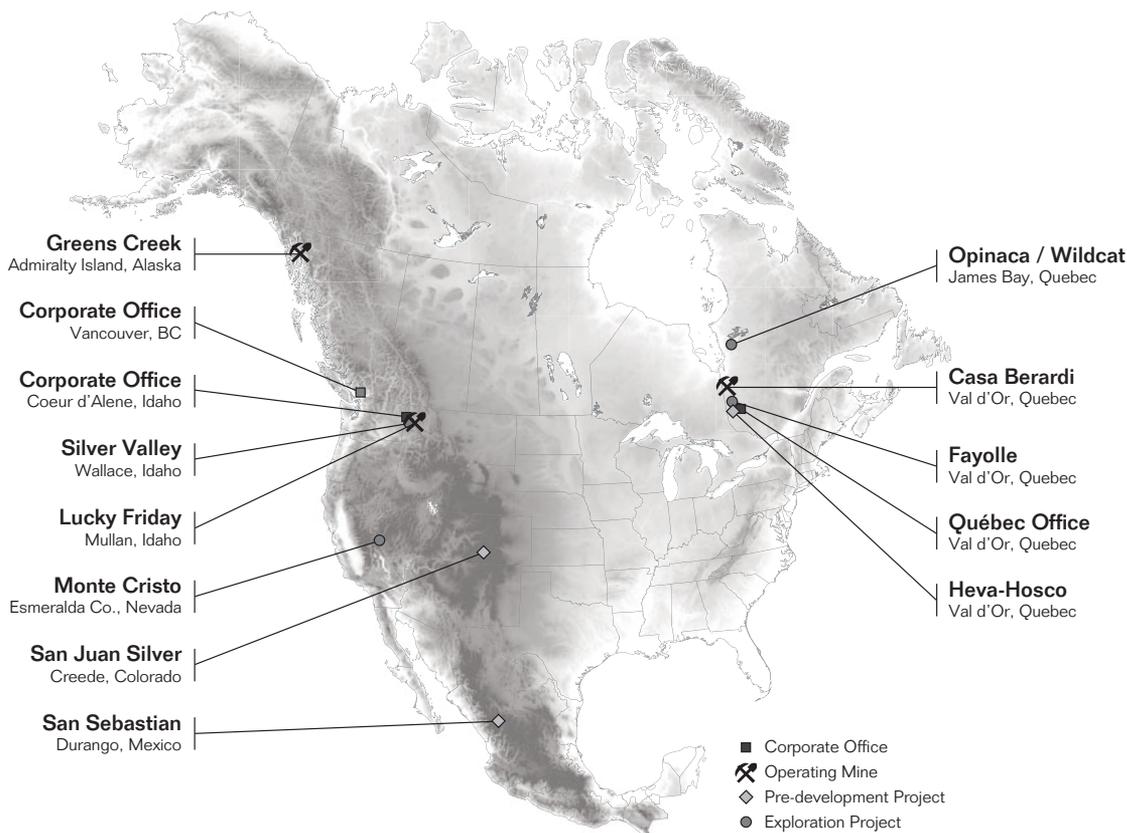

Information set forth in Items 1A, 1B and 2 are incorporated by reference into this Item 1.

#### Introduction

Hecla Mining Company and our subsidiaries have provided precious and base metals to the U.S. and worldwide since 1891 (in this report, “we” or “our” or “us” refers to Hecla Mining Company and our affiliates and subsidiaries). We discover, acquire, develop, and produce silver, gold, lead and zinc. In doing so, we intend to manage our business activities in a safe, environmentally responsible and cost-effective manner.

We produce lead, zinc and bulk concentrates, which we sell to custom smelters and brokers, and unrefined bullion bars (doré) containing gold and silver, which are further refined before sale to precious metals traders. We are organized and managed in three segments that encompass our operating units: the Greens Creek, Lucky Friday, and Casa Berardi units.

The map below shows the locations of our operating units and our exploration and pre-development projects, as well as our corporate offices located in Coeur d’Alene, Idaho and Vancouver, British Columbia.

Our current business strategy is to focus our financial and human resources in the following areas:

- Operating our properties safely, in an environmentally responsible manner, and cost-effectively.
- Continue optimizing and improving operations at our Greens Creek, Lucky Friday, and Casa Berardi units.
- Expanding our proven and probable reserves and production capacity at our operating properties.
- Conducting our business with fiscal stewardship to preserve our financial position in varying metals price environments.
- Continuing to advance our San Sebastian project in Mexico through additional drilling and a preliminary economic study with the goal of reaching a development decision in 2015.
- Maintaining and investing in exploration and pre-development projects in the vicinities of five mining districts we believe to be under-explored and under-invested: North Idaho's Silver Valley in the historic Coeur d'Alene Mining District; our Greens Creek unit on Alaska's Admiralty Island located near Juneau; the silver-producing district near Durango, Mexico; the Abitibi region of north-western Quebec, Canada; and the Creede district of Southwestern Colorado.
- Continuing to seek opportunities to acquire and invest in mining properties and companies. Examples include our acquisition of Aurizon Mines Ltd. ("Aurizon") and minority investments in certain exploration stage companies in 2012 and 2013.

Below is a summary of net income (loss) for each of the last five years (in thousands):

	Year Ended December 31,				
	2014	2013	2012	2011	2010
Net income (loss)	\$ 17,824	\$ (25,130)	\$ 14,954	\$ 151,164	\$ 48,983

Our financial results over the last five years have been impacted by:

- Fluctuations in prices of the metals we produce. The average, high and low daily closing market prices for silver, gold, lead and zinc for each of the last five years are as follows:

	2014	2013	2012	2011	2010
Silver (per oz.):					
Average	\$ 19.08	\$ 23.83	\$ 31.15	\$ 35.11	\$ 20.16
High	\$ 22.05	\$ 32.23	\$ 37.23	\$ 48.70	\$ 30.70
Low	\$ 15.28	\$ 18.61	\$ 26.67	\$ 26.16	\$ 15.14
Gold (per oz.):					
Average	\$ 1,266	\$ 1,411	\$ 1,669	\$ 1,569	\$ 1,225
High	\$ 1,385	\$ 1,694	\$ 1,792	\$ 1,895	\$ 1,421
Low	\$ 1,142	\$ 1,192	\$ 1,540	\$ 1,319	\$ 1,058
Lead (per lb.):					
Average	\$ 0.95	\$ 0.97	\$ 0.94	\$ 1.09	\$ 0.97
High	\$ 1.03	\$ 1.11	\$ 1.06	\$ 1.33	\$ 1.18
Low	\$ 0.82	\$ 0.88	\$ 0.79	\$ 0.81	\$ 0.71
Zinc (per lb.):					
Average	\$ 0.98	\$ 0.87	\$ 0.88	\$ 0.99	\$ 0.98
High	\$ 1.10	\$ 0.99	\$ 0.99	\$ 1.15	\$ 1.20
Low	\$ 0.88	\$ 0.81	\$ 0.80	\$ 0.79	\$ 0.72

See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations* for a summary of average market and realized prices for each of the three years ended December 31, 2014, 2013 and 2012. Our results of operations are significantly impacted by fluctuations in the prices of silver, gold, lead and zinc, which are affected by numerous factors beyond our control. See *Item 1A. Risk Factors – Financial Risks – A substantial or extended decline in metals prices would have a material adverse effect on us* for information on a number of the various factors that can impact prices of the metals we produce. Our average realized prices for silver, gold, and lead were lower in 2014 compared to 2013, while the average realized prices for zinc increased. Average realized prices for silver, gold, and zinc decreased in 2013 compared to 2012, while lead prices increased. We believe that market metal price trends are a significant factor in our operating and financial performance. We are unable to predict fluctuations in prices for metals and have limited control over the timing of our concentrate shipments which impacts our realized prices. However, we utilize financially-settled forward contracts for lead and zinc with the objective of managing the exposure to changes in prices of lead and zinc contained in our concentrate shipments between the time of sale and final settlement. In addition, in July 2013, we initiated a similar program for silver and gold with the objective of managing exposure to changes in prices for those metals contained in our concentrate shipments. See *Note 10 of Notes to Consolidated Financial Statements* for more information on our base and precious metal forward contract programs.

- Cost of sales and other direct production costs of \$304.4 million in 2014, \$235.3 million in 2013, \$134.1 million in 2012, \$165.6 million in 2011 and \$164.0 million in 2010. During 2012 and 2013, costs of sales and other direct production costs were impacted by the temporary suspension of production at the Lucky Friday mine during most of 2012 and by the acquisition of the Casa Berardi mine during 2013. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations* for more information.
- \$25.3 million in suspension-related costs at our Lucky Friday unit in 2012, including \$6.3 million in depreciation, depletion, and amortization. We recognized suspension-related income of \$1.4 million in 2013 due to the receipt of business interruption insurance proceeds related to the suspension period. Limited production recommenced at the Lucky Friday unit in the first quarter of 2013, and the mine resumed full production in September 2013. See *The Lucky Friday Segment* section for more information on the temporary suspension of production.
- Exploration and pre-development expenditures totaling \$19.7 million, \$37.7 million, \$49.7 million, \$31.4 million and \$21.6 million for the years ended December 31, 2014, 2013, 2012, 2011 and 2010, respectively.

- Provision for closed operations and environmental matters of \$10.1 million, \$5.4 million, \$4.7 million, \$9.7 million and \$201.1 million for the years ended December 31, 2014, 2013, 2012, 2011, and 2010, respectively. The \$201.1 provision in 2010 included \$193.2 million accrued for environmental obligations in Idaho's Coeur d'Alene Basin as a result of an agreement with the United States, the Coeur d'Alene Indian Tribe, and the State of Idaho on financial terms of settlement of the Coeur d'Alene Basin environmental litigation and related claims that was completed during 2014.
- Net gain on base metal forward contracts of \$9.1 million in 2014, a net gain of \$18.0 million in 2013, a net loss of \$10.5 million in 2012, a net gain of \$38.0 million in 2011, and a net loss of \$20.8 million in 2010. These gains and losses are related to financially-settled forward contracts on forecasted zinc and lead production as part of a risk management program initiated in 2010. See *Note 10 of Notes to Consolidated Financial Statements* for more information on our derivatives contracts.
- Our acquisition of Aurizon for \$714.5 million in June 2013, which was partially funded by the issuance of 6.875% Senior Notes due 2021 ("Senior Notes") in April 2013 for net proceeds of \$490.0 million. We recognized expenses relating to the Aurizon acquisition of \$26.4 million in 2013. In addition, in 2014 and 2013, respectively, we recorded interest expense related to the Senior Notes, including amortization of issuance costs, of \$24.6 million and \$19.1 million, net of \$11.8 million and \$6.5 million in capitalized interest. See *Note 15 of Notes to Consolidated Financial Statements* for more information on the acquisition.
- An increase in the number of shares of our common stock outstanding, which impacts our income (loss) per common share.

A comprehensive discussion of our financial results for the years ended December 31, 2014, 2013 and 2012, individual operating unit performance, general corporate expenses and other significant items can be found in *Item 7. – Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations*, as well as the *Consolidated Financial Statements and Notes* thereto.

## Products and Segments

Our segments are differentiated by geographic region. We produce zinc, lead and bulk concentrates at our Greens Creek unit and lead and zinc concentrates at our Lucky Friday unit, each of which we sell to custom smelters and brokers on contract. We also produce unrefined gold and silver bullion bars (doré) at Greens Creek and Casa Berardi, which are shipped directly to customers or further refined before sale of the metals to precious metals traders. The concentrates produced at our Greens Creek and Lucky Friday units contain payable silver, zinc and lead, and the concentrates produced at Greens Creek also contain payable gold. Payable metals are those included in our products that can be recovered and sold by smelters, brokers and refiners. Our segments as of December 31, 2014 included:

- The Greens Creek unit located on Admiralty Island, near Juneau, Alaska. Greens Creek is 100% owned and has been in production since 1989, with a temporary care and maintenance period from April 1993 through July 1996.
- The Lucky Friday unit located in northern Idaho. Lucky Friday is 100% owned and has been a producing mine for us since 1958. Production at the Lucky Friday unit reached historical levels in September 2013 following a period of temporary care and maintenance and no production in 2012 (see *Item 2. Property Description, Operating Properties, The Lucky Friday Unit*). Production was at full historical rates during 2014.
- The Casa Berardi unit located in the Abitibi region of north-western Quebec, Canada. Casa Berardi is 100% owned and was acquired on June 1, 2013 with the purchase of all issued and outstanding common shares of Aurizon Mines Ltd. ("Aurizon", see *Note 15 of Notes to Consolidated Financial Statements*). Aurizon had operated and produced from the Casa Berardi mine since late 2006 and began various mine enhancements in an effort to improve operational efficiency, including a shaft deepening project completed in 2014 and a new paste fill facility completed in 2013.

The contributions to our consolidated sales by our operating units in 2014 were 49.0% from Greens Creek, 33.1% from Casa Berardi, and 17.9% from Lucky Friday.

The table below summarizes our production for the years ended December 31, 2014, 2013 and 2012. Zinc and lead production quantities are presented in short tons ("tons").

	Year		
	2014	2013	2012
Silver (ounces)	11,090,506	8,919,728	6,394,235
Gold (ounces)	186,997	119,989	55,496
Lead (tons)	40,255	30,374	21,074
Zinc (tons)	67,969	61,406	64,249

## Licenses, Permits and Concessions

We are required to obtain various licenses and permits to operate our mines and conduct exploration and reclamation activities. The suspension in production at the Lucky Friday unit during 2012 was pursuant to an order from the Federal Mine Safety and Health Administration. See *Item 1A. Risk Factors – Legal, Market and Regulatory Risks – We are required to obtain governmental permits and other approvals in order to conduct mining operations*. The operations and exploration activities at our Casa Berardi unit are subject to claims renewal and minimum work commitment requirements under the Quebec Mining Act. In addition, we conduct our exploration activities in Mexico pursuant to concessions granted by the Mexican government, which are subject to certain political risks associated with foreign operations. See *Item 1A. Risk Factors – Operation, Development, Exploration and Acquisition Risks – Our foreign activities are subject to additional inherent risks*.

## Physical Assets

Our business is capital intensive and requires ongoing capital investment for the replacement, modernization or expansion of equipment and facilities and to develop new ore reserves. At December 31, 2014, the book value of our property, plant, equipment and mineral interests, net of accumulated depreciation, was approximately \$1.8 billion. For more information see *Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations*. We maintain insurance policies against property loss and business interruption. However, such insurance contains exclusions and limitations on coverage, and there can be no assurance that claims would be paid under such insurance policies in connection with a particular event. See *Item 1A. Risk Factors – Operation, Development, Exploration and Acquisition Risks – Our operations may be adversely affected by risks and hazards associated with the mining industry that may not be fully covered by insurance*.

## Employees

As of December 31, 2014, we employed 1,354 people, and we believe relations with our employees are generally good.

Many of the employees at our Lucky Friday unit are represented by a union. The current collective bargaining agreement with workers at our Lucky Friday unit expires on April 30, 2016. As a result of the requirement to remove built-up cementitious material from the Silver Shaft, underground access was limited and production temporarily suspended at the Lucky Friday, forcing Hecla Limited to lay off 121 employees in January 2012 (approximately 25 of those employees accepted temporary positions at other Hecla operations). With the resumption of production in early 2013, employment at the Lucky Friday returned to roughly its level prior to the suspension of production. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – The Lucky Friday Segment*.

## Available Information

Hecla Mining Company is a Delaware corporation. Our current holding company structure dates from the incorporation of Hecla Mining Company in 2006 and the renaming of our subsidiary (previously Hecla Mining Company) as Hecla Limited. Our principal executive offices are located at 6500 N. Mineral Drive, Suite 200, Coeur d'Alene, Idaho 83815-9408. Our telephone number is (208) 769-4100. Our web site address is [www.hecla-mining.com](http://www.hecla-mining.com). We file our annual, quarterly and current reports and any amendments to these reports with the SEC, copies of which are available on our website or from the SEC free of charge ([www.sec.gov](http://www.sec.gov) or 800-SEC-0330 or the SEC's Public Reference Room, 100 F Street, N.E., Washington, D.C. 20549). Charters of our audit, compensation, and corporate governance and directors' nominating committees, as well as our Code of Ethics for the Chief Executive Officer and Senior Financial Officers and our Code of Business Conduct and Ethics for Directors, Officers and Employees, are also available on our website. We will provide copies of these materials to stockholders upon request using the above-listed contact information, directed to the attention of Investor Relations, or via e-mail request sent to [hmc-info@hecla-mining.com](mailto:hmc-info@hecla-mining.com).

We have included the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) certifications regarding our public disclosure required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2 to this report. Additionally, we filed with the New York Stock Exchange ("NYSE") the CEO's certification regarding our compliance with the NYSE's Corporate Governance Listing Standards ("Listing Standards") pursuant to Section 303A.12(a) of the Listing Standards, which certification was dated June 11, 2014, and indicated that the CEO was not aware of any violations of the Listing Standards.

## ITEM 1A. RISK FACTORS

The following risks and uncertainties, together with the other information set forth in this report, should be carefully considered by those who invest in our securities. Any of the following risks could materially adversely affect our business, financial condition or operating results and could decrease the value of our common or preferred stock or other outstanding securities.

### FINANCIAL RISKS

*A substantial or extended decline in metals prices would have a material adverse effect on us.*

Our revenue is derived from the sale of concentrates and doré containing silver, gold, lead and zinc and, as a result, our earnings are directly related to the prices of these metals. Silver, gold, lead and zinc prices fluctuate widely and are affected by numerous factors, including:

- speculative activities;
- relative exchange rates of the U.S. dollar;
- global and regional demand and production;
- political instability;
- inflation, recession or increased or reduced economic activity; and
- other political, regulatory and economic conditions.

These factors are largely beyond our control and are difficult to predict. If the market prices for these metals fall below our production or development costs for a sustained period of time, we will experience losses and may have to discontinue exploration, development or operations, or incur asset write-downs at one or more of our properties. See *Item 1. Business – Introduction* for information on the average, high, and low daily closing prices for silver, gold, lead and zinc for the last five years. On February 16, 2015, the closing prices for silver, gold, lead and zinc were \$17.27 per ounce, \$1,229 per ounce, \$0.83 per pound and \$0.98 per pound, respectively.

*The acquisition of Aurizon increased our exposure to gold price volatility.*

The financial results of our Casa Berardi unit, obtained through the acquisition of Aurizon in June 2013, are highly sensitive to changes in the price of gold, and the acquisition of Aurizon increased the sensitivity of our results to such changes. Gold prices fluctuate and are affected by numerous factors, including expectations with respect to the rate of inflation, exchange rates, interest rates, global and regional political and economic crises and governmental policies with respect to gold holdings by central banks. The demand for and supply of gold affects gold prices but not necessarily in the same manner as demand and supply affect the prices of other commodities. The supply of gold consists of a combination of mine production and existing stocks of bullion and fabricated gold held by governments, public and private financial institutions, industrial organizations and private individuals. The demand for gold consists primarily of jewelry and investment demand. We do not use forward sale contracts, or other derivative products, to protect the price level of future gold sales at the Casa Berardi unit, and as a result, those sales are exposed to commodity price risk.

*An extended decline in metals prices, an increase in operating or capital costs, mine accidents or closures, increasing environmental obligations, or our inability to convert exploration potential to reserves may cause us to record write-downs, which could negatively impact our results of operations.*

When events or changes in circumstances indicate that the carrying value of our long-lived assets may not be recoverable, we review the recoverability of the carrying value by estimating the future undiscounted cash flows expected to result from the use and eventual disposition of the asset. Impairment must be recognized when the carrying value of the asset exceeds these cash flows, and recognizing impairment write-downs could negatively impact our results of operations. Metal price estimates are a key component used in the analysis of the carrying values of our assets, as the evaluation approach involves comparing carrying values to the average estimated undiscounted cash flows resulting from operating plans using various metals price scenarios. Our estimates of undiscounted cash flows for our long-lived assets also include an estimate of the market value of the

exploration potential beyond the current operating plans. Because the average estimated undiscounted cash flows exceeded the carrying values of our long-lived assets, we did not record impairments as of December 31, 2014. However, if the prices of silver, gold, zinc and lead decline for an extended period of time, if we fail to control production or capital costs, if regulatory issues increase costs or decrease production, or if we do not realize the mineable ore reserves or exploration potential at our mining properties, we may be required to recognize asset write-downs in the future. In addition, the perceived market value of the exploration potential of our properties is dependent upon prevailing metals prices as well as our ability to discover economic ore. A decline in metals prices for an extended period of time or our inability to convert exploration potential to reserves could significantly reduce our estimates of the value of the exploration potential at our properties and result in asset write-downs.

***We have had losses that could reoccur in the future.***

We have had volatility in our net income (loss) reported in the last five years, as shown in Item 6. Selected Financial Data, including a net loss for the year ended December 31, 2014. A comparison of operating results over the past three years can be found in *Results of Operations in Item 7 – Management’s Discussion and Analysis of Financial Condition and Results of Operations*.

Many of the factors affecting our operating results are beyond our control, including, but not limited to, the volatility of metals prices; smelter terms; rock and soil conditions; seismic events; availability of hydroelectric power; diesel fuel prices; interest rates; foreign exchange rates; global or regional political or economic policies; inflation; availability and cost of labor; economic developments and crises; governmental regulations; continuity of orebodies; ore grades; recoveries; price speculation by certain investors; and purchases and sales by central banks and other holders and producers of gold and silver in response to these factors. We cannot foresee whether our operations will continue to generate sufficient revenue in order for us to generate net cash from operating activities. There can be no assurance that we will not experience net losses in the future.

***Commodity risk management activities could prevent us from realizing possible revenues or expose us to losses.***

We periodically enter into risk management activities, such as financially-settled forward sales contracts, to manage the prices received on the metals we produce. Such activities are utilized in an attempt to partially insulate our operating results from changes in prices for those metals. However, such activities may prevent us from realizing possible revenues in the event that the market price of a metal exceeds the price stated in a forward sale contract. In addition, we may experience losses if a counterparty fails to purchase under a contract when the contract price exceeds the spot price of a commodity.

We utilize financially settled forward contract programs to manage the exposure to changes in silver, gold, lead and zinc prices contained in our concentrate shipments between the time of sale and final settlement, and to manage the exposure to changes in the prices of lead and zinc contained in our forecasted future concentrate shipments. See *Note 10 of Notes to Consolidated Financial Statements* for more information on these base metals forward contract programs.

***Our profitability could be affected by the prices of other commodities.***

Our profitability is sensitive to the costs of commodities such as fuel (in particular as used at Greens Creek to generate electricity when hydropower is unavailable), steel, and cement. While the recent prices for such commodities have been stable or in decline, prices have been historically volatile and material increases in commodity costs could have a significant effect on our results of operations.

***Our accounting and other estimates may be imprecise.***

Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts and related disclosure of assets, liabilities, revenue and expenses at the date of the consolidated financial statements and reporting periods. The more significant areas requiring the use of management assumptions and estimates relate to:

- mineral reserves, mineralized material, and other resources that are the basis for future income and cash flow estimates and units-of-production depreciation, depletion and amortization calculations;
- future metals prices;
- environmental, reclamation and closure obligations;
- asset impairments;
- valuation of business combinations;
- reserves for contingencies and litigation; and
- deferred tax asset valuation allowance.

Future estimates and actual results may differ materially from these estimates as a result of using different assumptions or conditions. For additional information, see *Critical Accounting Estimates in Item 7 – Management’s Discussion and Analysis of Financial Condition and Results of Operations, Note 1 of Notes to Consolidated Financial Statements* and the risk factors set forth below: “*Our development of new orebodies and other capital costs may be higher and provide less return than we estimated,*” “*Our ore reserve estimates may be imprecise,*” “*Our environmental obligations may exceed the provisions we have made,*” and “*We are currently involved in ongoing legal disputes that may materially adversely affect us.*”

***Our ability to recognize the benefits of deferred tax assets is dependent on future cash flows and taxable income.***

We recognize the expected future tax benefit from deferred tax assets when the tax benefit is considered to be more likely than not of being realized. Otherwise, a valuation allowance is applied against deferred tax assets, reducing the value of such assets. Assessing the recoverability of deferred tax assets requires management to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecasted income from operations and the application of existing tax laws in each jurisdiction. Metal price and production estimates are key components used in the determination of our ability to realize the expected future benefit of our deferred tax assets. To the extent that future taxable income differs significantly from estimates as a result of a decline in metals prices or other factors, our ability to realize the deferred tax assets could be impacted. Additionally, significant future issuances of common stock or common stock equivalents, or changes in the direct or indirect ownership of our common stock or common stock equivalents could limit our ability to utilize our net operating loss carryforwards pursuant to Section 382 of the Internal Revenue Code. Future changes in tax law or changes in ownership structure could limit our ability to utilize our recorded tax assets. We currently have no deferred tax valuation allowances, with the exception of certain amounts related to foreign net operating loss carryforwards, and our current and non-current deferred tax asset balances as of December 31, 2014 were \$12.0 million and \$98.9 million, respectively.

See Note 5 of Notes to Consolidated Financial Statements for further discussion of our deferred tax assets.

***Global financial events may have an impact on our business and financial condition in ways that we currently cannot predict.***

The 2008 credit crisis and related turmoil in the global financial system and ensuing recession had an impact on our business and financial position, and similar events in the future could also impact us. The continuation or re-emergence of the financial crisis or recession, or disruption of key sectors of the economy such as oil and gas, may limit our ability to raise capital through credit and equity markets. The prices of the metals that we produce are affected by a number of factors, and it is unknown how these factors may be impacted by a global financial event.

***Returns for investments in pension plans and pension plan funding requirements are uncertain.***

We maintain defined benefit pension plans for U.S. employees, which provide for defined benefit payments after retirement for most U.S. employees. Canadian employees participate in Canada's public retirement system, and are not eligible to participate in the defined benefit pension plans that we maintain for U.S. employees. The ability of the pension plans maintained for U.S. employees to provide the specified benefits depends on our funding of the plans and returns on investments made by the plans. Returns, if any, on investments are subject to fluctuations based on investment choices and market conditions. A sustained period of low returns or losses on investments could require us to fund the pension plans to a greater extent than anticipated. See Note 8 of Notes to Consolidated Financial Statements for more information on our pension plans.

## RISKS RELATING TO OUR DEBT

***Our level of debt could impair our financial health and prevent us from fulfilling our obligations under our current debt obligations.***

As of December 31, 2014, we had total indebtedness of approximately \$521.6 million. Our level of debt and our debt service obligations could:

- make it more difficult for us to satisfy our current debt obligations;
- reduce the amount of funds available to finance our operations, capital expenditures and other activities;
- increase our vulnerability to economic downturns and industry conditions;
- limit our flexibility in responding to changing business and economic conditions, including increased competition and demand for new products and services;
- place us at a disadvantage when compared to our competitors that have lower leverage;
- increase our cost of borrowing; and
- limit our ability to borrow additional funds.

Our subsidiaries may be able to incur substantial additional indebtedness in the future. Although the indenture governing our outstanding debt securities contains restrictions on the incurrence of additional indebtedness, these restrictions are subject to a number of significant qualifications and exceptions and, under certain circumstances, the amount of indebtedness that could be incurred in compliance with these restrictions could be substantial. We have \$100 million in available capacity to be drawn from our revolving credit facility.

If new debt is added to our and our subsidiaries' existing debt levels, the risks associated with such debt that we currently face would increase.

***The terms of our debt impose restrictions on our operations.***

The indenture governing our outstanding debt securities includes a number of significant restrictive covenants. These covenants could adversely affect us by limiting our ability to plan for or react to market conditions or to meet our capital needs. These covenants will, among other things:

- make it more difficult for us to satisfy our obligations with respect to our outstanding debt securities and our other debt;
- limit our ability to obtain additional financing to fund future working capital, capital expenditures, acquisitions or other general corporate requirements, or require us to make divestitures;
- require a substantial portion of our cash flows to be dedicated to debt service payments instead of other purposes, thereby reducing the amount of cash flows available for working capital, capital expenditures, acquisitions and other general corporate purposes;
- increase our vulnerability to general adverse economic and industry conditions;
- limit our flexibility in planning for and reacting to changes in the industry in which we compete;
- place us at a disadvantage compared to other, less leveraged competitors; and
- increase our cost of borrowing additional funds.

In addition, utilization of our revolving credit facility would require us to comply with various covenants. A breach of any of these covenants could result in an event of default under the agreement governing our revolving credit facility that, if not cured or waived, could give the holders of the defaulted debt the right to terminate commitments to lend and cause all amounts outstanding with respect to the debt to be due and payable immediately. Acceleration of any of our debt could result in cross-defaults under our other debt instruments, including the indenture governing our outstanding debt securities. Our assets and cash flow may be insufficient to repay borrowings fully under all of our outstanding debt instruments if any of our debt instruments are accelerated upon an event of default, which could force us into bankruptcy or liquidation. In such an event, we may be unable to repay our debt obligations. In addition, in some instances, this would create an event of default under the indenture governing our outstanding debt securities.

***We may be unable to generate sufficient cash to service all of our indebtedness and meet our other ongoing liquidity needs and may be forced to take other actions to satisfy our obligations under our indebtedness, which may be unsuccessful.***

Our ability to make scheduled payments or to refinance our debt obligations and to fund our planned capital expenditures and other ongoing liquidity needs depends on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. We cannot assure you that our business will generate sufficient cash flow from operations or that borrowings will be available to us to pay the principal, premium, if any, and interest on our indebtedness or to fund our other liquidity needs. We may need to refinance all or a portion of our debt on or before maturity. We may be unable to refinance any of our debt on commercially reasonable terms or at all.

In addition, we conduct substantially all of our operations through our subsidiaries, certain of which will not be guarantors of our indebtedness. Accordingly, repayment of our indebtedness is dependent on the generation of cash flow by our subsidiaries and their ability to make such cash available to us, by dividend, debt repayment or otherwise. Unless they are guarantors of our indebtedness, our subsidiaries do not have any obligation

to pay amounts due on our indebtedness or to make funds available for that purpose. Our subsidiaries may not be able to, or may not be permitted to, make distributions to enable us to make payments in respect of our indebtedness. Each subsidiary is a distinct legal entity and, under certain circumstances, legal and contractual restrictions may limit our ability to obtain cash from our subsidiaries. While the credit agreement governing our revolving credit facility and the indenture governing our outstanding debt securities limit the ability of our subsidiaries to incur consensual restrictions on their ability to pay dividends or make other intercompany payments to us, these limitations are subject to qualifications and exceptions. In the event that we do not receive distributions from our subsidiaries, we may be unable to make required principal and interest payments on our indebtedness.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay investments and capital expenditures or to sell assets, seek additional capital or restructure or refinance our indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments and the indenture governing our outstanding debt securities may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest and principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our credit rating, which could harm our ability to incur additional indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations.

***Our variable rate indebtedness subjects us to interest rate risk, which could cause our indebtedness service obligations to increase significantly.***

Borrowings under our revolving credit facility would be at variable rates of interest and expose us to interest rate risk. If interest rates increase, our debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same, and our net income and cash flows, including cash available for servicing our indebtedness, would correspondingly decrease. Assuming all revolving loans were fully drawn, each one percentage point change in interest rates would result in a \$1.0 million change in annual cash interest expense on our credit facility.

***Our Senior Notes and the guarantees thereof will be effectively subordinated to any of our and our guarantors' secured indebtedness to the extent of the value of the collateral securing that indebtedness.***

The Senior Notes and the guarantees thereof are not secured by any of our assets or the assets of our subsidiaries. The indenture governing the Senior Notes permits us to incur secured debt up to specified limits. As a result, the Senior Notes and the guarantees are effectively subordinated to our and our guarantors' future secured indebtedness with respect to the collateral that secures such indebtedness, including any borrowings under our revolving credit facility. Upon a default in payment on, or the acceleration of, any of our secured indebtedness, or in the event of bankruptcy, insolvency, liquidation, dissolution, reorganization or other insolvency proceeding involving us or such guarantor, the proceeds from the sale of collateral securing any secured indebtedness will be available to pay obligations on the Senior Notes only after such secured indebtedness has been paid in full. As a result, the holders of the Senior Notes may receive less, ratably, than the holders of secured debt in the event of a bankruptcy, insolvency, liquidation, dissolution, reorganization or other insolvency proceeding involving us or such guarantor.

Our current credit facility allows us to draw up to \$100 million on a revolving basis, all of which would be secured debt.

***Our Senior Notes are structurally subordinated to all liabilities of our non-guarantor subsidiaries.***

The Senior Notes are structurally subordinated to the indebtedness and other liabilities of our subsidiaries that do not guarantee the Senior Notes, which include all of our non-domestic subsidiaries and certain other subsidiaries. These non-guarantor subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to pay any amounts due pursuant to the notes, or to make any funds available therefor, whether by dividends, loans, distributions or other payments. Any right that we or the guarantors have to receive any assets of any of the non-guarantor subsidiaries upon the liquidation or reorganization of those subsidiaries, and the consequent rights of holders of Senior Notes to realize proceeds from the sale of any of those subsidiaries' assets, will be effectively subordinated to the claims of those subsidiaries' creditors, including trade creditors and holders of preferred equity interests of those subsidiaries. Accordingly, in the event of a bankruptcy, liquidation or reorganization of any of our non-guarantor subsidiaries, these non-guarantor subsidiaries will pay the holders of their debts, holders of preferred equity interests and their trade creditors before they will be able to distribute any of their assets to us or any guarantor. Unless they are guarantors of the Senior Notes or our other indebtedness, our subsidiaries do not have any obligation to pay amounts due on the Senior Notes or our other indebtedness or to make funds available for that purpose.

For the year ended December 31, 2014, our non-guarantor subsidiaries represented 33% of our sales of metals and 32% of our other operating expenses. As of December 31, 2014, our non-guarantor subsidiaries represented 36% of our total assets and 22% of our total liabilities, including trade payables, deferred tax liabilities and royalty obligations but excluding intercompany liabilities.

***Key terms of the Senior Notes will be suspended if the Senior Notes achieve investment grade ratings and no default or event of default has occurred and is continuing.***

Many of the covenants in the indenture governing the Senior Notes will be suspended if the Senior Notes are rated investment grade by Standard & Poor's and Moody's provided at such time no default or event of default has occurred and is continuing, including those covenants that restrict, among other things, our ability to pay dividends, incur debt and to enter into certain other transactions. There can be no assurance that the Senior Notes will ever be rated investment grade. However, suspension of these covenants would allow us to engage in certain transactions that would not be permitted while these covenants were in force, and the effects of any such transactions will be permitted to remain in place even if the Senior Notes are subsequently downgraded below investment grade.

***We may be unable to repurchase Senior Notes and any outstanding loans under our revolving credit facility could be accelerated in the event of a change of control as required by the indenture.***

Upon the occurrence of certain kinds of change of control events specified in the indenture governing the Senior Notes, holders of the Senior Notes will have the right to require us to repurchase all of the Senior Notes at a repurchase price equal to 101% of their principal amount, plus accrued and unpaid interest, if any, to the date of repurchase. Any change of control also would constitute a default under our revolving credit facility. Therefore, upon the occurrence of a change of control, the lenders under our revolving credit facility would have the right to accelerate any outstanding loans

and, if so accelerated, we would be required to repay all of our outstanding obligations under such facility. We may not be able to pay the Senior Note holders the required price for their notes at that time because we may not have available funds to pay the repurchase price. In addition, the terms of other existing or future debt may prevent us from paying the Senior Note holders. There can be no assurance that we would be able to repay such other debt or obtain consents from the holders of such other debt to repurchase the Senior Notes. Any requirement to offer to purchase any Senior Notes may result in us having to refinance our outstanding indebtedness, which we may not be able to do. In addition, even if we were able to refinance our outstanding indebtedness, such financing may be on terms unfavorable to us.

***Holders of the Senior Notes may not be able to determine when a change of control giving rise to their right to have the Senior Notes repurchased has occurred following a sale of "substantially all" of our assets.***

The definition of change of control in the indenture governing the Senior Notes includes a phrase relating to the sale of "all or substantially all" of our assets. There is no precise established definition of the phrase "substantially all" under applicable law. Accordingly, the ability of a holder of Senior Notes to require us to repurchase its notes as a result of a sale of less than all our assets to another person may be uncertain.

***Federal and state fraudulent transfer laws may permit a court to void the Senior Notes or any of the guarantees thereof, and if that occurs, holders of the Senior Notes may not receive any payments.***

Federal and state fraudulent transfer and conveyance statutes may apply to the issuance of the Senior Notes and the incurrence of any guarantees of the Senior Notes. Under federal bankruptcy law and comparable provisions of state fraudulent transfer or conveyance laws, which may vary from state to state, the Senior Notes or any guarantees thereof could be voided as a fraudulent transfer or conveyance if we or any existing or future subsidiary guarantors, as applicable, (a) issued the Senior Notes or incurred such guarantee with the intent of hindering, delaying or defrauding creditors or (b) received less than reasonably equivalent value or fair consideration in return for either issuing the Senior Notes or incurring the guarantee and, in the case of (b) only, one of the following is also true at the time thereof:

- we or the subsidiary guarantor, as applicable, were insolvent or rendered insolvent by reason of the issuance of the Senior Notes or the incurrence of the guarantee;
- the issuance of the Senior Notes or the incurrence of the guarantee left us or the subsidiary guarantor, as applicable, with an unreasonably small amount of capital or assets to carry on the business; or
- we or the subsidiary guarantor intended to, or believed that we or such subsidiary guarantor would, incur debts beyond our or such subsidiary guarantor's ability to pay as they mature.

As a general matter, value is given for a transfer or an obligation if, in exchange for the transfer or obligation, property is transferred or a valid antecedent debt is satisfied. A court would likely find that any subsidiary guarantor did not receive reasonably equivalent value or fair consideration for its guarantee to the extent such subsidiary guarantor did not obtain a reasonably equivalent benefit from the issuance of the Senior Notes.

We cannot be certain as to the standards a court would use to determine whether or not we or any subsidiary guarantor was insolvent at the relevant time or, regardless of the standard that a court uses, whether the Senior Notes or any guarantees would be subordinated to our or any subsidiary guarantor's other debt. In general, however, a court would deem an entity insolvent if:

- the sum of its debts, including contingent and unliquidated liabilities, was greater than the fair saleable value of all of its assets;
- the present fair saleable value of its assets was less than the amount that would be required to pay its probable liability on its existing debts, including contingent liabilities, as they become absolute and mature; or
- it could not pay its debts as they became due.

The subsidiary guarantees contain a "savings clause" intended to limit the subsidiary guarantor's liability to the maximum amount that it could incur without causing the incurrence of obligations under its subsidiary guarantee to be a fraudulent transfer. This provision may not be effective to protect any subsidiary guarantees from being avoided under fraudulent transfer law. Furthermore, in *Official Committee of Unsecured Creditors of TOUSA, Inc. v Citicorp North America, Inc.*, the U.S. Bankruptcy Court in the Southern District of Florida held that a savings clause similar to the savings clause used in the indenture was unenforceable. As a result, the subsidiary guarantees were found to be fraudulent conveyances. The United States Court of Appeals for the Eleventh Circuit recently affirmed the liability findings of the Bankruptcy Court without ruling directly on the enforceability of savings clauses generally. If the TOUSA decision were followed by other courts, the risk that the guarantees would be deemed fraudulent conveyances would be significantly increased.

To the extent that any subsidiary guarantee is avoided, then, as to that subsidiary, the guaranty would not be enforceable.

If a court were to find that the issuance of the Senior Notes or the incurrence of any guarantee was a fraudulent transfer or conveyance, the court could void the payment obligations under the Senior Notes or such guarantee, could subordinate the Senior Notes or such guarantee to presently existing and future indebtedness of ours or of the related subsidiary guarantor or could require the holders of the Senior Notes to repay any amounts received with respect to such guarantee. In the event of a finding that a fraudulent transfer or conveyance occurred, holders of the Senior Notes may not receive any repayment. Further, the avoidance of the Senior Notes could result in an event of default with respect to our and our subsidiaries' other debt that could result in acceleration of that debt.

Finally, as a court of equity, the bankruptcy court may subordinate the claims in respect of the Senior Notes to other claims against us under the principle of equitable subordination if the court determines that (1) the holders of the Senior Notes engaged in some type of inequitable conduct, (2) the inequitable conduct resulted in injury to our other creditors or conferred an unfair advantage upon the holders of Senior Notes and (3) equitable subordination is not inconsistent with the provisions of the Bankruptcy Code.

***Our credit ratings may not reflect all risks associated with an investment in our Senior Notes.***

Credit rating agencies rate our debt securities on factors that include our results of operations, actions that we take, their view of the general outlook for our industry and their view of the general outlook for the economy. Actions taken by the rating agencies can include maintaining, upgrading, or downgrading the current rating or placing us on a watch list for possible future downgrading. Downgrading the credit rating of our debt securities or placing us on a watch list for possible future downgrading would likely increase our cost of financing, limit our access to the capital markets and have an adverse effect on the market price of our securities, including our Senior Notes.

## OPERATION, DEVELOPMENT, EXPLORATION AND ACQUISITION RISKS

### *Mining accidents or other adverse events at an operation could decrease our anticipated production.*

Production may be reduced below our historical or estimated levels as a result of mining accidents; unfavorable ground or shaft conditions; work stoppages or slow-downs; lower than expected ore grades; unexpected regulatory actions; if the metallurgical characteristics of ore are less economic than anticipated; or because our equipment or facilities fail to operate properly or as expected. Both of the Lucky Friday and Casa Berardi mines have a history of ground instability and related incidents. All of our mines are subject to risks relating to ground instability, including, but not limited to, crown pillar collapse or stope failure. The occurrence of an event such as those described above could result in loss of life or temporary or permanent cessation of operations, any of which could have a material adverse effect on our financial condition and results of operations. Other closures or impacts on operations or production may occur at any of our mines at any time, whether related to accidents, changes in conditions, changes to regulatory policy, or as precautionary measures.

### *Our operations may be adversely affected by risks and hazards associated with the mining industry that may not be fully covered by insurance.*

Our business is capital intensive, requiring ongoing investment for the replacement, modernization or expansion of equipment and facilities. Our mining and milling operations are subject to risks of process upsets and equipment malfunctions. Equipment and supplies may from time to time be unavailable on a timely basis. Our business is subject to a number of other risks and hazards including:

- environmental hazards;
- unusual or unexpected geologic formations;
- rock bursts and ground falls;
- seismic activity;
- underground fires or floods;
- unanticipated hydrologic conditions, including flooding and periodic interruptions due to inclement or hazardous weather conditions;
- political and country risks;
- civil unrest or terrorism;
- industrial accidents;
- labor disputes or strikes; and
- our operating mines have tailing ponds which could fail or leak as a result of seismic activity, unusual weather or for other reasons.

Such risks could result in:

- personal injury or fatalities;
- damage to or destruction of mineral properties or producing facilities;
- environmental damage and financial penalties;
- delays in exploration, development or mining;
- monetary losses;
- legal liability; and
- temporary or permanent closure of facilities.

We maintain insurance to protect against losses that may result from some of these risks, such as property loss and business interruption, in amounts we believe to be reasonably consistent with our historical experience, industry practice and circumstances surrounding each identified risk. Such insurance, however, contains exclusions and limitations on coverage, particularly with respect to environmental liability and political risk. We have received some payment for business interruption insurance claims related to the temporary suspension of operations at the Lucky Friday mine and continue to seek further reimbursement (see the risk factor above titled "*Mining accidents or other adverse events at an operation could decrease our anticipated production*"). There can be no assurance that claims would be paid under such insurance policies in connection with a particular event. Insurance specific to environmental risks is generally either unavailable or, we believe, too expensive for us, and we therefore do not maintain environmental insurance. Occurrence of events for which we are not insured may have an adverse effect on our business.

### *Our development of new orebodies and other capital costs may be higher and provide less return than we estimated.*

Capitalized development projects may cost more and provide less return than we estimate. If we are unable to realize a return on these investments, we may incur a related asset write-down that could adversely affect our financial results or condition.

Our ability to sustain or increase our current level of metals production partly depends on our ability to develop new orebodies and/or expand existing mining operations. Before we can begin a development project, we must first determine whether it is economically feasible to do so. This determination is based on estimates of several factors, including:

- ore reserves;
- expected recovery rates of metals from the ore;
- future metals prices;
- facility and equipment costs;
- availability of adequate staffing;
- availability of affordable sources of power and adequacy of water supply;
- exploration and drilling success;
- capital and operating costs of a development project;
- environmental considerations and permitting;
- adequate access to the site, including competing land uses (such as agriculture);
- applicable tax rates;
- foreign currency fluctuation and inflation rates; and
- availability of financing.

Many of these estimates are based on geological and other interpretive data, which may be imprecise. As a result, actual operating and capital costs and returns from a development project may differ substantially from our estimates, and, as such, it may not be economically feasible to continue with a development project.

***Our ore reserve estimates may be imprecise.***

Our ore reserve figures and costs are primarily estimates and are not guarantees that we will recover the indicated quantities of these metals. You are strongly cautioned not to place undue reliance on estimates of reserves (or mineralized material or other resource estimates). Reserves are estimates made by our professional technical personnel, and no assurance can be given that the estimated amount of metal or the indicated level of recovery of these metals will be realized. Reserve estimation is an interpretive process based upon available data and various assumptions. Our reserve estimates may change based on actual production experience. Further, reserves are valued based on estimates of costs and metals prices, which may not be consistent among our properties or across the industry. The economic value of ore reserves may be adversely affected by:

- declines in the market price of the various metals we mine;
- increased production or capital costs;
- reduction in the grade or tonnage of the deposit;
- increase in the dilution of the ore;
- reduced metal recovery; and
- changes in regulatory requirements.

Short-term operating factors relating to our ore reserves, such as the need to sequentially develop orebodies and the processing of new or different ore grades, may adversely affect our cash flow. If the prices of metals that we produce decline substantially below the levels used to calculate reserves for an extended period, we could experience:

- delays in new project development;
- net losses;
- reduced cash flow;
- reductions in reserves;
- write-downs of asset values; and
- mine closure.

***Efforts to expand the finite lives of our mines may not be successful or could result in significant demands on our liquidity, which could hinder our growth and decrease the value of our stock.***

One of the risks we face is that mines are depleting assets. Thus, we must continually replace depleted ore reserves by locating and developing additional ore. Our ability to expand or replace ore reserves primarily depends on the success of our exploration programs. Mineral exploration, particularly for silver and gold, is highly speculative and expensive. It involves many risks and is often non-productive. Even if we believe we have found a valuable mineral deposit, it may be several years before production from that deposit is possible. During that time, it may become no longer feasible to produce those minerals for economic, regulatory, political or other reasons. As a result of high costs and other uncertainties, we may not be able to expand or replace our existing ore reserves as they are depleted, which would adversely affect our business and financial position in the future.

The #4 Shaft project, an internal shaft at the Lucky Friday mine, is expected, upon its completion, to provide deeper access in order to increase the mine's production and operational life. The #4 Shaft project, as currently designed, is expected to involve development down to the 8800 foot level and capital expenditures of approximately \$215 million, which includes approximately \$165 million that has been spent on the project as of December 31, 2014. We believe that our current capital resources will allow us to complete the project by its estimated completion target of 2016. However, there are a number of factors that could affect completion of the project as currently designed, including: (i) a significant decline in metals prices, (ii) a reduction in available cash or credit, whether arising from decreased cash flow or other uses of available cash, (iii) increased regulatory compliance, or (iv) a significant increase in operating or capital costs. One or more of these factors could potentially require us to suspend the project, defer or eliminate some of the planned development, or access additional capital through debt financing, the sale of securities, or other external sources. This additional financing could be costly or unavailable.

***Our joint development and operating arrangements may not be successful.***

We have entered into joint venture arrangements in order to share the risks and costs of developing and operating properties. In a typical joint venture arrangement, the partners own proportionate shares of the assets, are entitled to indemnification from each other and are only responsible for any future liabilities in proportion to their interest in the joint venture. If a party fails to perform its obligations under a joint venture agreement, we could incur liabilities and losses in excess of our pro-rata share of the joint venture. We make investments in exploration and development projects that may have to be written off in the event we do not proceed to a commercially viable mining operation. See Note 15 of Notes to Consolidated Financial Statements.

***Our ability to market our metals production may be affected by disruptions or closures of custom smelters and/or refining facilities.***

We sell our metallic concentrates to custom smelters and brokers. Our doré bars are sent to refiners for further processing before being sold to metal traders. If we are unable to sell concentrates to our customers, our operations could be adversely affected. See Note 11 of Notes to Consolidated Financial Statements for more information on the distribution of our sales and our significant customers.

***We face inherent risks in acquisitions of other mining companies or properties that may adversely impact our growth strategy.***

We are actively seeking to expand our mineral reserves by acquiring other mining companies or properties. For example, on June 1, 2013, we acquired all of the outstanding common stock of Aurizon Mines Ltd., giving us 100% ownership of the Casa Berardi mine and other mineral interests. Although we are pursuing opportunities that we feel are in the best interest of our stockholders, these pursuits are costly and often unproductive. Inherent risks in acquisitions we may undertake in the future could adversely affect our current business and financial condition and our growth.

There is a limited supply of desirable mineral properties available in the United States and foreign countries where we would consider conducting exploration and/or production activities, and any acquisition we may undertake is subject to inherent risks. In addition to the risk associated with limited mine lives, we may not realize the value of the companies or properties that are acquired due to a possible decline in metals prices, failure to obtain permits, labor problems, changes in regulatory environment, failure to achieve anticipated synergies, an inability to obtain financing, and other factors previously described. Acquisitions of other mining companies or properties may also expose us to new geographic, political, operating, and geological risks. In addition, we face strong competition for companies and properties from other mining companies, some of which have greater

financial resources than we do, and we may be unable to acquire attractive companies and mining properties on terms that we consider acceptable.

***Our business depends on finding skilled miners and maintaining good relations with our employees.***

We are dependent upon the ability and experience of our executive officers, managers, employees and other personnel, and there can be no assurance that we will be able to retain such employees. We compete with other companies both in and outside the mining industry in recruiting and retaining qualified employees knowledgeable about the mining business. From time to time, we have encountered, and may in the future encounter, difficulty recruiting skilled mining personnel at acceptable wage and benefit levels in a competitive labor market, and may be required to utilize contractors, which can be more costly. Temporary or extended lay-offs due to mine closures may exacerbate such issues and result in vacancies or the need to hire less skilled or efficient employees. The loss of these persons or our inability to attract and retain additional highly skilled employees could have an adverse effect on our business and future operations. The Lucky Friday mine is our only operation subject to a collective bargaining agreement, which expires on April 30, 2016.

In March 2012, Hecla Limited received notice of a complaint filed against it by the United Steel Workers, Local 5114, with the U.S. Mine Safety Health Review Commission for compensation for bargaining unit workers at the Lucky Friday mine who were idled as a result of the temporary suspension of production at the mine (see the Other Contingencies section of Note 7 of Notes to Consolidated Financial Statements for more information).

***Competition from other mining companies may harm our business.***

We compete with other mining companies to attract and retain key executives, skilled labor, and other employees. We also compete with other mining companies for the services of other skilled personnel and contractors and their specialized equipment, components and supplies, such as drill rigs, necessary for exploration and development. We also compete with other mining companies for rights to mine properties. We may be unable to continue to obtain the services of skilled personnel and contractors or specialized equipment or supplies, or to acquire additional rights to mine properties.

***We may be subject to a number of unanticipated risks related to inadequate infrastructure.***

Mining, processing, development and exploration activities depend on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important to our operations, and their availability and condition affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, other interference in the maintenance or provision of such infrastructure, or government intervention, could adversely affect our mining operations.

***Our foreign activities are subject to additional inherent risks.***

On June 1, 2013, we completed the acquisition of Aurizon, giving us 100% ownership of the producing Casa Berardi mine, along with interests in various other properties, in Quebec, Canada. See Note 15 of Notes to Consolidated Financial Statements for more information. In addition, we currently conduct exploration and pre-development activities in Mexico and continue to own assets, including real estate and mineral interests there. We anticipate that we will continue to conduct operations in Canada, Mexico, and possibly other international locations in the future. Because we conduct operations internationally, we are subject to political and economic risks such as:

- the effects of local political, labor and economic developments and unrest;
- significant or abrupt changes in the applicable regulatory or legal climate;
- exchange controls and export restrictions;
- expropriation or nationalization of assets with inadequate compensation;
- currency fluctuations, particularly in the exchange rate between the Canadian dollar and U.S. dollar;
- repatriation restrictions;
- invalidation and unavailability of governmental orders, permits or agreements;
- property ownership disputes;
- renegotiation or nullification of existing concessions, licenses, permits and contracts;
- criminal activity, corruption, demands for improper payments, expropriation, and uncertain legal enforcement and physical security;
- disadvantages of competing against companies from countries that are not subject to U.S. laws and regulations;
- fuel or other commodity shortages;
- illegal mining;
- laws or policies of foreign countries and the United States affecting trade, investment and taxation;
- civil disturbances, war and terrorist actions; and
- seizures of assets.

Consequently, our exploration, development and production activities outside of the United States may be substantially affected by factors beyond our control, any of which could materially adversely affect our financial condition or results of operations. Fluctuations in exchange rates may impact our earnings, the value of assets held abroad and our operating and capital costs in foreign jurisdictions.

***We may be unable to successfully integrate the operations of the properties we acquire, including the Aurizon properties.***

Integration of the operations of the properties we acquire with our existing business will be a complex, time-consuming and costly process. Failure to successfully integrate the acquired properties and operations in a timely manner may have a material adverse effect on our business, financial condition, results of operations and cash flows. The difficulties of combining the acquired operations include, among other things:

- operating a larger organization;
- operating in multiple legal jurisdictions;
- coordinating geographically and linguistically disparate organizations, systems and facilities;
- adapting to additional political, regulatory, legal and social requirements;
- integrating corporate, technological and administrative functions; and
- diverting management's attention from other business concerns.

The process of integrating our operations could cause an interruption of, or a slowdown in, the activities of our business. Members of our senior

management may be required to devote considerable amounts of time to this integration process, which will decrease the time they will have to manage our business. If our senior management is not able to effectively manage the integration process, or if any business activities are interrupted as a result of the integration process, our business could suffer.

***We may not realize all of the anticipated benefits from our acquisitions.***

We may not realize all of the anticipated benefits from any future acquisitions, such as increased earnings, cost savings and revenue enhancements, for various reasons, including difficulties integrating operations and personnel, higher than expected acquisition and operating costs or other difficulties, unknown liabilities, inaccurate reserve estimates and fluctuations in market prices.

***The properties we may acquire may not produce as expected, and we may be unable to determine reserve potential, identify liabilities associated with the acquired properties or obtain protection from sellers against such liabilities.***

The properties we acquire in any acquisitions may not produce as expected, may be in an unexpected condition and we may be subject to increased costs and liabilities, including environmental liabilities. Although we review properties prior to acquisition in a manner consistent with industry practices, such reviews are not capable of identifying all potential adverse conditions. Generally, it is not feasible to review in depth every individual property involved in each acquisition. Even a detailed review of records and properties may not necessarily reveal existing or potential problems or permit a buyer to become sufficiently familiar with the properties to fully assess their condition, any deficiencies, and development potential.

***The acquisition of Aurizon exposes us to additional political risks.***

Our properties obtained through the acquisition of Aurizon are located in areas of Quebec, Canada which may be of particular interest or sensitivity to one or more interest groups, including aboriginal groups (which are generally referred to as "First Nations"). We now have mineral projects in Quebec that may be in areas with a First Nations presence. It is our practice to work closely with and consult with First Nations in areas in which our projects are located or which could be impacted by our activities. However, there is no assurance that relationships with such groups will be positive. Accordingly, it is possible that our production, exploration or development activities on these properties could be interrupted or otherwise adversely affected in the future by political uncertainty, native land claims entitlements, expropriations of property, changes in applicable law, governmental policies and policies of relevant interest groups, including those of First Nations. Any changes in law or relations or shifts in political conditions may be beyond our control and may adversely affect our business and operations and if significant, may result in the impairment or loss of mineral concessions or other mineral rights, or may make it impossible to continue our mineral production, exploration or development activities in the applicable area, any of which could have an adverse effect on our financial conditions and results of operations.

## **LEGAL, REGULATORY AND MARKET RISKS**

***We are currently involved in ongoing legal disputes that may materially adversely affect us.***

There are several ongoing legal disputes in which we are involved, and additional actions may be filed against us. We may be subject to future claims, including those relating to environmental damage, safety conditions at our mines, and other matters. The outcomes of these pending and potential claims are uncertain. We may not resolve these claims favorably. Depending on the outcome, these actions could have adverse financial effects or cause reputational harm to us. If any of these disputes result in a substantial monetary judgment against us, are settled on terms in excess of our current accruals, or otherwise impact our operations, our financial results or condition could be materially adversely affected. For a description of some of the lawsuits and other claims in which we are involved, see Note 7 of Notes to Consolidated Financial Statements.

***We are required to obtain governmental permits and other approvals in order to conduct mining operations.***

In the ordinary course of business, mining companies are required to seek governmental permits and other approvals for continuation or expansion of existing operations or for the commencement of new operations. For example, we estimate that our Greens Creek tailings impoundment area has sufficient capacity to meet our needs through the end of 2016. In order to increase the tailings capacity at the mine, certain permits are required. Obtaining the necessary governmental permits is a complex, time-consuming and costly process. The duration and success of our efforts to obtain permits are contingent upon many variables not within our control. Obtaining environmental permits, including the approval of reclamation plans, may increase costs and cause delays or halt the continuation of mining operations depending on the nature of the activity to be permitted and the interpretation of applicable requirements implemented by the permitting authority. Interested parties may seek to prevent issuance of permits and intervene in the process or pursue extensive appeal rights. Past or ongoing violations of laws or regulations could provide a basis to revoke existing permits or to deny the issuance of additional permits. In addition, evolving reclamation or environmental concerns may threaten our ability to renew existing permits or obtain new permits in connection with future development, expansions and operations. There can be no assurance that all necessary approvals and permits will be obtained and, if obtained, that the costs involved will not exceed those that we previously estimated. It is possible that the costs and delays associated with the compliance with such standards and regulations could become such that we would not proceed with the development or operation. We are often required to post surety bonds or cash collateral to secure our reclamation obligations and we may be unable to obtain the required surety bonds or may not have the resources to provide cash collateral.

***We face substantial governmental regulation and environmental risk.***

Our business is subject to extensive U.S. and foreign, federal, state and local laws and regulations governing development, production, labor standards, health and safety, the environment and other matters. For example, our operating mines in the United States frequently receive citations under the Mine Safety and Health Act, as administered by MSHA. Further, we have been and are currently involved in lawsuits or disputes in which we have been accused of causing environmental damage, violating environmental laws, or violating environmental permits, and we may be subject to similar lawsuits or disputes in the future. See the risk factor below titled "Our environmental obligations may exceed the provisions we have made."

Exposure to these liabilities arises not only from our existing operations, but also from operations that have been closed, sold to third parties, or properties in which we had a leasehold, joint venture, or other interest. With a history dating back to 1891, our exposure to environmental claims may be greater because of the bankruptcy or dissolution of other mining companies which may have engaged in more significant activities at a mining site than we but which are no longer available for governmental agencies or other claimants to make claims against or obtain judgments from. Similarly,

the federal government or private parties could seek to hold Hecla Limited or Hecla Mining Company liable for the actions of certain subsidiaries under “alter ego” or similar theories which seek to disregard the separateness of corporate entities within our consolidated corporate group.

We are required to reclaim properties and specific requirements vary among jurisdictions. In some cases, we may be required to provide financial assurances as security for reclamation costs, which may exceed our estimates for such costs. Our historical operations and the historical operations of entities and properties we have acquired have occasionally been alleged to have generated environmental contamination. We could also be held liable for worker exposure to hazardous substances. There can be no assurance that we will at all times be in compliance with all environmental, health and safety regulations or that steps to achieve compliance would not materially adversely affect our business.

In addition to existing regulatory requirements, legislation and regulations may be adopted or permit limits reduced at any time that result in additional exposure to liability, operating expense, capital expenditures or restrictions and delays in the mining, production or development of our properties. Mining accidents and fatalities, whether or not at our mines or related to metals mining, may increase the likelihood of additional regulation or changes in law. In addition, enforcement or regulatory tools and methods available to governmental regulators such as the U.S. Environmental Protection Agency, which have not been or have seldomly been used against us, could be used against us. Federal or state environmental or mine safety regulatory agencies may order certain of our mines to be temporarily or permanently closed, which may have a material adverse effect on our cash flows, results of operations, or financial condition.

Legislative and regulatory measures to address climate change and green house gas emissions are in various phases of consideration. If adopted, such measures could increase our cost of environmental compliance and also delay or otherwise negatively affect efforts to obtain permits and other regulatory approvals with regard to existing and new facilities. Proposed measures could also result in increased cost of fuel and other consumables used at our operations, including the diesel generation of electricity at our Greens Creek operation, if we are unable to regularly access hydroelectric power. Climate change legislation may also affect our smelter customers who burn fossil fuels, resulting in increased costs to us, and may affect the market for the metals we produce with effects on prices that are not possible for us to predict.

From time to time, the U.S. Congress considers proposed amendments to the General Mining Law of 1872, as amended (the “General Mining Law”), which governs mining claims and related activities on federal lands. The extent of any future changes is not known and the potential impact on us as a result of U.S. Congressional action is difficult to predict. Changes to the General Mining Law, if adopted, could adversely affect our ability to economically develop mineral reserves on federal lands. Although we are not currently mining on federal land, we do explore, and future mining could occur, on federal land.

The Clean Water Act requires permits for operations that discharge into waters of the United States. Such permitting has been a frequent subject of litigation by environmental advocacy groups, which has resulted, and may in the future result, in declines in such permits or extensive delays in receiving them. This may result in delays in, or in some instances preclude, the commencement or continuation of development or production operations. Adverse outcomes in lawsuits challenging permits or failure to comply with applicable regulations could result in the suspension, denial, or revocation of required permits, which could have a material adverse impact on our cash flows, results of operations, or financial condition. See *Note 7 of Notes to Consolidated Financial Statements*.

***Our environmental obligations may exceed the provisions we have made.***

We are subject to significant environmental obligations. At December 31, 2014, we had accrued \$57.3 million as a provision for environmental obligations. For information on our potential environmental liabilities, see *Note 4 and Note 7 of Notes to Consolidated Financial Statements*.

***We face transportation risks relating to our products, as well as employees and materials at Greens Creek.***

Certain of the products we ship to our customers are subject to regulatory requirements regarding packaging, handling and shipping of products that may be considered dangerous to human health or the environment. Although we believe we are currently in compliance with all material regulations applicable to packaging, handling and shipping our products, the chemical properties of our products or existing regulations could change and cause us to fall out of compliance, or force us to incur substantial additional expenditures to maintain compliance with applicable regulations. Further, we do not ship our own products but instead rely on third party carriers to ship our products to our customers. To the extent that any of our carriers are unable or unwilling to ship our products in accordance with applicable regulations, including because of difficulty in obtaining, or increased cost of, insurance, we could be forced to find alternative shipping arrangements, assuming such alternatives would be available. Any such changes to our current shipping arrangements could have a material adverse impact on our operations and financial results.

In addition, Greens Creek operates on an island and is substantially dependent on various forms of marine transportation for the transportation of employees and materials to the mine and for the export of its products from the mine. Any disruption to these forms of marine transportation would adversely impact mine operations, and possible effects could include suspension of operations.

***The titles to some of our properties may be defective or challenged.***

Unpatented mining claims constitute a significant portion of our undeveloped property holdings, the validity of which could be uncertain and may be contested. Although we have conducted title reviews of our property holdings, title review does not necessarily preclude third parties from challenging our title. In accordance with mining industry practice, we do not generally obtain title opinions until we decide to develop a property. Therefore, while we have attempted to acquire satisfactory title to our undeveloped properties, some titles may be defective.

***The price of our stock has a history of volatility and could decline in the future.***

Shares of our common and outstanding preferred stock are listed on the New York Stock Exchange. The market price for our stock has been volatile, often based on:

- changes in metals prices, particularly silver and gold;
- our results of operations and financial condition as reflected in our public news releases or periodic filings with the SEC;
- fluctuating proven and probable reserves;
- factors unrelated to our financial performance or future prospects, such as global economic developments, market perceptions of the attractiveness of particular industries, or the reliability of metals markets;
- political and regulatory risk;
- the success of our exploration, pre-development, and capital programs;

- ability to meet production estimates;
- environmental, safety and legal risk;
- the extent and nature of analytical coverage concerning our business; and
- the trading volume and general market interest in our securities.

The market price of our stock at any given point in time may not accurately reflect our value, and may prevent stockholders from realizing a profit on their investment.

***Our Series B Preferred Stock has a liquidation preference of \$50 per share or \$7.9 million.***

If we were liquidated, holders of our preferred stock would be entitled to receive approximately \$7.9 million (plus any accrued and unpaid dividends) from any liquidation proceeds before holders of our common stock would be entitled to receive any proceeds, but after holders of all notes issued under the indenture governing our outstanding debt securities received any proceeds.

***We may not be able to pay common or preferred stock dividends in the future.***

Since January 2010, we have paid all regular quarterly dividends on our Series B Preferred Stock. The annual dividend payable on the Series B Preferred Stock is currently \$0.6 million. Prior to 2010, there were numerous occasions when we did not declare dividends on the Series B Preferred Stock, but instead deferred them. There can be no assurance that we will continue to pay preferred stock dividends in the future.

Our Board of Directors adopted a common stock dividend policy that has two components: (1) a dividend that links the amount of dividends on our common stock to our average quarterly realized silver price in the preceding quarter, and (2) a minimum annual dividend of \$0.01 per share of common stock, in each case payable quarterly, when declared. See Note 9 of Notes to Consolidated Financial Statements for more information on potential dividend amounts under the first component of the policy at various silver prices.

From the fourth quarter of 2011 through and including the fourth quarter of 2014, our Board of Directors has declared a common stock dividend under the policy described above (although in some cases only a minimum dividend was declared and none relating to the average realized price of silver due to the prices not meeting the policy threshold). The declaration and payment of common stock dividends, whether pursuant to the policy or in addition thereto, is at the sole discretion of our Board of Directors, and there can be no assurance that we will continue to declare and pay common stock dividends in the future. In addition, the indenture governing our outstanding senior notes limits our ability to pay dividends.

***Our existing stockholders are effectively subordinated to the holders of our senior notes.***

In the event of our liquidation or dissolution, stockholders' entitlement to share ratably in any distribution of our assets would be subordinated to the holders of our senior notes. Any rights that a stockholder may have in the event of bankruptcy, liquidation or a reorganization of us or any of our subsidiaries, and any consequent rights of stockholders to realize on the proceeds from the sale of any of our or our subsidiaries' assets, will be effectively subordinated to the claims of the holders of our senior notes.

***Additional issuances of equity securities by us would dilute the ownership of our existing stockholders and could reduce our earnings per share.***

We may issue securities in the future in connection with acquisitions, strategic transactions or for other purposes. To the extent we issue any additional equity securities (or securities convertible into equity), the ownership of our existing stockholders would be diluted and our earnings per share could be reduced.

***The issuance of additional shares of our preferred or common stock in the future could adversely affect holders of common stock.***

The market price of our common stock may be influenced by any preferred or common stock we may issue. Our board of directors is authorized to issue additional classes or series of preferred stock without any action on the part of our stockholders. This includes the power to set the terms of any such classes or series of preferred stock that may be issued, including voting rights, dividend rights and preferences over common stock with respect to dividends or upon the liquidation, dissolution or winding up of the business and other terms. If we issue preferred stock in the future that has preference over our common stock with respect to the payment of dividends or upon liquidation, dissolution or winding up, or if we issue preferred stock with voting rights that dilute the voting power of our common stock, the rights of holders of the common stock or the market price of the common stock could be adversely affected.

***If a large number of shares of our common stock are sold in the public market, the sales could reduce the trading price of our common stock and impede our ability to raise future capital.***

We cannot predict what effect, if any, future issuances by us of our common stock or other equity will have on the market price of our common stock. Any shares that we may issue may not have any resale restrictions, and therefore could be immediately sold by the holders. The market price of our common stock could decline if certain large holders of our common stock, or recipients of our common stock, sell all or a significant portion of their shares of common stock or are perceived by the market as intending to sell these shares other than in an orderly manner. In addition, these sales could also impair our ability to raise capital through the sale of additional common stock in the capital markets.

***The provisions in our certificate of incorporation, our by-laws and Delaware law could delay or deter tender offers or takeover attempts.***

Certain provisions in our certificate of incorporation, our by-laws and Delaware law could make it more difficult for a third party to acquire control of us, even if that transaction could be beneficial to stockholders. These impediments include:

- the classification of our board of directors into three classes serving staggered three-year terms, which makes it more difficult to quickly replace board members;
- the ability of our board of directors to issue shares of preferred stock with rights as it deems appropriate without stockholder approval;
- a provision that special meetings of our board of directors may be called only by our chief executive officer or a majority of our board of directors;
- a provision that special meetings of stockholders may only be called pursuant to a resolution approved by a majority of our board of directors;
- a prohibition against action by written consent of our stockholders;

- a provision that our board members may only be removed for cause and by an affirmative vote of at least 80% of the outstanding voting stock;
- a provision that our stockholders comply with advance-notice provisions to bring director nominations or other matters before meetings of our stockholders;
- a prohibition against certain business combinations with an acquirer of 15% or more of our common stock for three years after such acquisition unless the stock acquisition or the business combination is approved by our board prior to the acquisition of the 15% interest, or after such acquisition our board and the holders of two-thirds of the other common stock approve the business combination; and
- a prohibition against our entering into certain business combinations with interested stockholders without the affirmative vote of the holders of at least 80% of the voting power of the then outstanding shares of voting stock.

*If we cannot meet the New York Stock Exchange continued listing requirements, the NYSE may delist our common stock.*

Our common stock is currently listed on the NYSE. In the future, if we are not able to meet the continued listing requirements of the NYSE, which require, among other things, that the average closing price of our common stock be above \$1.00 over 30 consecutive trading days, our common stock may be delisted. Our closing stock price on February 16, 2015, was \$3.42.

If we are unable to satisfy the NYSE criteria for continued listing, our common stock would be subject to delisting. A delisting of our common stock could negatively impact us by, among other things, reducing the liquidity and market price of our common stock; reducing the number of investors willing to hold or acquire our common stock, which could negatively impact our ability to raise equity financing; decreasing the amount of news and analyst coverage of us; and limiting our ability to issue additional securities or obtain additional financing in the future. In addition, delisting from the NYSE might negatively impact our reputation and, as a consequence, our business.

## ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

## ITEM 2. PROPERTIES

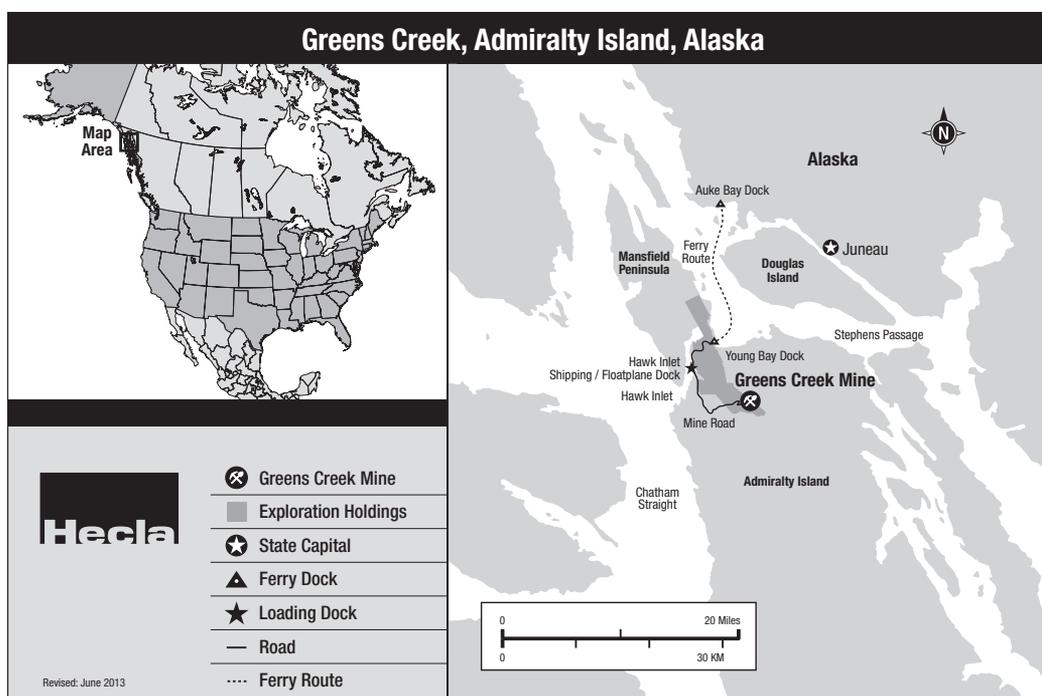

### Operating Properties

#### THE GREENS CREEK UNIT

Various of our subsidiaries collectively own 100% of the Greens Creek mine, located on Admiralty Island near Juneau in Southeast Alaska. Admiralty Island is accessed by boat, float plane, or helicopter. On the island, the mine site and various surface facilities are accessed by 13 miles of all-weather gravel roads. The Greens Creek mine has been in production since 1989, with a temporary care and maintenance period from April 1993 through July 1996. Since the start of production, Greens Creek has been owned and operated through various joint venture arrangements. For approximately 15 years prior to April 16, 2008, our wholly-owned subsidiary, Hecla Alaska LLC, owned an undivided 29.7% joint venture interest in the assets of Greens Creek. On April 16, 2008, we completed the acquisition of all of the equity of two Rio Tinto subsidiaries holding a 70.3% interest in the Greens Creek mine, and which previously operated the mine, for approximately \$758.5 million. The acquisition gave various of our subsidiaries control collectively of 100% of the Greens Creek mine.

The Greens Creek orebody contains silver, zinc, gold and lead, and lies within the Admiralty Island National Monument, an environmentally sensitive area. The Greens Creek property includes 639 unpatented lode mining claims, 58 patented lode claims and one patented mill site. In addition, the Greens Creek site includes properties under lease from the U.S. Forest Service ("USFS") for a road right-of-way, mine portal and mill site access, camp site, mine waste area and tailings impoundment. The USFS leases have varying expiration terms. Greens Creek also has title to mineral rights on 7,301 acres of federal land acquired through a land exchange with the USFS. We are currently exploring, but not mining, on such federal land.

The project consists of the mine, an ore concentrating mill, a tailings impoundment area, a ship-loading facility, camp facilities, a ferry dock, and other related infrastructure. The map below illustrates the location and access to Greens Creek:

The Greens Creek deposit is a polymetallic, stratiform, massive sulfide deposit. The host rock consists of predominantly marine sedimentary, and mafic to ultramafic volcanic and plutonic rocks, which have been subjected to multiple periods of deformation. These deformational episodes have imposed intense tectonic fabrics on the rocks. Mineralization occurs most often along the contact between a structural hanging wall of quartz mica carbonate phyllites and a structural footwall of graphitic and calcareous argillite. Major sulfide minerals are pyrite, sphalerite, galena, and tetrahedrite/tennantite.

Pursuant to a 1996 land exchange agreement, the joint venture transferred private property equal to a value of \$1.0 million to the U.S. Forest Service and received exploration and mining rights to approximately 7,500 acres of land with mining potential surrounding the existing mine. Any production from new ore discoveries on the exchanged lands will be subject to a federal royalty included in the land exchange agreement. The royalty is only due on any production from reserves that are not part of Greens Creek's extralateral rights. Thus far, there has been no production triggering payment of the royalty. The royalty is 3% if the average value of the ore during a year is greater than the benchmark, and 0.75% if the value is equal to or less than the benchmark. The benchmark of \$120 per ton is adjusted annually according to the Gross Domestic Product (GDP) Implicit Price Deflator until the year 2016, and at December 31, 2014, was at approximately \$157 per ton when applying the latest GDP Implicit Price Deflator.

Greens Creek is an underground mine accessed by a ramp from surface which produces approximately 2,100 to 2,300 tons of ore per day. The primary mining methods are cut and fill and longhole stoping. The Greens Creek ore processing facility includes a SAG/ball mill grinding circuit to grind the run of mine ore to liberate the minerals and produce a slurry suitable for differential flotation of mineral concentrates. A gravity circuit recovers free gold that exists as electrum, a gold/silver alloy in the ore. Doré and gravity concentrates are produced from this circuit prior to flotation. Three flotation concentrates are produced: a lead concentrate which contains most of the silver recovered; a zinc concentrate which is low in precious metals content; and a zinc-rich bulk concentrate that contains gold, silver, zinc, and lead and must be marketed to an imperial smelter. In 2014, ore was processed at an average rate of approximately 2,236 tons per day and total mill recovery was approximately 72% silver, 87% zinc, 77% lead and 63% gold. The doré is further refined by precious metal refiners and sold to banks, and the three concentrate products are sold to a number of major smelters and brokers worldwide. See Note 11 of Notes to Consolidated Financial Statements for information on the significant customers for Greens Creek's products. Concentrates are shipped from the Hawk Inlet marine terminal about nine miles from the mill.

Underground exploration activities at the Greens Creek unit during 2014 focused on continued expansion of the Deep 200 South mineralized zone along trend of the already-existing mineralization to the south, at the NWW, and Gallagher Fault Block zones. Definition drilling of the Deep 200 South, NWW, and West Wall zones resulted in additions to reserves. The 2014 surface exploration program focused on the Killer Creek area and consisted of 23,214 feet of core drilling in 5 holes. Drilling has confirmed and expanded on a broad, locally high-grade copper, silver and zinc system associated with stockwork veining intersected in the 2013 exploration program. At depth, a number of holes intersected densely pyritic laminated argillite that thickened with depth and were anomalous in silver and zinc. This may imply the existence of another mine horizon which could host another ore deposit at Killer Creek and elsewhere on the property. Objectives for the 2015 season are to further evaluate the south Killer Creek and High Sore areas, both of which are less than one mile from the current Greens Creek mine. All exploration efforts in 2015 are expected to be concentrated on near mine targets with the goal of increasing known mineralization at the Greens Creek mine.

Electricity for the Greens Creek unit is provided through the purchase of surplus hydroelectric power from Alaska Electric Light and Power Company ("AEL&P"), to the extent it is available after the power needs of Juneau and the surrounding area are met. When weather conditions are not favorable to maintain lake water levels sufficient for all of the power needs at Greens Creek to be met by available hydroelectric power, the mine relies on power provided by on-site diesel generators.

The employees at Greens Creek are employees of Hecla Greens Creek Mining Company, our wholly-owned subsidiary, and are not represented by a bargaining agent. There were 415 employees at the Greens Creek unit at December 31, 2014.

As of December 31, 2014, we have recorded a \$39.2 million asset retirement obligation for reclamation and closure costs. We maintained a \$68.9 million reclamation and long-term water treatment bond for Greens Creek as of December 31, 2014. The net book value of the Greens Creek unit property and its associated plant, equipment and mineral interests was approximately \$651 million as of December 31, 2014.

Based on current ore reserve estimates, the currently known remaining mine life at Greens Creek is 9 years. Information with respect to production, average Cash Cost, After By-product Credits, Per Silver Ounce and proven and probable ore reserves is set forth in the following table.

Production	Years Ended December 31,		
	2014	2013	2012
Ore milled (tons)	816,213	805,322	789,569
Silver (ounces)	7,826,341	7,448,347	6,394,235
Gold (ounces)	58,753	57,457	55,496
Zinc (tons)	59,810	57,614	64,249
Lead (tons)	20,151	20,114	21,074
<b>Average Cost, After By-product Credits, Per Silver Ounce Produced<sup>(1)</sup></b>			
Cash Cost, After By-product Credits, Per Silver Ounce	\$ 2.89	\$ 4.42	\$ 2.70
<b>Proven Ore Reserves<sup>(2,3,4,5,6,7)</sup></b>			
Total tons	4,700	14,100	12,000
Silver (ounces per ton)	15.7	12.9	12.0
Gold (ounces per ton)	0.10	0.13	0.09
Zinc (percent)	9.2	8.1	8.9
Lead (percent)	3.7	3.0	3.4
Contained silver (ounces)	74,200	181,700	112,500
Contained gold (ounces)	500	1,800	1,100
Contained zinc (tons)	440	1,150	930
Contained lead (tons)	180	430	330

	Years Ended December 31,		
	2014	2013	2012
<b>Probable Ore Reserves</b> <sup>(2,3,4,5,6,7)</sup>			
Total tons	7,691,000	7,782,800	7,845,600
Silver (ounces per ton)	12.2	11.9	12.0
Gold (ounces per ton)	0.10	0.09	0.09
Zinc (percent)	8.3	8.7	9.0
Lead (percent)	3.1	3.3	3.4
Contained silver (ounces)	93,946,900	92,338,300	94,481,200
Contained gold (ounces)	738,200	710,900	718,400
Contained zinc (tons)	639,490	676,800	702,300
Contained lead (tons)	240,670	255,700	267,410

**Total Proven and Probable Ore Reserves** <sup>(2,3,4,5,6,7)</sup>

Total tons	7,695,700	7,796,900	7,857,600
Silver (ounces per ton)	12.2	11.9	12.0
Gold (ounces per ton)	0.10	0.09	0.09
Zinc (percent)	8.3	8.7	9.0
Lead (percent)	3.1	3.3	3.4
Contained silver (ounces)	94,021,100	92,520,000	94,593,700
Contained gold (ounces)	738,700	712,700	719,500
Contained zinc (tons)	639,930	677,950	703,230
Contained lead (tons)	240,850	256,130	267,740

(1) Includes by-product credits from gold, lead and zinc production. Cash Cost, After By-product Credits, Per Silver Ounce represents a measurement that is not in accordance with GAAP that management uses to monitor and evaluate the performance of our mining operations. We believe Cash Cost, After By-product Credits, Per Silver Ounce provides an indicator of economic performance and efficiency at each location and on a consolidated basis, as well as providing a meaningful basis to compare our results to those of other mining companies and other mining operating properties. A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found in *Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations*, under *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Costs of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

(2) Estimates of proven and probable ore reserves for the Greens Creek unit as of December 2014, 2013 and 2012 are calculated and reviewed in-house and are derived from successive generations of reserve and feasibility analyses for different areas of the mine, using a separate assessment of metals prices for each year. The average prices used for the Greens Creek unit were:

	December 31,		
	2014	2013	2012
Silver (per ounce)	\$ 17.25	\$ 20.00	\$ 26.50
Gold (per ounce)	\$ 1,225	\$ 1,300	\$ 1,400
Lead (per pound)	\$ 0.95	\$ 0.90	\$ 0.85
Zinc (per pound)	\$ 0.90	\$ 0.80	\$ 0.85

(3) Ore reserves represent in-place material, diluted and adjusted for expected mining recovery. Mill recoveries of ore reserve grades differ with ore grades, and the 2014 reserve model assumes average total mill recoveries of 72% for silver, 63% for gold, 76% for zinc and 69% for lead.

(4) The changes in reserves in 2014 versus 2013 are due to the addition of data from new drill holes, partially offset by continued depletion of the deposit through production and lower metals price assumptions. The changes in reserves in 2013 versus 2012 were due to continued depletion of the deposit through production and lower metals price assumptions, partially offset by the addition of data from new drill holes and development work.

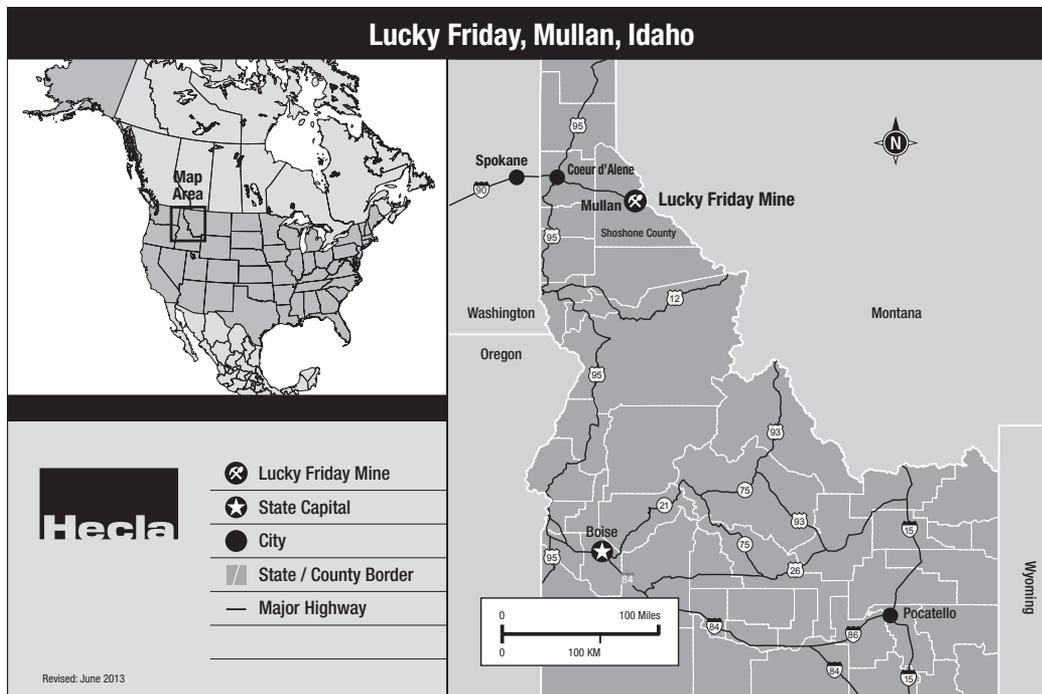

(5) Probable reserves at the Greens Creek unit are based on average drill spacing of 50 to 100 feet. Proven reserves typically require that mining samples are partly the basis of the ore grade estimates used, while probable reserve grade estimates can be based entirely on drilling results. The proven reserves reported for Greens Creek for 2014 represents stockpiled ore. Cutoff grade assumptions vary by orebody and are developed based on reserve metals price assumptions, anticipated mill recoveries and smelter payables and cash operating costs. Due to multiple ore metals, and complex combinations of ore types, metal ratios and metallurgical performances at Greens Creek, the cutoff grade is expressed in terms of net smelter return ("NSR"), rather than metal grade. The cutoff grade was \$190 per ton NSR.

(6) Greens Creek ore reserve estimates were prepared by Robert Callaghan, Chief Geologist, and Kerry Lear, Senior Resource Geologist (contractor) at the Greens Creek unit and reviewed by Keith Blair, Senior Resource Geologist at Hecla Limited and Dean McDonald, Senior Vice President of Exploration.

(7) An independent review by Amec Foster Wheeler E&C, Inc. occurred in 2012. The review included the 2012 model containing a portion of the 200 South zone that is included in reserves.

## THE LUCKY FRIDAY UNIT

Since 1958, we have owned and operated the Lucky Friday mine, a deep underground silver, lead and zinc mine located in the Coeur d'Alene Mining District in northern Idaho. Lucky Friday is one-quarter mile east of Mullan, Idaho, and is adjacent to U.S. Interstate 90. The mine site and various surface facilities are accessed by paved roads from U.S. Interstate 90. Below is a map illustrating the location and access to the Lucky Friday unit:

There have been two ore-bearing structures mined at the Lucky Friday unit. The first, mined through 2001, was the Lucky Friday vein, a fissure vein typical of many in the Coeur d'Alene Mining District. The ore body is located in the Revett Formation, which is known to provide excellent host rocks for a number of ore bodies in the Coeur d'Alene Mining District. The Lucky Friday vein strikes northeasterly and dips steeply to the south with an average width of six to seven feet. Its principal ore minerals are galena and tetrahedrite with minor amounts of sphalerite and chalcopyrite. The ore occurs as a single continuous ore body in and along the Lucky Friday vein. The major part of the ore body has extended from 1,200 feet to 6,020 feet below surface.

The second ore-bearing structure, known as the Lucky Friday Expansion Area, or Gold Hunter, has been mined since 1997 pursuant to an operating agreement with Silver Hunter Mining Company ("Silver Hunter"), our wholly owned subsidiary. During 1991, we discovered several mineralized structures containing some high-grade silver ores in an area known as the Gold Hunter property, approximately 5,000 feet northwest of the then existing Lucky Friday workings. This discovery led to the development of the Gold Hunter property on the 4900 level. At approximately 4,900 feet below surface, the Gold Hunter veins are hosted in a 200-foot thick siliceous lens within the Wallace Formation that transitions to the St. Regis Formation below 5,900 feet. The veins are sub-parallel, and are numbered consecutively from the hanging wall of the favorable horizon to the footwall. The strike of the vein system is west-northwest with a dip of 85 degrees to the south. The 30-vein, which has demonstrated to contain higher silver grades, represents approximately 67% of our current proven and probable ore reserve tonnages, while the remaining 33% of our reserves are contained in various intermediate veins having lower silver grades than 30-vein. While the veins share many characteristics with the Lucky Friday vein, the Gold Hunter area possesses some mineralogical and rock mechanics differences that make it more favorable to mine at this time. On November 6, 2008, we, through Silver Hunter, completed the acquisition of substantially all of the assets of Independence Lead Mines Company, which held an interest in the Gold Hunter property. The acquisition included all future interests or royalty obligations to Independence and the mining claims pertaining to the operating agreement with Hecla Limited that was assigned to Silver Hunter.

The principal mining method at the Lucky Friday unit is ramp access, cut and fill. This method utilizes rubber-tired equipment to access the veins through ramps developed outside of the ore body. Once a cut is taken along the strike of the vein, it is backfilled with cemented tailings and the next cut is accessed, either above or below, from the ramp system.

Ore at the Lucky Friday is processed using a conventional lead/zinc flotation flowsheet, with process control guided by a real-time, on-line analyzer. Run of mine ore is crushed in a conventional three stage crushing plant consisting of a primary jaw crusher, and a secondary crushing circuit, and tertiary cone crushing stage. Crushed ore is ground in a ball mill, and the ground slurry reports to the lead flotation circuit. The lead circuit tailings report to the zinc flotation circuit. Lead and zinc concentrates are thickened and filtered, and final concentrate products are shipped to smelters for final processing. Current processing capacity of the Lucky Friday facility is approximately 1,000 tons per day. As discussed further below, production at Lucky Friday was temporarily suspended during 2012 and then ramped up during 2013 to historical levels. Lucky Friday reached full production in late September 2013, averaging 837 tons milled per day. In 2014, production increased to 847 tons per day, and total mill recovery was approximately 95% silver, 94% lead, and 78% zinc. All lead and zinc concentrate production during 2014 was shipped to Teck Cominco Limited's smelter in Trail, British Columbia, Canada.

Underground exploration activities have been suspended at the Lucky Friday unit since 2013, with a plan to resume exploration once deeper drill stations become available with the advance of the #4 Shaft (discussed below). Definition drilling from the 6500 level #4 shaft drill platform completed 22 holes, for a total footage of 27,157 feet, during 2014. This drilling was all within the central portion of the vein system and in-fill drilled for upgrades in the quality of the mineralized material and other resources between the 6600 and 7900 levels.

Based on current estimates of reserves, mineralized material, and other resources, the currently expected mine life at the Lucky Friday is approximately 28 years. Information with respect to the Lucky Friday unit's production, average Cash Cost, After By-product Credits, Per Silver Ounce and proven and probable ore reserves for the past three years is set forth in the table below.

Production	Years Ended December 31,		
	2014	2013	2012
Ore milled (tons)	309,070	174,331	–
Silver (ounces)	3,239,151	1,459,000	–
Lead (tons)	20,104	10,260	–
Zinc (tons)	8,159	3,793	–
<b>Average Cost per Ounce of Silver Produced <sup>(1)</sup></b>			
Cash Cost, After By-product Credits, Per Silver Ounce	\$ 9.44	\$ 19.21	\$ –
<b>Proven Ore Reserves <sup>(2,3,4,5,6)</sup></b>			
Total tons	3,839,600	3,707,800	2,206,600
Silver (ounces per ton)	13.7	12.1	12.1
Lead (percent)	8.3	7.3	7.4
Zinc (percent)	2.6	2.3	2.7
Contained silver (ounces)	52,556,000	44,891,500	26,778,900
Contained lead (tons)	318,610	270,150	163,350
Contained zinc (tons)	98,230	86,360	58,560
<b>Probable Ore Reserves <sup>(2,3,4,5,6)</sup></b>			
Total tons	2,043,200	2,698,000	1,931,700
Silver (ounces per ton)	12.9	12.0	14.8
Lead (percent)	7.4	7.2	8.7
Zinc (percent)	2.2	2.6	3.2
Contained silver (ounces)	26,346,100	32,351,800	28,676,000
Contained lead (tons)	151,590	193,110	167,390
Contained zinc (tons)	44,910	69,180	62,300
<b>Total Proven and Probable Ore Reserves <sup>(2,3,4,5,6)</sup></b>			
Total tons	5,882,800	6,405,800	4,138,300
Silver (ounces per ton)	13.4	12.1	13.4
Lead (percent)	8.0	7.2	8.0
Zinc (percent)	2.4	2.4	2.9
Contained silver (ounces)	78,902,100	77,243,300	55,454,900
Contained lead (tons)	470,200	463,260	330,740
Contained zinc (tons)	143,140	155,540	120,860

(1) Includes by-product credits from lead and zinc production. Cash Cost, After By-product Credits, Per Silver Ounce represents a measurement that is not in accordance with GAAP that management uses to monitor and evaluate the performance of our mining operations. We believe Cash Costs, After By-product Credits, Per Silver Ounce provides an indicator of economic performance and efficiency at each location and on a consolidated basis, as well as providing a meaningful basis to compare our results to those of other mining companies and other mining operating properties. A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found in *Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations, under Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Costs of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

(2) Proven and probable ore reserves are calculated and reviewed in-house and are subject to periodic audit by others, although audits are not performed on an annual basis. Cutoff grade assumptions vary by ore body and are developed based on reserve metals price assumptions, anticipated mill recoveries and smelter payables and cash operating costs. Due to multiple ore metals, and complex combinations of ore types, metal ratios and metallurgical performances at the Lucky Friday, the cutoff grade is expressed in terms of net smelter return ("NSR"), rather than metal grade. The cutoff grade at the Lucky Friday ranges from \$129 per ton NSR to \$149 per ton NSR. Our estimates of proven and probable reserves are based on the following metals prices:

	December 31,		
	2014	2013	2012
Silver (per ounce)	\$ 17.25	\$ 20.00	\$ 26.50
Lead (per pound)	\$ 0.95	\$ 0.90	\$ 0.85
Zinc (per pound)	\$ 0.90	\$ 0.80	\$ 0.85

(3) Reserves are in-place materials that incorporate estimates of the amount of waste that must be mined along with the ore and expected mining recovery. Total mill recoveries are expected to be 95% for silver, 95% for lead and 90% for zinc.

(4) The change in reserves in 2014 from 2013 was because of lower silver prices and depletion of the deposit through production, partially offset by inclusion of definition drilling information from 2014. The changes in reserves in 2013 versus 2012 were due to inclusion of definition drilling information from 2013 and the advance of mine design and planning at the lower and upper limits of the mine, partially offset by depletion of the deposit through production and lower metals price assumptions.

(5) Lucky Friday ore reserve estimates were prepared by Terry DeVoe, Chief Geologist, and Joshua Pritts, Resource Geologist, at the Lucky Friday unit and reviewed by Keith Blair, Senior Resource Geologist at Hecla Limited and Dean McDonald, Senior Vice President of Exploration.

(6) An independent audit by Roscoe Postle Associates Inc. was completed in 2013 for the 2012 reserve model at the Lucky Friday mine.

At the end of 2011, MSHA began a special impact inspection which resulted in an order to remove built-up cementitious material from the Silver Shaft, the primary access way from surface. In response, we submitted a plan to MSHA and received approval to remove the built-up cementitious material, and that work commenced in the first quarter of 2012. Once the shaft cleanup was complete down to the 4900 level, work on a haulage way bypassing the area at 5900 level impacted by a rock burst commenced. Work on the Silver Shaft and the haulage way was completed in the first

quarter of 2013. Underground access was temporarily limited as this work was being performed, and production was suspended from late 2011 until early 2013 as a result. Limited production commenced in the first quarter of 2013 and the mine has been at full production since September 2013.

During 2008, we initiated engineering, procurement and development activities relating to construction of #4 Shaft, which, upon completion, would provide access from the 4900 level down to the 8800 level. The project was temporarily placed on hold in the fourth quarter of 2008 due to then prevailing metals prices. However, detailed engineering, long lead time procurement, and other early-stage activities for the internal shaft project resumed in 2009. #4 Shaft sinking activities were temporarily suspended until the rehabilitation work in the Silver Shaft, discussed above, was completed in early 2013. Activities relating to the #4 Shaft project as of December 31, 2014 have included engineering, detailed shaft design, excavation of the hoist room and off shaft development access to shaft facilities, installation of the hoist and head works, placement and receipt of orders for major equipment purchases, advancement of a geotechnical drill hole, 2,828 feet of vertical excavation, and other construction activities. Upon completion, #4 Shaft should allow us to mine mineralized material below our current workings and provide deeper platforms for exploration. Construction of #4 Shaft is expected to be completed in 2016, and capital expenditures for the project are anticipated to total approximately \$215 million, including approximately \$165 million spent on the project through December 31, 2014. However, there are a number of factors that could affect completion of the project, including a significant decline in metals prices, a reduction in available cash or credit, increased regulatory burden, or a significant increase in operating or capital costs. An increase in the capital cost could potentially require us to suspend or change the scope of the project or access additional capital through debt financing, the sale of securities, or other external sources. This additional financing could be costly or unavailable.

During 2014, Lucky Friday began implementing an Environmental Management System and completed installation of remote stream gauging stations. These stations assist in performing daily monitoring activities in nearby receiving waters as required by our effluent discharge permit. Additionally, we have completed reclamation activities on the 26 acre Pond 4 borrow site and achieved final stabilization of the site prior to onset of winter conditions. Lastly, Lucky Friday has developed a design for closure of tailings pond 3 which will be submitted to Idaho Department of Water Resources for review in early 2015 with subsequent construction planned. At December 31, 2014, an asset retirement obligation of approximately \$1.1 million had been recorded for reclamation and closure costs.

The net book value of the Lucky Friday unit property and its associated plant, equipment and mineral interests was approximately \$349.8 million as of December 31, 2014. The age of the facilities at Lucky Friday ranges from the 1950s to 2014.

At December 31, 2014, there were 307 employees at Lucky Friday. The United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial, and Service Workers International Union is the bargaining agent for the Lucky Friday's 239 hourly employees. The current labor agreement expires on April 30, 2016. As a result of the requirement to remove built-up cementitious material from the Silver Shaft, which limited underground access and temporarily suspended production, Hecla Limited laid off 121 employees in January 2012, with approximately 25 of those employees accepting temporary positions at other Hecla operations. Lucky Friday completed the recall/rehire of the laid off employees in January 2013.

Avista Corporation supplies electrical power to the Lucky Friday unit.

## THE CASA BERARDI UNIT

In 2013, as a result of our acquisition of Aurizon Mines Ltd. ("Aurizon"), we acquired the Casa Berardi mine, located 95 kilometers north of La Sarre in the Abitibi Region of Western Quebec, Canada. The mining site is reached via a 38 kilometers all season gravel road which connects with the provincial and national paved roads grid. The property is limited to the west by the Quebec/Ontario border and covers parts of Casa Berardi, Dieppe, Raymond, D'Estrees, and Puiseaux townships. The project area extends east-west for more than 37 kilometers and reaches 3.5 kilometers in width. The Casa Berardi mine gold deposits are located along a 5 kilometer east-west mineralized corridor.

The Casa Berardi mine is located in the northern part of the Abitibi sub-province, a subdivision of the Superior province, within the Canadian Shield. The Casa Berardi area belongs to the Harricana-Turgeon Belt, which is a part of the North Volcanic Zone. The regional geology is characterized by a mixed assemblage of mafic volcanics, flysch-type sedimentary iron formations, and graphitic mudrocks that are limited by a large granodioritic to granitic batholith. Structurally, the area is enclosed in the Casa Berardi Tectonic Zone, a 15 kilometers wide corridor that can be traced over 200 kilometers. A network of east-west to east-southeast and west-northwest ductile high strain zones mainly follows the lithological contacts.

Casa Berardi can be classified as an Archean sedimentary-hosted orogenic gold deposit. Mineralization is found in large low-sulphide quartz veins developed against the Casa Berardi fault, and in disseminated sulfides and stockworks lenses associated with strongly carbonate-sericite altered ductile deformation zones obliquely oriented to the Casa Berardi fault, and extending a few hundred metres on both sides of the fault following northwest and northeast orientations. Gold mineralization emplacement was coeval with the fault's evolution and shows a strong structural control and vertical extension, even if other factors such as the nature of some host rocks and lithological contacts seem to have favored gold deposition.

The Casa Berardi Fault is defined by a stratigraphic contact between a graphite-rich sediment sequence at the base of the Taïbi domain, a northern continuous intermediary fragmental volcanic unit, and a southern polymictic conglomerate unit. The mineralization system is composed of large, low-sulfide quartz veins and low-grade stockworks and carbonate-mica replacement zones forming in the West Mine and Principale area. On the north side of the Fault, a thick sequence of very homogeneous wacke belonging to the Taïbi Group is affected by an amphibolites metamorphic grade. One kilometer further north is the easterly elongated Recher batholith, which is part of the north-western boundary of the Abitibi greenstone belt.

Aurizon acquired the claims, leases and infrastructure comprising the Casa Berardi mine project in 1998 from TVX Gold Inc. Aurizon engaged in exploration programs beginning in 1998, and production began in late 2006.

The nearest commercial airport to the Casa Berardi mine is located at Rouyn-Noranda. La Sarre can be reached from Rouyn-Noranda via provincial roads 101 and 111. The 38 kilometer all-season gravel road to the mine site branches off from the paved Route des Conquérents road, which runs north from its intersection with road 393 north of La Sarre and passes through the village of Villebois. The branch is approximately 21 kilometers north of Villebois. A gravel road links the East Mine and the West Mine (which roughly represent the east-west boundaries of the mine), and a number of forestry roads provide access to the rest of the project area, from east and west.

Hecla acquired Aurizon on June 1, 2013 for approximately CAD\$740.8 million (US\$714.5 million), and has operated the Casa Berardi mine since the acquisition. The net book value of the Casa Berardi unit property and its associated plant, equipment and mineral interests was approximately \$749.7 million as of December 31, 2014. As of December 31, 2014, we have recorded a \$6.2 million asset retirement obligation for reclamation and closure costs. We maintained a letter of credit as financial guarantee for future reclamation and closure work.

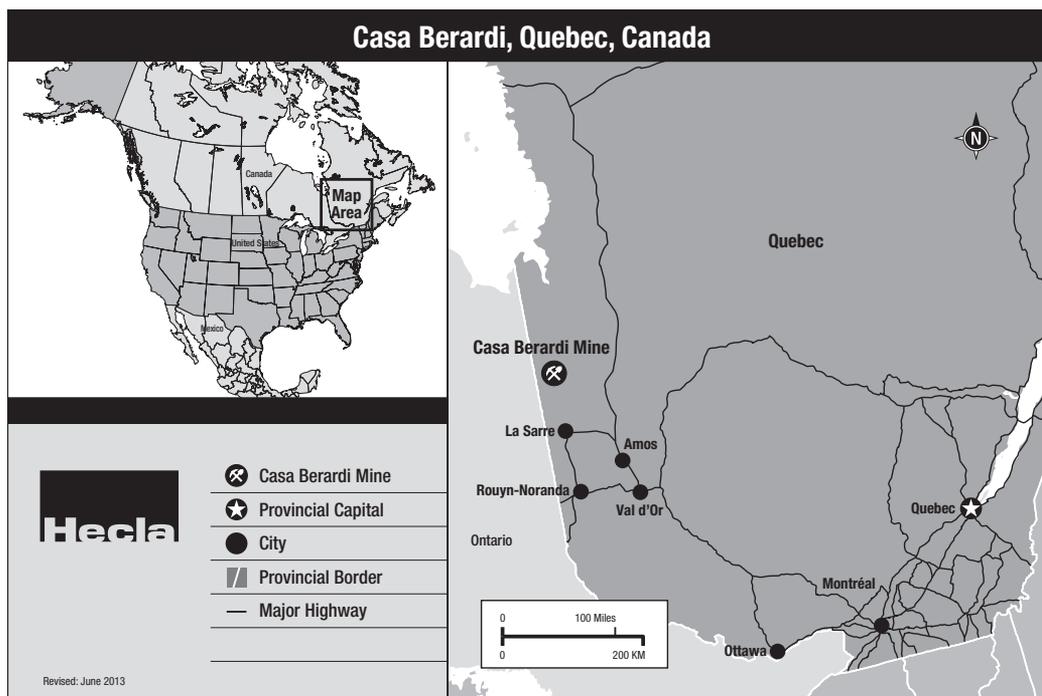

Hecla's wholly owned subsidiary, Hecla Quebec Inc., owns a 100% interest in the mineral titles and mining leases that comprise the Casa Berardi mine. The Casa Berardi mine is composed of 296 contiguous designated claims, covering a total area of approximately 36,660 acres, and two mining

leases, BM 768 and BM 833, covering areas of 981 acres and 208 acres, respectively. The total property area is 37,849 acres. We believe the claims and mining leases that comprise the Casa Berardi mine are in good standing. Mining lease 768 expires in 2018 and mining lease 833 expires in 2015; however, each lease is subject to renewal for three 10-year terms, which we expect to occur following an administrative procedure with the Quebec government in accordance with the Quebec Mining Act. In 2007, Lake Shore Gold Corp. ("Lake Shore") was granted an option to earn a 50% joint venture interest in most of the property, excluding the two mining leases (which represent all of the mine's current production), by incurring exploration expenditures. To date, Lake Shore has not elected to earn in to the joint venture. The part of the property impacted by this agreement, which is all exploration property and not production, includes 227 claims adjacent to the east and west of the Casa Berardi mine, and covers an area of 11,630 hectares.

We also hold a non-exclusive lease BNE 25938 for a sand and gravel pit, tailings lease 70218, and an additional 12 acres of land contiguous to mining lease BM 768 for rock waste material storage.

Under the Quebec Mining Act, claims are required to be renewed every two years. Statutorily prescribed minimum work commitments apply to all claims and leases. As of December 31, 2014, the claims and leases comprising part of the Casa Berardi mine have excess work credits of CAD\$11.9 million.

The project consists of two shafts; the West Mine shaft reaching a vertical depth of 1096 meters, and the unused East Mine shaft located 4.3 kilometers to the east, and going down to a vertical depth of 379 meters. A system of declines and galleries connecting both shafts provide access and underground services to ore zones. The surface infrastructures include a 3,100 tons per day (over 1,100,000 tons per year) cyanidation processing mill, tailings impoundment areas, and other facilities and infrastructures. Power supply to the site is provided by a 55 kilometer, 120kV power line from the Hydro-Québec transformation station located in the town of Normétal. The map below illustrates the location and access to Casa Berardi:

Prior to Aurizon's ownership, the Casa Berardi underground mine operated from 1988 to 1997, producing approximately 3.5 million tonnes of ore at an average gold grade of 7.1 grams/tonne from two sites, the West Mine and the East Mine. Aurizon's operations from 2006 to 2012 produced approximately 4.1 million tonnes of ore at an average gold grade of 7.8 grams/tonne. A total of 1,625,500 ounces of gold were recovered by the previous operators prior to 2013. The mineral deposits cover a distance of more than 5.0 kilometers.

Casa Berardi is an underground trackless mine accessed by declines and a shaft, which produces approximately 2,260 tons of ore per day. The mining methods are longhole transversal stoping in 10 metres or more mineralization width, and longitudinal retreat stoping in narrower ore bodies. The mineralized zones put in reserves are of varying thickness, ranging from a few tens of meters to 3 metres, which is the minimum mining width. Most of the hanging walls are sub-vertical (55° to 85°), with typically the graphitic Casa Berardi fault at the footwall.

In 2014, we completed a project initiated by Aurizon to deepen the West Mine Shaft and construct the associated shaft infrastructure, including loading pockets, shaft lining, services and steel. The deepened shaft is expected to lower operating costs in future years as the mining horizon deepens and should also eventually provide a platform for deeper exploration.

The gold recovery process is based on the CIL (carbon in leach) technology where gold is dissolved in a cyanide solution, and precipitated on activated carbon grains put in suspension. The product is doré bars poured in the mill's refinery. In 2014, total mill recovery of gold was approximately 90%.

Current reserves at the Casa Berardi mine comprise eight zones at the West Mine, spread over a moderate horizontal distance from each other and located at different mine elevations, plus open pit and underground areas at the East Mine. Zone 113, Lower Inter Zone, 118-123 Zones, Principale Zones (open pit and underground) and the East Mine comprise the bulk of the deposit tonnage. The zones are of varying thickness, ranging from over 50 meters to less than three meters, which is the minimum mining width. Most of the hanging walls are sub-vertical (55° to 85°) and exhibit similar wall characteristics with the exception of the Lower Inter Zone, which in a number of places has relatively shallow hanging wall configurations (less than 45°).

A transverse blasthole open stoping mining method was selected for the Casa Berardi mine to provide the desired production rate. Timely supply of both cemented and unconsolidated backfill plays a crucial role in controlling dilution and maintaining a short stoping cycle. We believe this mining method satisfies all of the geotechnical requirements and constraints and, as a non-entry mining method, has proven to be safe and reliable in similar

operations.

A very small part of the mineral reserves is planned for longitudinal sequencing, limited to the fringes of the small zones. Longitudinal methods have the advantage of lower waste development requirements; however, there is much less flexibility in sequencing and in access, should ground instabilities occur.

The transverse mining method is used in areas with wide mineralization (10 meters wide or more) and good access from nearby development. The blasthole longitudinal mining method will be used in areas with narrow mineralization, or long distances from development infrastructure.

The East Mine Crown Pillar ("East Mine") open pit, as currently designed, would be a smaller scale operation using conventional open pit mining methods. The East Mine open pit is expected to run for approximately 3 years of production. The average amount of material to be moved every six month period is anticipated to be approximately 150,000 to 200,000 tons of ore, with variable quantities of waste.

The Principale Zone open pit, as currently designed, would be mined using conventional open pit mining methods. The Principale Zone open pit is expected to run for slightly over 3 full years of production. The average amount of material being moved every six month period is expected to approximate 550,000 to 610,000 tons of ore, with variable quantities of waste.

The mine and mill complex were designed to process over 1,100,000 tons of ore per year at a rate of 3,100 tons per day. Difficult ground conditions and bottlenecks in stope preparation have limited underground production to levels below the designed capacity. In 2014, the mill processed approximately 827,580 tons, for an average of 2,267 tons per day. The current life of mine plan is based on an average milling rate of 2,500 tons per day until 2017. From 2017 on, the mill capacity is expected to increase to 3,400 tons per day for the remaining mine life. The increase in capacity is expected to allow for milling of mine ore from open pits.

Based on current ore reserve estimates, the known life of mine plan totals 12.5 million tons of ore grading 0.13 ounces of gold per ton, with production for approximately 10 years. The projected open pit production is anticipated to be used to support a planned expansion of processing operations to approximately 3,400 tons per day. Such throughput is planned to occur from 2017 to 2024.

At Casa Berardi in-stope drilling refines orebody shapes and gold grade distributions within the orebodies for mine planning. Underground definition drilling involves evaluating the down dip or down plunge projections of our existing ore zones, and exploration drilling evaluates similar trends but beyond currently defined mineralization. Exploration drilling also evaluates previously untested targets identified along major structural trends such as the Casa Berardi Fault and a number of structures or zones that may be mineralized. During 2014, a total of five drills operated underground to refine current resources and stope designs in the 113, 117, 118, 123, and 124 Zones. Surface and underground exploration drilling targeted the up and down plunge mineralization extensions of the 124 and 140 Zones.

The proposed 2015 underground in-stope and definition drill programs are expected to appraise the Southwest and Lower Inter vein systems and high grade ore shoots of the 113, 123 and 124 Zones. Underground exploration drilling is expected to evaluate extensions of the 113, 118, 123 (Golden Pond), 124 and 157 (East Mine) Zones. Surface exploration drilling is expected to concentrate on the deeper, down plunge extensions of the 123, 124 and 157 Zones located close to the East Mine underground infrastructure.

We expect the mine plan will continually be modified as new mineralization is discovered and upgraded to reserves.

The employees at Casa Berardi are employees of Hecla Quebec Inc., our wholly-owned subsidiary, and are not represented by a bargaining agent. There were 542 employees at the Casa Berardi unit at December 31, 2014.

Information with respect to the Casa Berardi unit's production, average Cash Cost, After By-product Credits, Per Gold Ounce and proven and probable ore reserves for 2014 and 2013 is set forth in the table below.

	Year Ended December 31, 2014	Seven Months Ended December 31, 2013
<b>Production</b>		
Ore milled (tons)	827,580	387,608
Gold (ounces)	128,244	62,532
Silver (ounces)	25,014	12,381
<b>Average Cost, After By-products, Per Gold Ounce Produced <sup>(1)</sup></b>		
Cash Cost, After By-product Credits, Per Gold Ounce	\$ 826.35	\$ 950.79
<b>Proven Ore Reserves <sup>(2,3,4,5)</sup></b>		
Total tons	1,605,700	1,106,300
Gold (ounces per ton)	0.15	0.17
Contained gold (ounces)	237,000	185,100
<b>Probable Ore Reserves <sup>(2,3,4,5)</sup></b>		
Total tons	7,806,200	7,932,800
Gold (ounces per ton)	0.14	0.15
Contained gold (ounces)	1,100,100	1,208,500
<b>Total Proven and Probable Ore Reserves <sup>(2,3,4,5)</sup></b>		
Total tons	9,411,900	9,039,100
Gold (ounces per ton)	0.14	0.15
Contained gold (ounces)	1,337,100	1,393,600

(1) Includes by-product credits from silver production. Cash Cost, After By-product Credits, Per Gold Ounce represents a measurement that is not in accordance with GAAP that management uses to monitor and evaluate the performance of our mining operations. We believe Cash Cost, After By-product Credits, Per Gold Ounce provides an indicator of economic performance and efficiency at each location and on a consolidated basis, as well as providing a meaningful basis to compare our results to those of other mining companies and other mining operating properties. A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found in *Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations*, under *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs*

and Depreciation, Depletion and Amortization (GAAP).

- (2) Proven and probable ore reserves are calculated and reviewed in-house and are subject to periodic audit by others, although audits are not performed on an annual basis. Cutoff grade assumptions vary by ore body and are developed based on reserve metals price assumptions, anticipated mill recoveries and smelter payables and cash operating costs. Due to multiple ore metals, and complex combinations of ore types, metal ratios and metallurgical performances at Casa Berardi, the cutoff grade is expressed in terms of net smelter return ("NSR"), rather than metal grade. The cutoff grade at Casa Berardi is assumed to be 0.116 ounces per ton for underground reserves and between 0.009 and 0.023 ounces per ton for open pit reserves. Our estimates of proven and probable reserves are based on prices of \$1,225 and \$1,300 per gold ounce for 2014 and 2013, respectively.
- (3) Reserves are in-place materials that incorporate estimates of the amount of waste that must be mined along with the ore and expected mining recovery. Total mill recoveries for gold are expected to be approximately 90%.
- (4) The change in reserves in 2014 compared to 2013 is a result of depletion of the deposit through production and a lower gold price assumption, offset by inclusion of definition drilling information from 2014.
- (5) Casa Berardi ore reserve estimates were prepared by Sylvain Picard, Chief Geologist, and Real Parent, Senior Resource Geologist, at the Casa Berardi unit. Casa Berardi resource estimates were reviewed by Keith Blair, Senior Resource Geologist at Hecla Limited and Dean McDonald, Senior Vice President of Exploration.
- (6) An independent review of the 2013 Casa Berardi reserve model was performed by Roscoe Postle Associates Inc.

### ITEM 3. LEGAL PROCEEDINGS

For a discussion of our legal proceedings, see *Note 7 of Notes to Consolidated Financial Statements*.

### ITEM 4. MINE SAFETY DISCLOSURES

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in exhibit 95 to this Annual Report.

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Shares of our common stock are traded on the New York Stock Exchange, Inc. under the symbol "HL." As of February 16, 2015, there were 5,365 stockholders of record of our common stock. Our common stock quarterly high and low sale prices for the past two years were as follows:

	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
2014 – High	\$ 2.91	\$ 3.52	\$ 3.48	\$ 3.76
– Low	\$ 2.00	\$ 2.47	\$ 2.71	\$ 2.98
2013 – High	\$ 3.47	\$ 3.98	\$ 4.10	\$ 6.15
– Low	\$ 2.63	\$ 2.72	\$ 2.65	\$ 3.91

Quarterly dividends were paid on our Series B Preferred Stock for 2012, 2013 and 2014, and no dividends are in arrears.

In September 2011 and February 2012, our Board of Directors adopted a common stock dividend policy that has two components: (1) a dividend that links the amount of dividends on our common stock to our average quarterly realized silver price in the preceding quarter, and (2) a minimum annual dividend of \$0.01 per share of common stock, in each case, payable quarterly, when declared. See *Note 9 of Notes to Consolidated Financial Statements* for more information on potential dividend amounts under the first component of the policy at various silver prices. The following table summarizes the common stock dividends declared by our Board of Directors:

Declaration date	(A) Silver-price-linked component per share	(B) Minimum annual component per share	(C) Special dividend per share	(A+B+C) Total dividend per share	Total dividend amount (in millions)	Month of payment
November 8, 2011	\$ 0.02	\$ –	\$ –	\$ 0.02	\$ 5.6	December 2011
February 17, 2012	\$ 0.01	\$ 0.0025	\$ –	\$ 0.0125	\$ 3.6	March 2012
May 8, 2012	\$ 0.02	\$ 0.0025	\$ –	\$ 0.0225	\$ 6.4	June 2012
August 7, 2012	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.7	September 2012
November 2, 2012	\$ 0.02	\$ 0.0025	\$ –	\$ 0.0225	\$ 6.4	December 2012
February 25, 2013	\$ –	\$ 0.0025	\$ 0.01	\$ 0.0125	\$ 3.6	March 2013
May 10, 2013	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.7	June 2013
August 8, 2013	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	August 2013
November 5, 2013	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	December 2013
February 21, 2014	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	March 2014
May 5, 2014	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	June 2014
July 31, 2014	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	September 2014
November 5, 2014	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	December 2014
February 17, 2015	\$ –	\$ 0.0025	\$ –	\$ 0.0025	\$ 0.9	March 2015

Because the average realized silver price for each quarter of 2013 and 2014 and the second and fourth quarters of 2012 was below the minimum threshold of \$30 according to the policy, no silver-price-linked component was declared or paid. However, on February 25, 2013, our Board of Directors declared a special common stock dividend of \$0.01 per share, in addition to the minimum dividend of \$0.0025 per share, for an aggregate dividend of \$3.6 million. Prior to 2011, no dividends had been declared on our common stock since 1990. We cannot pay dividends on our common stock if we fail to pay dividends on our Series B Preferred Stock. The declaration and payment of common stock dividends, whether pursuant to the policy or in addition thereto, is at the sole discretion of our Board of Directors, and there can be no assurance that we will continue to declare and pay common stock dividends in the future.

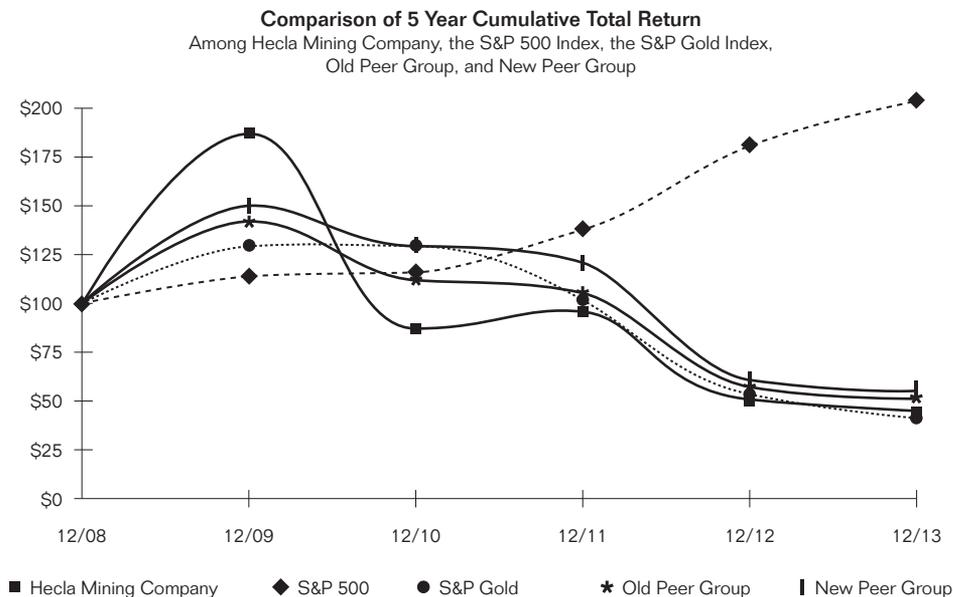

The following table provides information as of December 31, 2014 regarding our compensation plans under which equity securities are authorized for issuance:

	Number of Securities To Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options	Number of Securities Remaining Available For Future Issuance Under Equity Compensation Plans
Equity Compensation Plans Approved by Security Holders:			
2010 Stock Incentive Plan	–	N/A	15,414,727
1995 Stock Incentive Plan	259,342	5.47	–
Stock Plan for Non-employee Directors	–	N/A	555,167
Key Employee Deferred Compensation Plan	–	N/A	676,992
<b>Total</b>	<b>259,342</b>	<b>5.47</b>	<b>16,646,886</b>

See Note 8 and Note 9 of Notes to Consolidated Financial Statements for information regarding the above plans.

On June 1, 2013, we issued 56,997,790 unregistered shares of common stock to the former holders of common stock of Aurizon Mines Ltd. ("Aurizon") to partially fund the acquisition of Aurizon (see Note 15 of Notes to Consolidated Financial Statements). The shares were not registered under the Securities Act of 1933 pursuant to an exemption from registration under Section 3(a)(10) of such act. We did not issue any unregistered equity securities in 2014 or 2012.

The following performance graph compares the performance of our common stock during the period beginning December 31, 2009 and ending December 31, 2014 to the S&P 500, the S&P 500 Gold Index, a peer group for the year ending December 31, 2014 ("New Peer Group"), and a peer group for the year ending December 31, 2013. The New Peer Group consists of the following companies: Alamos Gold Inc., Allied Nevada Gold Corp., AuRico Gold Inc., Centerra Gold, Inc., Coeur Mining, Inc., Detour Gold Corporation, Endeavour Silver Corp., First Majestic Silver Corp., IAMGOLD Corporation, New Gold Inc., Pan American Silver Corp., Royal Gold, Inc., Silver Standard Resources Inc., Stillwater Mining Company, Tahoe Resources Inc., and Thompson Creek Metals Company Inc. The Old Peer Group consists of the following companies: Alamos Gold Inc., Allied Nevada Gold Corp., AuRico Gold Inc., Centerra Gold, Inc., Coeur Mining, Inc., Eldorado Gold Corp., Endeavour Silver Corp., First Majestic Silver Corp., Golden Star Resources Ltd., IAMGOLD Corporation, New Gold Inc., Osisko Mining Corp., Pan American Silver Corp., Silver Standard Resources Inc., and Stillwater Mining Company. The change in our 2014 peer group compared to the 2013 peer group was to add Detour Gold Corporation, Royal Gold, Inc., Tahoe Resources Inc., and Thompson Creek Metals Company Inc., and to remove Eldorado Gold Corp., Golden Star Resources Ltd., and Osiska Mining Corp., so that that group includes companies that we have determined to be within an acceptable revenue range. The graph assumes a \$100 investment in our common stock and in each of the indexes and peer groups since the beginning of the period, and a reinvestment of dividends paid on such investments on a quarterly basis throughout the period.

Date	Hecla Mining	S&P 500	S&P 500		2013		2014	
			Gold Index	Old Peer Group	Old Peer Group	New Peer Group		
December 2009	\$ 100.00	\$ 100.00	\$ 100.00	\$ 100.00	\$ 100.00	\$ 100.00	\$ 100.00	
December 2010	\$ 182.20	\$ 115.06	\$ 130.97	\$ 143.25	\$ 150.28	\$ 150.28	\$ 150.28	
December 2011	\$ 84.89	\$ 117.49	\$ 130.07	\$ 113.87	\$ 130.32	\$ 130.32	\$ 130.32	
December 2012	\$ 95.76	\$ 136.30	\$ 103.52	\$ 108.18	\$ 123.41	\$ 123.41	\$ 123.41	
December 2013	\$ 50.86	\$ 180.44	\$ 53.30	\$ 58.41	\$ 60.47	\$ 60.47	\$ 60.47	
December 2014	\$ 46.22	\$ 205.14	\$ 44.16	\$ 51.28	\$ 55.57	\$ 55.57	\$ 55.57	

The stock performance information above is "furnished" and shall not be deemed to be "soliciting material" or subject to Rule 14A of the Exchange Act, shall not be deemed "filed" for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities of that section, and shall not be

deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, whether made before or after the date of this report and irrespective of any general incorporation by reference language in any such filing, except to the extent that it specifically incorporates the information by reference.

On May 8, 2012, we announced that our Board of Directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions. See Note 9 of Notes to Consolidated Financial Statements for more information. We made no purchases of our outstanding common stock during the quarter ended December 31, 2014.

## ITEM 6. SELECTED FINANCIAL DATA

The following table (in thousands, except per share amounts, common shares issued, stockholders of record, and employees) sets forth selected historical consolidated financial data as of and for each of the years ended December 31, 2010 through 2014, and is derived from our audited financial statements. The data set forth below should be read in conjunction with, and is qualified in its entirety by, our Consolidated Financial Statements and the Notes thereto.

	2014	2013 <sup>(8)</sup>	2012 <sup>(8)</sup>	2011	2010
Sales of products	\$ 500,781	\$ 382,589	\$ 321,143	\$ 477,634	\$ 418,813
Net income (loss)	\$ 17,824	\$ (25,130)	\$ 14,954	\$ 151,164	\$ 48,983
Preferred stock dividends <sup>(1,2)</sup>	\$ (552)	\$ (552)	\$ (552)	\$ (552)	\$ (13,633)
Income (loss) applicable to common stockholders	\$ 17,272	\$ (25,682)	\$ 14,402	\$ 150,612	\$ 35,350
Basic income (loss) per common share	\$ 0.05	\$ (0.08)	\$ 0.05	\$ 0.54	\$ 0.14
Diluted income (loss) per common share	\$ 0.05	\$ (0.08)	\$ 0.05	\$ 0.51	\$ 0.13
EBITDA <sup>(3)</sup>	\$ 151,532	\$ 69,130	\$ 76,373	\$ 283,365	\$ (12,103)
Total assets	\$ 2,262,064	\$ 2,232,119	\$ 1,378,290	\$ 1,396,090	\$ 1,382,493
Accrued reclamation & closure costs <sup>(4)</sup>	\$ 57,250	\$ 105,191	\$ 113,215	\$ 153,811	\$ 318,797
Non-current portion of debt and capital leases <sup>(5)</sup>	\$ 512,129	\$ 505,058	\$ 11,935	\$ 6,265	\$ 3,792
Cash dividends paid per common share <sup>(6)</sup>	\$ 0.01	\$ 0.02	\$ 0.06	\$ 0.02	\$ —
Common shares issued and outstanding	367,376,863	342,663,381	285,209,848	285,289,924	258,485,666
Stockholders of record	5,571	6,435	6,630	6,943	7,388
Employees <sup>(7)</sup>	1,354	1,312	735	735	686

(1) We declared and paid all quarterly dividends on our Series B preferred shares for 2010, 2011, 2012, 2013 and 2014 totaling \$0.6 million for each of those years.

(2) We declared and paid all quarterly dividends on our 6.5% Mandatory Convertible Preferred Stock totaling \$13.1 million for 2010. Dividends declared for the first and second quarters of 2010 were paid in shares of our common stock and dividends for the third and fourth quarters of 2010 were paid in cash. The cash dividend declared for the fourth quarter of 2010, which was paid in January 2011, represented the last dividend paid on the 6.5% Mandatory Convertible Preferred Stock, which automatically converted to shares of our common stock on January 1, 2011.

(3) Earnings before interest, taxes, depreciation, and amortization ("EBITDA") is a measurement that is not in accordance with GAAP. EBITDA is used by management, and we believe is useful to investors, for evaluating our operational performance. A reconciliation of this non-GAAP measure to net income (loss), the most comparable GAAP measure, can be found in Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations, under Reconciliation of Earnings Before Interest, Taxes, Depreciation, and Amortization (non-GAAP) to Net Income (Loss) (GAAP).

(4) In the fourth quarter of 2010, we recorded an accrual of \$193.2 million to reflect our liability for environmental obligations in Idaho's Coeur d'Alene Basin pursuant to negotiations with the plaintiffs in the Coeur d'Alene Basin environmental litigation and the State of Idaho on the financial terms of settlement of the litigation and related claims. The settlement was finalized in September 2011 and the financial obligations were completed in 2014.

(5) On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 in a private placement conducted pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended. In 2014, an additional \$6.5 million aggregate principal amount of the Notes were issued to our pension plan. More information can be found in Note 6 of Notes to Consolidated Financial Statements.

(6) See Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities for a summary of the common stock dividends declared by our Board of Directors for the years presented.

(7) The increase in the number of employees in 2013 was due largely to the acquisition of Aurizon Mines Ltd. in June 2013. See Note 15 of Notes to Consolidated Financial Statements for more information.

(8) As a result of an order from MSHA to remove built-up cementitious material from the Silver Shaft, production was temporarily suspended at the Lucky Friday unit during all of 2012. Limited production resumed in early 2013 and has been at historical levels since September 2013. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, The Lucky Friday Segment for more information.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Overview

Established in 1891 in northern Idaho's Silver Valley, we believe we are the oldest still-operating precious metals mining company in the United States and the largest silver producer in the U.S. Our corporate offices are in Coeur d'Alene, Idaho and Vancouver, British Columbia. Our production profile includes:

- silver, gold, lead, and zinc contained in concentrates shipped to various smelters or sold to brokers; and
- doré containing gold and silver, which is further refined before sale of the metals to precious metal traders.

Our operating properties comprise our three business segments for financial reporting purposes: the Greens Creek operating unit on Admiralty Island in Alaska, the Lucky Friday operating unit in Idaho, and the Casa Berardi operating unit in Quebec, Canada. Since our operating mines are located in the U.S. and Canada, we believe they have low political risk, and less economic risk than mines located in other parts of the world. Our exploration interests are located in the United States, Canada, and Mexico, jurisdictions with low or relatively moderate political and economic risk, and are located in historically successful mining districts.

Our operating and strategic framework is based on expanding our production and locating and developing new resource potential. In 2014, we

- Reported record sales of products of \$500.8 million, which was a 31% increase from 2013.
- Achieved higher silver and gold production by 24% and 56%, respectively, compared to 2013. The higher silver production is due to realizing a full year of production at historical rates at Lucky Friday, and improved throughput and ore grades at Greens Creek. The increase in gold production is primarily the result of 2014 being our first full year of ownership of the Casa Berardi mine, which was obtained through the acquisition of Aurizon Mines Ltd. ("Aurizon") in June 2013.

- Generated \$83.1 million in net cash flows from operating activities, representing a 212% increase compared to 2013. The improvement was in spite of lower precious metals prices and the payment during 2014 of certain of our accrued reclamation and closure costs as discussed below.
- Reduced our liability for accrued reclamation and closure costs by \$47.9 million, primarily as a result of making the final payments totaling \$55.4 million, consisting primarily of proceeds from the exercise of our outstanding warrants, pursuant to the terms of settlement of the Coeur d'Alene Basin litigation.
- Committed a significant level of capital expenditures (including lease additions, capitalized interest, and other non-cash items) of approximately \$151.1 million, including \$52.2 million at Lucky Friday, \$48.6 million at Casa Berardi, and \$31.5 million at Greens Creek.
- Maintained a consistent level of overall proven and probable reserves at December 31, 2014, with silver reserves increasing by 2% and gold reserves decreasing by 1% compared to 2013 even with using lower price assumptions in 2014. The silver reserves as of December 31, 2014 represents the highest level in our history. The higher overall silver reserves is due to increases at both Lucky Friday and Greens Creek. The decrease in overall gold reserves is primarily the result of a slight decrease at Casa Berardi. See *Item 2. Property Descriptions* for additional information on proven and probable reserves at each of our operating units.
- Performed a significant level of exploration and pre-development activities during the year, drilling targets at our land packages in Alaska, Idaho, Quebec, and Mexico. We further advanced our pre-development project at the San Sebastian property in Mexico.
- Continued a scaling down of discretionary capital, exploration, and pre-development expenditures initiated in 2013 to address the recent reduction in metals prices.
- Achieved the above milestones while maintaining a cash balance of \$209.7 million as of December 31, 2014.

Silver and gold prices declined to annual averages of \$19.08 and \$1,266, respectively, for 2014, from average prices of \$23.83 for silver and \$1,410 for gold for 2013 and \$31.15 for silver and \$1,669 for gold in 2012. Average prices of lead in 2014 remained within 2% of their levels in 2013 and 2012, while the average prices of zinc in 2014 increased to \$0.98 from \$0.87 in 2013 and \$0.88 in 2012. Lead and zinc represent important by-products at our Greens Creek and Lucky Friday segments. The decrease in precious metals prices negatively impacted our operating results in spite of increased production of silver, gold, lead, and zinc in 2014 compared to 2013.

The factors driving metals prices are beyond our control and are difficult to predict. As noted above, prices have been highly volatile in the last three years and could be so in the future. Average prices in 2014 compared to those in 2013 and 2012 are illustrated in the *Results of Operations* section below. Moreover, the metal grades of ore mined are impacted by geology and mine planning efficiencies and operations, potentially creating constraints on metals produced. Ore transportation and smelting schedules also impact the timing of sales and final settlement.

See the *Results of Operations* section below for a discussion of the factors impacting income applicable to common stockholders for the three years ended December 31, 2014, 2013 and 2012.

### **Key Issues**

We intend to achieve our long-term strategy of increasing production and expanding our proven and probable reserves through development and exploration, as well as by future acquisitions. Our strategic plan requires that we manage several challenges and risks inherent in conducting mining, development, exploration and metal sales at multiple locations.

One such risk involves metals prices, over which we have no control except through derivative contracts. As discussed in the *Critical Accounting Estimates* section below, metals prices are influenced by a number of factors beyond our control. Average market prices of silver, gold, and lead in 2014 were lower than their levels in 2013, while zinc prices were higher, as illustrated by the table in Results of Operations below. While we believe current global economic and industrial trends could result in growing demand, prices have been volatile and there can be no assurance that current prices will continue.

On June 1, 2013, we completed the acquisition of all of the issued and outstanding common shares of Aurizon for total consideration of CAD\$740.8 million (US\$714.5 million). See *Note 15 of Notes to Consolidated Financial Statements* for more information. The acquisition gave us 100% ownership of the producing Casa Berardi gold mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada. As further discussed in *Item 7A. Quantitative and Qualitative Disclosures About Market Risk*, the acquisition has increased our exposure to risks associated with exchange fluctuations between the U.S. dollar and Canadian dollar. The acquisition was partially funded by \$490 million in net proceeds from our issuance of Senior Notes in April 2013 (see *Note 6 of Notes to Consolidated Financial Statements*). As discussed in the *Financial Liquidity and Capital Resources* section below, we believe that we will be able to meet the obligations associated with the acquisition of Aurizon and the related debt; however, a number of factors could impact our ability to meet the debt obligations and fund our other projects.

We make our strategic plans in the context of significant uncertainty about future operational capacity, which may impact new opportunities that require many years and substantial expenditures from discovery to production. We approach this challenge by investing in exploration and capital in districts with known mineralization. However, in an effort to address the recent decline in precious metals prices, we reduced our exploration and pre-development spending in 2014 and 2013 compared to the respective prior year, after significantly increasing our exploration and pre-development activity in 2012 compared to 2011.

As further discussed in the *Lucky Friday Segment* section below, we are in the process of constructing an internal shaft at the Lucky Friday mine ("#4 Shaft"), which, we believe, will significantly increase production and extend the life of the mine. The #4 Shaft project will involve significant additional capital costs during the periods leading up to its expected completion date in 2016. Although we believe that our current capital resources will allow us to complete the #4 Shaft project, there are a number of factors that could affect its completion.

Volatility in global financial markets poses a significant challenge to our ability to access credit and equity markets, should we need to do so, and to predict sales prices for our products. We utilize forward contracts to manage exposure to declines in the prices of silver, gold, zinc and lead contained in our concentrates that have been shipped but have not yet settled, and zinc and lead contained in our forecasted future concentrate shipments. In addition, we have in place a four-year \$100 million revolving credit agreement under which there were no borrowings during 2014 or as of the filing date of this report.

We strive to achieve excellent mine safety and health performance. We seek to implement this goal by: training employees in safe work practices; establishing, following and improving safety standards; investigating accidents, incidents and losses to avoid recurrence; involving employees in the establishment of safety standards; and participating in the National Mining Association's CORESafety program. We attempt to implement reasonable best practices with respect to mine safety and emergency preparedness. See the *Lucky Friday Segment* section below for information on accidents and other events that impacted operations at our Lucky Friday unit. We work with MSHA to address issues outlined in the investigations of these

incidents and continue to evaluate our safety practices.

Another challenge is the risk associated with environmental matters and ongoing reclamation activities. As described in *Risk Factors* and *Note 7 of Notes to Consolidated Financial Statements*, it is possible that our estimate of these liabilities (and our ability to estimate liabilities in general) may change in the future, affecting our strategic plans. We are involved in various environmental legal matters with no assurance that the estimate of our environmental liabilities, liquidity needs, or strategic plans will not be significantly impacted as a result of these matters or new matters that may arise. We strive to ensure that our activities are conducted in compliance with applicable laws and regulations and attempt to resolve environmental litigation on as favorable terms as possible.

Reserve estimation is a major risk inherent in mining. Our reserve estimates, which drive our mining and investment plans and many of our costs, may change based on economic factors and actual production experience. Until ore is mined and processed, the volumes and grades of our reserves must be considered as estimates. Our reserves are depleted as we mine. Reserves can also change as a result of changes in economic and operating assumptions.

As a result of industry-wide fatal accidents in recent years, primarily at underground coal mines, there has been an increase in mine regulation. In addition, under the Dodd-Frank Wall Street Reform and Consumer Protection Act, the SEC was directed to issue rules regarding the disclosure of mine safety data. Our ability to achieve and maintain compliance with MSHA regulations will be challenging and may increase our operating costs. See *Item 1A. Risk Factors – We face substantial governmental regulation and environmental risk*.

## Results of Operations

Sales of products by metal for the years ended December 31, 2014, 2013 and 2012 were as follows:

(in thousands)	Year Ended December 31,		
	2014	2013	2012
Silver	\$ 175,361	\$ 170,634	\$ 174,379
Gold	224,138	137,603	72,757
Lead	64,190	50,761	30,074
Zinc	96,154	74,683	91,998
Less: Smelter and refining charges	(59,062)	(51,092)	(48,065)
Sales of products	<u>\$ 500,781</u>	<u>\$ 382,589</u>	<u>\$ 321,143</u>

For the year ended December 31, 2014, we reported income applicable to common stockholders of \$17.3 million compared to a loss of \$25.7 million in 2013 and income of \$14.4 million in 2012. The following factors led to the results for the year ended December 31, 2014 compared to 2013 and 2012:

- Decreased average silver and gold prices in 2014 compared to 2013 and 2012, with average lead prices remaining substantially consistent and zinc prices higher in 2014 compared to the previous two years. These price variances are illustrated in the table below.

	Average price for the year ended December 31,		
	2014	2013	2012
Silver – London PM Fix (\$/ounce)	\$ 19.08	\$ 23.83	\$ 31.15
Realized price per ounce	18.46	21.28	32.11
Gold – London PM Fix (\$/ounce)	1,266	1,411	1,669
Realized price per ounce	1,262	1,317	1,687
Lead – LME Final Cash Buyer (\$/pound)	0.95	0.97	0.94
Realized price per pound	0.98	1.00	0.96
Zinc – LME Final Cash Buyer (\$/pound)	0.98	0.87	0.88
Realized price per pound	0.99	0.88	0.90

Average realized prices differ from average market prices primarily because concentrate sales are generally recorded as revenues at the time of shipment at forward prices for the estimated month of settlement, which differ from average market prices. Due to the time elapsed between shipment of concentrates and final settlement with customers, we must estimate the prices at which sales of our metals will be settled.

Previously recorded sales are adjusted to estimated settlement metal prices each period through final settlement. For 2014, we recorded net negative price adjustments to provisional settlements of \$2.3 million compared to net negative price adjustments to provisional settlements of \$17.0 million in 2013 and net negative price adjustments of \$3.8 million in 2012. The price adjustments related to zinc and lead contained in our concentrate shipments were largely offset by gains and losses on forward contracts for those metals for each year. For 2014 and 2013, the price adjustments related to silver and gold contained in our concentrate and doré sales were partially offset by gains and losses on forward contracts for those metals, as we began utilization of forward contracts for those metals in July 2013 (see *Note 10 of Notes to Consolidated Financial Statements* for more information). The gains and losses on these contracts are included in revenues and impact the realized prices for silver, gold, lead and zinc. Realized prices are calculated by dividing gross revenues for each metal (which include the price adjustments and gains and losses on the forward contracts discussed above) by the payable quantities of each metal included in concentrate and doré shipped during the period.

- Increased gross profit at our Lucky Friday unit of \$21.9 million in 2014 compared to a gross loss of \$4.9 million in 2013 and gross profit of \$0.2 million in 2012. In addition, at our Casa Berardi unit acquired in June 2013, we reported gross profit of \$17.8 million in 2014 versus gross profit of \$1.3 million in 2013. However, we reported decreased gross profit at our Greens Creek unit of \$45.5 million in 2014 compared to \$69.7 million in 2013 and \$143.3 million in 2012. See the *Greens Creek Segment*, *Lucky Friday Segment*, and *Casa Berardi Segment* sections below for further discussion of operating results.
- Costs related to the acquisition of Aurizon of \$26.4 million in 2013.
- Interest expense, net of amounts capitalized, of \$26.8 million in 2014 compared to \$21.7 million in 2013 and \$2.4 million in 2012. The increase

since 2012 is due to the issuance of Senior Notes in April 2013, with the net proceeds used to partially fund the acquisition of Aurizon, and additional issuances in 2014 to satisfy the funding requirements for one of our defined benefit pension plans (see Notes 6 and 16 of Notes to Consolidated Financial Statements).

- Increased general and administrative costs, which increased to \$31.5 million in 2014 from \$28.9 million in 2013 and \$21.3 million in 2012 due to increased incentive compensation and staffing.
- The temporary halt in production and suspension-related costs of \$25.3 million incurred at our Lucky Friday unit in 2012 related to maintenance of surface facilities and mine workings and refurbishing the mill in preparation for the return to production. See the *Lucky Friday Segment* section for more information on the temporary suspension of production during 2012.
- Net mark-to-market gains on base metal forward contracts of \$9.1 million in 2014 and \$18.0 million in 2013, and net losses of \$10.5 million in 2012. These gains and losses are related to financially-settled forward contracts on forecasted zinc and lead production as part of a risk management program. The gains in 2014 and 2013 resulted from decreases in zinc and lead prices during those periods, with the losses in 2012 due to increasing prices for those metals. We do not include silver and gold in this program.
- Exploration and pre-development expense decreased to \$19.7 million in 2014 from \$37.7 million in 2013, which represented a decrease from \$49.7 million in 2012. Despite spending less in 2014, our activity in 2014 included a continuation of extensive exploration work at our Greens Creek unit, on our land package near Durango, Mexico, in North Idaho's Coeur d'Alene Mining District near our Lucky Friday unit, and at the Casa Berardi mine and other projects on our land package in Quebec, Canada. "Pre-development expense" is defined as costs incurred in the exploration stage that may ultimately benefit production, such as underground ramp development, which are expensed due to the lack of proven and probable reserves. We advanced pre-development work at the San Sebastian property in Mexico during 2014. During 2012 and 2013, we also advanced pre-development projects at the Equity and Bulldog mines in the Creede district and at the Star mine in the Coeur d'Alene district which has given us access to historic workings and underground drill platforms.
- Reclassifications of \$2.4 million, \$3.0 million, and \$1.2 million in unrealized losses on certain marketable securities from other comprehensive income to current earnings in 2014, 2013 and 2012, respectively. The losses were recognized in current earnings in each period because the securities were deemed to be other than temporarily impaired.
- Provision for closed operations and environmental matters increased to \$10.1 million in 2014 from \$5.4 million in 2013 and \$4.7 million in 2012. The higher provision in 2014 was primarily the result of a \$5.6 million increase to the liability for the Johnny M site in New Mexico in the fourth quarter of 2014 (See Note 7 of Notes to Consolidated Financial Statements for more information).
- Net foreign exchange gain of \$11.5 million in 2014 compared to a gain of \$3.0 million in 2013 and a loss of \$0.1 million in 2012. The acquisition of Aurizon in 2013 resulted in increased exposure to exchange fluctuations between the U.S. dollar and Canadian dollar, and the U.S. dollar strengthened relative to the Canadian dollar during 2014.
- Income tax benefit of \$5.2 million in 2014 compared to an income tax benefit of \$9.8 million in 2013 and an income tax provision of \$8.9 million in 2012. The benefit in 2014, in spite of reporting income before income taxes of \$12.6 million for the year, is the result of book-versus-tax differences for certain items in Canada and the U.S. The benefit in 2013 is the result of reduced profits in that year. See *Corporate Matters* and Note 5 of Notes to Consolidated Financial Statements for more information.

## Greens Creek Segment

	Years Ended December 31,		
	2014	2013	2012
<b>Dollars are in thousands (except per ounce and per ton amounts)</b>			
Sales	\$ 245,175	263,263	320,895
Cost of sales and other direct production costs	(136,177)	(138,261)	(134,105)
Depreciation, depletion and amortization	(63,505)	(55,265)	(43,522)
Gross Profit	<u>\$ 45,493</u>	<u>\$ 69,737</u>	<u>\$ 143,268</u>
Tons of ore milled	816,213	805,322	789,569
Production:			
Silver (ounces)	7,826,341	7,448,347	6,394,235
Gold (ounces)	58,753	57,457	55,496
Zinc (tons)	59,810	57,614	64,249
Lead (tons)	20,151	20,114	21,074
Payable metal quantities sold:			
Silver (ounces)	6,434,739	6,675,459	5,430,252
Gold (ounces)	46,297	46,648	43,133
Zinc (tons)	42,744	39,806	50,895
Lead (tons)	15,526	17,056	15,733
Ore grades:			
Silver ounces per ton	13.24	13.04	11.13
Gold ounces per ton	0.12	0.12	0.12
Zinc percent	8.38	8.47	9.35
Lead percent	3.22	3.33	3.49
Mining cost per ton	\$ 69.45	\$ 68.43	\$ 64.05
Milling cost per ton	\$ 30.56	\$ 33.92	\$ 29.35
Cash Cost, After By-product Credits, Per Silver Ounce <sup>(1)</sup>	\$ 2.89	\$ 4.42	\$ 2.70

(1) A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found in *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

The \$24.2 million and \$97.8 million decreases in gross profit for 2014 compared to 2013 and 2012, respectively, were primarily the result of lower average prices for silver and gold, partially offset by higher zinc prices. Gross profit for 2014 compared to 2013 was also affected by the timing of sales, as less silver was sold in 2014 even though more silver was produced. Average prices for silver and gold for 2014 were lower than in 2013 by 20% and 10%, respectively, and lower than in 2012 by 39% and 24%, respectively. Average lead prices in 2014 were also lower compared to 2013, but were slightly higher compared to 2012.

Gross profit was also impacted by negative price adjustments to revenues of \$1.3 million in 2014 and \$16.5 million in 2013, and positive adjustments of \$3.5 million in 2012. Price adjustments to revenues result from changes in metals prices between transfer of title of concentrates to buyers and final settlements during the period, and are partially offset by gains and losses on forward contracts related to concentrates that have been shipped.

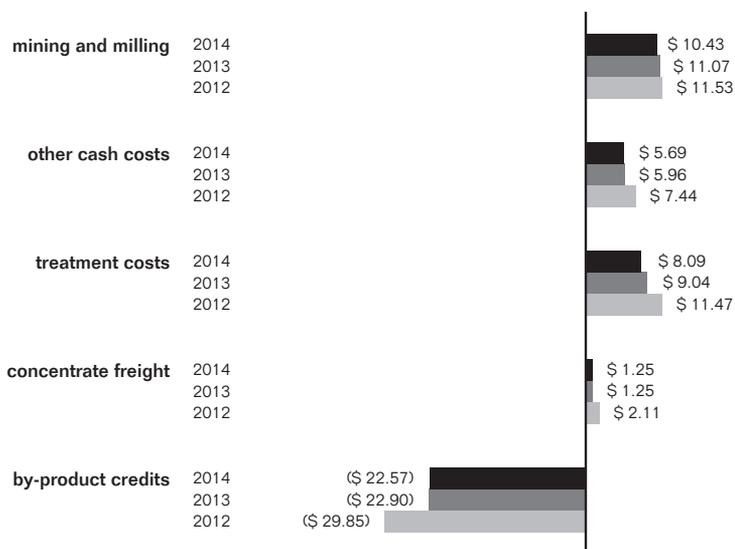

Depreciation, depletion and amortization expense was 15% and 46% more in 2014 compared to 2013 and 2012, respectively, due to increased assets in service and the effect on units-of-production depreciation of weaker silver prices relative to base metal prices.

The Greens Creek operation is partially powered by diesel generators, and production costs have historically been affected by fluctuations in fuel prices and hydroelectric power availability. Installed infrastructure allows hydroelectric power to be supplied to Greens Creek by Alaska Electric Light and Power (AEL&P) via a submarine cable from North Douglas Island, near Juneau, to Admiralty Island, where Greens Creek is located. This has reduced production costs at Greens Creek to the extent power has been available. In 2012, the mine began receiving an increased portion of its power needs from AEL&P. In 2013, due to lower precipitation levels and increased local demand, less hydroelectric power was available. However, during 2014, Greens Creek received 97.3% of its electricity from hydroelectric power from AEL&P due to higher precipitation levels in southeastern Alaska. When weather conditions are not favorable to maintain lake water levels, the mine relies on diesel generated power. Fuel costs were approximately \$5.5 million (5% of total production costs) at Greens Creek in 2014 compared to \$13.3 million (11% of production costs) in 2013 and \$6.8 million (6% of production costs) in 2012. The cost of hydroelectric power was \$7.2 million (6% of production costs) in 2014, \$4.7 million (4% of production costs) in 2013, and \$6.8 million (6% of production costs) in 2012.

Mining costs per ton increased in 2014 by 1% and 8% compared to 2013 and 2012, respectively. The higher mining costs were due primarily to higher cost of labor. Milling costs per ton decreased in 2014 by 10% and increased by 4% compared to 2013 and 2012, respectively. Milling costs were down in 2014 compared to 2013 because we generated less power on-site in 2014 due to an increased availability of less expensive hydroelectric power, resulting in lower diesel costs, as discussed above. The increase in milling costs in 2014 compared to 2012 is due to an increase in labor costs as a result of higher costs of medical and other benefits and higher salary costs.

The chart below illustrates the factors contributing to the variances in Cash Cost, After By-product Credits, Per Silver Ounce for 2014 compared to 2013 and 2012:

For the Year Ended December 31

	2014	2013	2012
Cash Cost, After By-product Credits, per Silver Ounce	\$ 2.89	\$ 4.42	\$ 2.70

The following table summarizes the components of Cash Cost, After By-product Credits, per Silver Ounce:

	Years Ended December 31,		
	2014	2013	2012
Cash Cost, Before By-product Credits, per Silver Ounce	\$ 25.46	\$ 27.32	\$ 32.55
By-product credits	(22.57)	(22.90)	(29.85)
Cash Cost, After By-product Credits, per Silver Ounce	\$ 2.89	\$ 4.42	\$ 2.70

The decrease in Cash Costs, After By-Product Credits, per Silver Ounce for 2014 compared to 2013 was the result of lower milling and treatment costs and the higher silver production. Cash Costs, After By-product Credits, per Silver Ounce were higher in 2014 compared to 2012 due to by-product credits per silver ounce that were lower by \$7.28.

Mining costs decreased in 2014 compared to 2013 and 2012 on a per-ounce basis, despite increasing on a per-ton basis as discussed above, due primarily to higher silver production resulting from improved silver grades. Milling costs decreased in 2014 compared to 2013 due to increased

availability of less expensive hydroelectric power. Milling costs decreased in 2014 compared to 2012 on a per-ounce basis, despite increasing on a per ton basis as discussed above, due to the impact of higher silver production.

Other costs for 2014 were lower compared to 2013 due to the effect of higher silver production, offset by higher mine license tax and higher labor costs. Other costs for 2014 compared to 2012 were lower due to the effect of higher silver production and lower mine license tax.

Treatment costs were lower in 2014 compared to 2013 as a result of reduced average lead and silver prices and higher silver production, partially offset by higher zinc prices. Treatment costs were lower in 2014 compared to 2012 as a result of reduced zinc and lead concentrate production and lower silver prices, partially offset by higher zinc and lead prices. For the calculation of Cash Costs, After By-Product Credits, per Silver Ounce, treatment costs include the value of silver not payable to us as part of the smelting process, and are therefore impacted by silver prices. Treatment costs also include a price adjustment component that fluctuates with changes in base metal prices.

By-product credits per ounce were lower in 2014 compared to 2013 and 2012 due to lower gold prices and higher silver production due to increased silver ore grades. The decrease in by-product credits in 2014 versus 2012 was also due to reduced zinc and lead production as a result of lower ore grades for those metals.

The difference between what we report as "production" and "payable metal quantities sold" is attributable to the difference between the quantities of metals contained in the concentrate we produce versus the portion of those metals actually payable by our customers according to the terms of the contracts. Differences can also arise from inventory changes incidental to shipping schedules. The differences in payable quantities sold for 2014 compared to 2013 and 2012 is due mainly to the timing of concentrate shipments.

While revenue from zinc, lead and gold by-products is significant, we believe that identification of silver as the primary product of the Greens Creek unit is appropriate because:

- silver has historically accounted for a higher proportion of revenue than any other metal and is expected to do so in the future;
- we have historically presented Greens Creek as a producer primarily of silver, based on the original analysis that justified putting the project into production, and believe that consistency in disclosure is important to our investors regardless of the relationships of metals prices and production from year to year;
- metallurgical treatment maximizes silver recovery;
- the deposit is a massive sulfide deposit containing an unusually high proportion of silver; and
- in most of its working areas, Greens Creek utilizes selective mining methods in which silver is the metal targeted for highest recovery.

Likewise, we believe the identification of gold, lead and zinc as by-product credits is appropriate because of their lower economic value compared to silver and due to the fact that silver is the primary product we intend to produce. In addition, we do not receive sufficient revenue from any single by-product metal to warrant classification of such as a co-product.

We periodically review our revenues to ensure that reporting of primary products and by-products is appropriate. Because we consider zinc, lead and gold to be by-products of our silver production, the values of these metals offset operating costs within our calculations of Cash Cost, After By-product Credits, per Silver Ounce.

In the fourth quarter of 2012, we updated our asset retirement obligation ("ARO") at Greens Creek to reflect a preliminary revised reclamation and closure plan having estimated undiscounted costs of approximately \$73.9 million, an increase from the \$53.4 million in the previous plan. In late 2013, a Record of Decision was completed for proposed expansion of tailings capacity. In addition, in early 2014 we were engaged in negotiations with the U.S. Forest Service and state agencies on their proposed revisions to our previously-submitted reclamation and closure plan. In 2014, we updated our ARO at Greens Creek to reflect a revised reclamation and closure plan having estimated undiscounted costs of approximately \$96.7 million, an increase from the \$73.9 million in the previous plan, which was primarily the result of a new requirement to include perpetual water treatment in the closure plan. This resulted in an increase to the ARO asset and liability of \$2.2 million after discounting the estimated costs to present value. As part of the revised closure plan, we increased our reclamation bonding from \$30 million to approximately \$68.9 million in 2014.

### The Lucky Friday Segment

<b>Dollars are in thousands (except per ounce and per ton amounts)</b>	<b>Years Ended December 31,</b>		
	<b>2014</b>	<b>2013</b>	<b>2012</b>
Sales	\$ 89,757	\$ 44,204	\$ 248
Cost of sales and other direct production costs	(58,423)	(41,230)	-
Depreciation, depletion and amortization	(9,431)	(7,833)	-
Gross profit (loss)	<u>\$ 21,903</u>	<u>\$ (4,859)</u>	<u>\$ 248</u>
Tons of ore milled	309,070	174,331	-
Production:			
Silver (ounces)	3,239,151	1,459,000	-
Lead (tons)	20,104	10,260	-
Zinc (tons)	8,159	3,793	-
Payable metal quantities sold:			
Silver (ounces)	3,039,697	1,328,340	-
Lead (tons)	17,105	8,377	-
Zinc (tons)	5,904	2,702	-
Ore grades:			
Silver ounces per ton	11.00	8.99	-
Lead percent	6.87	6.19	-
Zinc percent	2.93	2.69	-
Mining cost per ton	\$ 87.90	\$ 100.49	\$ -
Milling cost per ton	\$ 21.56	\$ 29.74	\$ -
Cash Cost, After By-product Credits, Per Silver Ounce <sup>(1)</sup>	\$ 9.44	\$ 19.21	\$ -

(1) A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found below in *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

The increase in gross profits for 2014 compared to 2013 resulted primarily from increased production and higher ore grades following the ramp up of production in 2013, as discussed below, partially offset by lower silver prices. The Lucky Friday segment reported no significant sales, cost of sales and direct production costs, depreciation, depletion, and amortization, or mine production for 2012 due to the suspension of production there for the year, as discussed below.

At the end of 2011, MSHA began a special impact inspection which resulted in an order to remove built-up cementitious material from the Silver Shaft. The Silver Shaft is an approximately one-mile deep, 18-foot diameter, concrete-lined shaft from surface. It is the primary access to the underground workings. In response to the MSHA order, we submitted a plan to MSHA and received approval to remove the built-up cementitious material, and that work commenced in the first quarter of 2012.

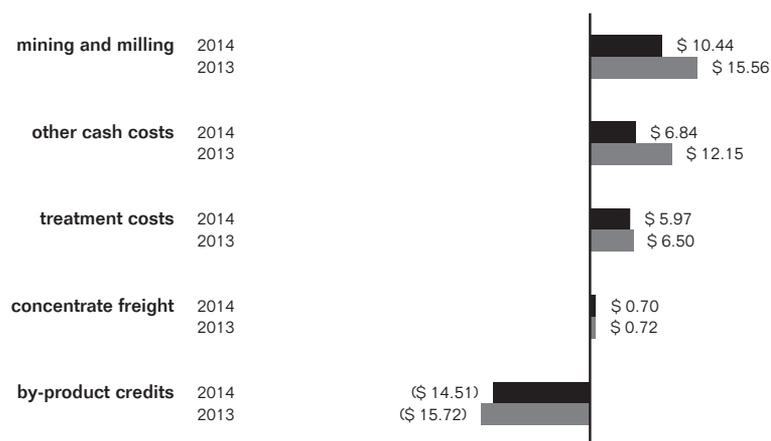

Production was suspended during all of 2012 as the Silver Shaft rehabilitation work was performed. During the suspension of production, the smelter contracts related to treatment of concentrates were suspended based on *force majeure*. The shaft restoration project and other related work was completed in early 2013, and limited production at the Lucky Friday recommenced in February 2013. During late September 2013, the mine reached its historical full throughput rate of approximately 900 tons per day, and daily throughput for the full year of 2014 averaged 847 tons. Once the Silver Shaft rehabilitation work was completed down to the 4900 foot level, we commenced construction of a haulage way bypass around an area impacted by a rock burst, and completed the bypass in early 2013. Completion of work on the Silver Shaft to the 4900 foot level also enabled planning and other preliminary work to resume on the #4 Shaft project (discussed below), and we resumed sinking of the #4 Shaft in early 2013 upon completion of the Silver Shaft work. Production and #4 Shaft advancement at Lucky Friday maintained historical levels during 2014.

In 2013, we recognized \$1.4 million in suspension-related income for business interruption insurance proceeds, and in 2012 we recognized suspension-related costs \$25.3 million. This activity is included in a separate line item under Other operating expenses on the *Consolidated Statement of Operations and Comprehensive Income (Loss)*, and is excluded from the calculations of Cash Cost, After By-product Credits, per Silver Ounce and mining and milling costs per ton.

The \$0.2 million in sales recognized in 2012 represents provisional price adjustments on prior-period concentrate shipments that were subject to changes in metals prices during the first quarter of 2012 until their final settlement.

The chart below illustrates the factors contributing to the variances in Cash Cost, After By-product Credits, Per Silver Ounce for 2014 and 2013:

**Year Ended December 31**

	2014	2013
Cash Cost, After By-product Credits, per Silver Ounce	\$ 9.44	\$ 19.21

The following table summarizes the components of Cash Cost, After By-product Credits, per Silver Ounce:

	Years Ended December 31,		
	2014	2013	2012
Cash Cost, Before By-product Credits, per Silver Ounce	23.95	34.93	-
By-product credits per silver ounce	(14.51)	(15.72)	-
Cash Cost, After By-product Credits, per Silver Ounce	\$ 9.44	\$ 19.21	\$ -

The decrease in Cash Cost, After By-product Credits, per Silver Ounce was the result of increased production in 2014, as we ramped up production during 2013 following the suspension period discussed above, and improved silver ore grades.

Mining and milling costs, other cash costs, and treatment costs per ounce decreased in 2014 compared to 2013 due to higher production and silver ore grades.

Per ounce by-product credits were lower in 2014 compared to 2013 primarily due to higher silver ore grades, partially offset by higher zinc prices.

Similar to the Greens Creek segment, the difference between what we report as "production" and "payable metal quantities sold" is due essentially to the difference between the quantities of metals contained in the concentrates we produce versus the portion of those metals actually payable by our customers according to the terms of the contracts.

While value from lead and zinc is significant, we believe that identification of silver as the primary product of the Lucky Friday unit is appropriate because:

- silver has historically accounted for a higher proportion of revenue than any other metal and is expected to do so in the future;
- this mining district is long associated with silver production; and
- selective mining methods target silver production.

Likewise, we believe the identification of lead and zinc as by-product credits is appropriate because of their low economic value compared to silver and due to the fact that silver is the primary product we intend to produce. In addition, we do not receive sufficient revenue from any single by-product metal to warrant classification of such as a co-product.

We periodically review our revenues to ensure that reporting of primary products and by-products is appropriate. Because we consider zinc and lead to be by-products of our silver production, the values of these metals offset operating costs within our calculations of Cash Cost, After By-product Credits, per Silver Ounce.

The #4 Shaft project involves constructing an internal shaft and related infrastructure at the Lucky Friday mine. Upon completion, #4 Shaft is expected to provide deeper access, which in turn should extend the mine's operational life and expand silver production. We commenced engineering and construction activities on the #4 Shaft in 2008, and our Board of Directors gave its final approval of the project in August 2011. Construction of the #4 Shaft as currently designed is expected to cost approximately \$215 million, including approximately \$165 million already spent as of December 31, 2014, with completion anticipated in 2016. As discussed above, the #4 Shaft sinking activities were temporarily suspended until rehabilitation work in the Silver Shaft was completed in early 2013. We believe that our current capital resources will allow us to complete the project. However, there are a number of factors that could affect completion of the project, including: (i) a significant decline in metals prices, (ii) a reduction in available cash or credit, whether arising from decreased cash flow or other uses of available cash, (iii) increased regulatory burden, (iv) a significant increase in operating or capital costs, or (v) a decision to access the shaft earlier.

Many of the employees at our Lucky Friday unit are represented by a union. The collective bargaining agreement with the union expires on April 30, 2016. As a result of the requirement to remove built-up cementitious material from the Silver Shaft, which limited underground access, Hecla Limited laid off 121 employees in January 2012, with approximately 25 of those employees accepting temporary positions at other Hecla operations. Employment at the Lucky Friday unit has returned to roughly its level in 2011.

In April 2013, the family of Larry Marek, an employee of Hecla Limited who was fatally injured in an April 2011 accident, filed a lawsuit against us and certain of our officers and employees seeking damages for, among other claims, wrongful death and infliction of emotional distress. Also, in December 2013, four employees of Hecla Limited who were injured in a December 2011 rock burst filed a lawsuit against us and certain of our employees seeking damages for, among other claims, intentional and willful injury and infliction of emotional distress. See the *Other Contingencies* section of *Note 7 of Notes to Consolidated Financial Statements for more information*.

### The Casa Berardi Segment

On June 1, 2013, we completed the acquisition of all of the issued and outstanding common shares of Aurizon Mines Ltd. ("Aurizon") for total consideration of CDN\$740.8 million (US\$714.5 million). The acquisition gave us 100% ownership of the producing Casa Berardi mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada. The results below reflect our ownership of assets previously held by Aurizon as of the June 1, 2013 acquisition date.

<b>Dollars are in thousands (except per ounce and per ton amounts)</b>	<b>Years Ended December 31,</b>	
	<b>2014</b>	<b>2013 <sup>(1)</sup></b>
Sales	\$ 165,849	\$ 75,122
Cost of sales and other direct production costs	(109,846)	(55,825)
Depreciation, depletion and amortization	(38,198)	(18,030)
Gross profit	<u>\$ 17,805</u>	<u>\$ 1,267</u>
Tons of ore milled	827,580	387,608
Production:		
Gold (ounces)	128,244	62,532
Silver (ounces)	25,014	12,381
Payable metal quantities sold:		
Gold (ounces)	131,287	57,840
Silver (ounces)	24,785	15,500
Ore grades:		
Gold ounces per ton	0.17	0.18
Silver ounces per ton	0.034	0.036
Mining cost per ton	\$ 103.53	\$ 127.56
Milling cost per ton	\$ 20.75	\$ 23.02
Cash Cost, After By-product Credits, per Gold Ounce <sup>(2)</sup>	\$ 826	\$ 951

(1) For the seven month period commencing on June 1, 2013, the date of the acquisition.

(2) A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found below in *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

Gross profit increased by \$16.5 million for 2014 compared to 2013, primarily due to our ownership during only a part of 2013, partially offset by lower gold prices. Tons of ore milled increased by 114% compared to the prior year, not only due to our ownership for the full year in 2014, but also higher daily throughput, as increased development activity in 2014 compared to 2013 has allowed mining operations to remove and process greater

quantities of ore. Average mill throughput achieved during 2014 reached 2,267 tons per day compared to 1,811 tons per day in 2013. Gold production during 2014 totaled 128,244 ounces, a 105% increase compared to 62,532 ounces produced under our ownership in 2013.

On a per unit basis, mining costs per ton of \$103.53 for 2014 were 19% lower than 2013 mining costs per ton of \$127.56. The decrease is primarily due to higher ore production and foreign exchange differences between the two periods, as the U.S. dollar was stronger relative to the Canadian dollar in 2014 than it was in 2013. This is partially offset by higher stope preparation costs in the first quarter of 2014 resulting from increased development in the production stopes.

Milling unit costs decreased by 10% in 2014 compared to 2013 mainly due to higher ore production and exchange rate differences.

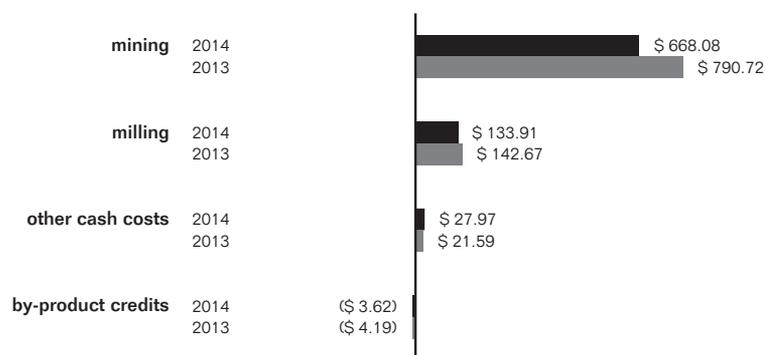

Sales during 2014 totaled \$165.8 million compared to \$75.1 million in 2013. The increase in 2014, in spite of lower gold prices, is a result of our ownership during only a part of 2013 and improved throughput. Our average realized sale price per ounce of gold during 2014 was \$1,263 compared to \$1,293 for the period of our ownership of Casa Berardi during 2013. The average market price per ounce for the full years of 2014 and 2013, respectively, was \$1,266 and \$1,411.

In June of 2014, we successfully modified the type of financial guarantee for reclamation work required by the Quebec Mining Act from restricted cash deposits to a letter of credit. This allowed the release of formerly restricted cash totaling \$7.5 million.

The West Mine shaft underwent a deepening project, which included construction of loading pockets and other related infrastructure. The deepened shaft reached functional completion during the third quarter of 2014 with the removal of the bulkhead dividing the operating shaft and the deepened section. This changeover required the shaft to be intermittently closed over a 22 day period which impacted production for the quarter. Other recent mine enhancements include a new paste backfill facility and a concrete plant, which we believe should improve operational efficiency. In addition, a new dry house facility was completed in March 2014 at the West Mine, which will provide greater flexibility and efficiency for the underground miners, as this facility is located much closer to the main mine access than the prior facility.

The chart below illustrates the factors contributing to Cash Cost, After By-product Credits, Per Gold Ounce for 2014 and 2013:

**Year to Date December 31**

	2014	2013
Cash Cost, After By-product Credits, per Gold Ounce	\$ 826.35	\$ 950.79

The following table summarizes the components of Cash Cost, After By-product Credits, per Gold Ounce:

	Year Ended December 31,	
	2014	2013
Cash Cost, Before By-product Credits, per Gold Ounce	\$ 829.97	\$ 954.98
By-product credits	(3.62)	(4.19)
Cash Cost, After By-product Credits, per Gold Ounce	\$ 826.35	\$ 950.79

The decrease in Cash Cost, After By-product Credits, per Gold Ounce for 2014 compared to 2013 was primarily the result of higher gold production due to increased ore throughput.

Mining and milling cost per ounce decreased in 2014 compared to 2013 due to higher gold production and foreign exchange differences.

The difference between what we report as "production" and "payable metal quantities sold" is mainly attributable inventory changes incidental to the timing of sales of refined metals and shipping schedules.

We believe the identification of silver as a by-product credit is appropriate at Casa Berardi because of its lower economic value compared to gold and due to the fact that gold is the primary product we intend to produce there. In addition, we do not receive sufficient revenue from silver at Casa Berardi to warrant classification of such as a co-product. Because we consider silver to be a by-product of our gold production at Casa Berardi, the value of silver offsets operating costs within our calculations of Cash Cost, After By-product Credits, per Gold Ounce.

## Corporate Matters

### Employee Benefit Plans

Our defined benefit pension plans, while affording a significant benefit to our employees, also represent a significant liability. During 2014, the funded status of our plans changed from a liability of \$32.1 million at the first of the year to a liability of \$43.7 million at the end of the year. The increased liability was attributable to service costs, interest costs, and amortization of actuarial losses that, collectively, exceeded returns on plan assets and our contributions. We made contributions of \$6.5 million aggregate principal amount of our Notes during 2014. In January 2015, we contributed approximately \$4.9 million in shares of our common stock to our defined benefit plans, with no additional contributions anticipated in 2015. See Note 6 of Notes to Consolidated Financial Statements for more information. While the economic variables which will determine future cash requirements

are uncertain, we expect contributions to increase in future years under current plan provisions, and we periodically examine the plans for affordability and competitiveness.

Effective July 1, 2013, we amended our pension plan. See Note 8 of Notes to Consolidated Financial Statements for more information.

### Income Taxes

We continue to have a net deferred tax asset in the U.S., and as a result of our acquisition of Aurizon, a net deferred tax liability in Canada. Our U.S. net deferred tax asset at December 31, 2014 totaled \$111.0 million, or 5% of total assets, a decrease of \$3.5 million from the \$114.5 million net deferred tax asset at December 31, 2013. The largest component of the deferred tax asset is net operating loss carryforwards which are available to be applied against future taxable income. The next largest component is deferred exploration expense. Each reporting period we assess our deferred tax assets utilizing long-range forecasts to provide reasonable assurance that they will be realized through future earnings. At December 31, 2014, we retained a valuation allowance on U.S. deferred tax assets of \$6.0 million, primarily for foreign tax credits. A \$26.1 million valuation allowance remains on deferred tax assets in foreign jurisdictions.

Our net Canadian deferred tax liability at December 31, 2014 and 2013 was \$153.4 million, a decrease of \$12.5 million from the \$165.9 million net deferred tax liability at December 31, 2013. The deferred tax liability is the result of the acquisition of Aurizon completed on June 1, 2013. See Note 15 of Notes to Consolidated Financial Statements for more information. The deferred tax liability is primarily related to the excess of the fair market value of the assets acquired over the tax bases of those assets for Canadian tax reporting, with the majority of that value allocated to mineral resources and reserves.

As discussed in Note 5 of Notes to Consolidated Financial Statements, our effective tax rate for 2014 was negative 42% compared to 28% for 2013. The change in effective tax rate for 2014 was primarily the result of the U.S. deduction for percentage depletion, non-deductible transaction costs, and the impact of taxation in foreign jurisdictions, the impacts of which were amplified by relatively low worldwide pre-tax book income. We are subject to income taxes in the United States and other foreign jurisdictions. The overall effective tax rate will continue to be dependent upon the geographic distribution of our earnings in different jurisdictions, the U.S. deduction for percentage depletion, and fluctuation in foreign currency exchange rates. As a result, the 2015 effective tax rate could vary significantly from that of 2014.

For the years 2014, 2013 and 2012, we had no unremitted foreign earnings. See Note 5 of Notes to Consolidated Financial Statements for more information.

### Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)

The tables below present reconciliations between the non-GAAP measures of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits to the GAAP measure of cost of sales and other direct production costs and depreciation, depletion and amortization for our operations at the Greens Creek, Lucky Friday, and Casa Berardi units for the years ended December 31, 2014, 2013 and 2012.

Cash Cost, After By-product Credits is an important operating statistic that we utilize to measure each mine's operating performance. It also allows us to benchmark the performance of each of our mines versus those of our competitors. As a primary silver mining company, we also use the statistic on an aggregate basis – aggregating the Greens Creek and Lucky Friday mines, but not Casa Berardi, which is a primary gold mine – to compare our performance with that of other primary silver mining companies. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics.

Cash Cost, Before By-product Credits includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining expense, on-site general and administrative costs, royalties and mining production taxes. By-product credits include revenues earned from all metals other than the primary metal produced at each unit. Cash Cost, After By-product Credits, per Ounce, provides management and investors an indication of operating cash flow, after consideration of the average price received from production. Management also uses this measurement for the comparative monitoring of performance of our mining operations period-to-period from a cash flow perspective. Cash Cost, After By-product Credits, per Ounce is a measure developed by precious metals companies (including the Silver Institute) in an effort to provide a uniform standard for comparison purposes. There can be no assurance, however, that our reporting of this non-GAAP measure is the same as that reported by other mining companies.

The Casa Berardi section below reports Cash Cost, After By-product Credits, per Gold Ounce for the production of gold, its primary product, and by-product revenues earned from silver, which is a by-product at Casa Berardi. Only costs and ounces produced relating to units with the same primary product are combined to represent Cash Cost, After By-product Credits, per Ounce. Thus, the gold produced at our Casa Berardi unit is not included as a by-product credit when calculating Cash Cost, After By-product Credits, per Silver Ounce for the total of Greens Creek and Lucky Friday, our combined silver properties.

As depicted in the Greens Creek Unit and the Lucky Friday Unit tables below, by-product credits comprise an essential element of our silver unit cost structure distinguishing our silver operations due to the polymetallic nature of their orebodies. By-product credits included in our presentation of Cash Cost, After By-product Credits, per Silver Ounce include:

In thousands (except per ounce amounts)	Total, Greens Creek and Lucky Friday Units		
	Year ended December 31,		
	2014	2013	2012
By-product value, all silver properties:			
Zinc	\$ 95,701	\$ 77,616	\$ 84,087
Gold	61,871	66,907	75,860
Lead	66,082	48,973	30,969
Total by-product credits	<u>\$ 223,654</u>	<u>\$ 193,496</u>	<u>\$ 190,916</u>

In thousands (except per ounce amounts)	Total, Greens Creek and Lucky Friday Units		
	Year ended December 31,		
	2014	2013	2012
By-product credits per silver ounce, all silver properties			
Zinc	\$ 8.65	\$ 8.71	\$ 13.15
Gold	5.59	7.51	11.86
Lead	5.97	5.50	4.85
Total by-product credits	<u>\$ 20.21</u>	<u>\$ 21.72</u>	<u>\$ 29.86</u>

By-product credits included in our presentation of Cash Cost, After By-product Credits, per Gold Ounce for our Casa Berardi Unit include:

In thousands (except per ounce amounts)	Casa Berardi Unit (3)	
	Year ended December 31,	
	2014	2013
Silver by-product value	\$ 464	\$ 262
Silver by-product credits per gold ounce	\$ 3.62	\$ 4.19

Cost of sales and other direct production costs and depreciation, depletion and amortization is the most comparable financial measure calculated in accordance with GAAP to Cash Cost, After By-product Credits. The sum of the cost of sales and other direct production costs and depreciation, depletion and amortization for our operating units in the tables below is presented in our *Consolidated Statement of Operations and Comprehensive Income (Loss)*.

In thousands (except per ounce amounts)	Total, Greens Creek and Lucky Friday Units		
	Year ended December 31,		
	2014	2013	2012
Cash Cost, Before By-product Credits <sup>(1)</sup>	\$ 276,842	\$ 254,460	\$ 208,178
By-product credits	(223,654)	(193,496)	(190,916)
Cash Cost, After By-product Credits	53,188	60,964	17,262
Divided by silver ounces produced	11,065	8,907	6,394
Cash Cost, Before By-product Credits, per Silver Ounce	25.02	28.56	32.55
By-product credits per silver ounce	(20.21)	(21.72)	(29.85)
Cash Cost, After By-product Credits, per Silver Ounce	<u>\$ 4.81</u>	<u>\$ 6.84</u>	<u>\$ 2.70</u>
Reconciliation to GAAP:			
Cash Cost, After By-product Credits	\$ 53,188	\$ 60,964	\$ 17,262

Change in product inventory	1,502	(4,012)	(1,381)
Suspension-related costs	–	–	–
Reclamation and other costs	2,867	2,242	663
Cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	\$ 415,580	\$ 316,443	\$ 177,627

(1) Includes all direct and indirect operating costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, after by-product revenues earned from all metals other than the primary metal produced at each unit.

(2) Various accidents and other events resulted in temporary suspensions of production at the Lucky Friday unit during 2011 and throughout 2012. See the *Lucky Friday Segment* section for further discussion. As a result, Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits, Per Silver Ounce are not presented for 2012. Care-and-maintenance, mine rehabilitation, investigation, and other costs incurred during the suspension periods not related to production have been excluded from Cash Cost, Before By-product Credits and the calculation of Cash Cost, After By-product Credits, Per Silver Ounce produced.

(3) On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd., which gave us 100% ownership of the Casa Berardi mine in Quebec, Canada. The information presented reflects our ownership of Casa Berardi commencing as of that date. See *Note 15 of Notes to Consolidated Financial Statements* for more information. The primary metal produced at Casa Berardi is gold, with a by-product credit for the value of silver production.

### Reconciliation of Earnings Before Interest, Taxes, Depreciation, and Amortization (non-GAAP) to Net Income (Loss) (GAAP)

The non-GAAP measure of earnings before interest, taxes, depreciation, and amortization ("EBITDA") is calculated as net income (loss) before the following items: interest expense, income tax provision (benefit), and depreciation, depletion, and amortization expense. Management believes that, when presented in conjunction with comparable GAAP measures, EBITDA is useful to investors in evaluating our operating performance. The table

below presents reconciliations between the non-GAAP measure EBITDA to the GAAP measure of net income (loss) for the years ended December 31, 2014, 2013, 2012, 2011, and 2010 (in thousands).

	Year ended December 31,				
	2014	2013	2012	2011	2010
Net income (loss) (GAAP)	\$ 17,824	\$ (25,130)	\$ 14,954	\$ 151,164	\$ 48,983
Interest expense, net of amount capitalized <sup>(1)</sup>	26,775	21,689	2,427	2,875	2,211
Income tax provision (benefit)	(5,240)	(9,795)	8,879	81,978	(123,532)
Depreciation, depletion, and amortization	112,173	82,366	50,113	47,348	60,235
EBITDA	<u>\$ 151,532</u>	<u>\$ 69,130</u>	<u>\$ 76,373</u>	<u>\$ 283,365</u>	<u>\$ (12,103)</u>

(1) On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 (the "Notes"), and issued additional Notes in 2014 to fund one of our defined benefit pension plans. See Note 6 of Notes to Consolidated Financial Statements for more information. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013.

## Financial Liquidity and Capital Resources

Our liquid assets include (in millions):	Year ended December 31,		
	2014	2013	2012
Cash and cash equivalents held in U.S. dollars	\$ 180.9	\$ 166.5	\$ 190.6
Cash and cash equivalents held in foreign currency	28.8	45.7	0.4
Total cash and cash equivalents	<u>209.7</u>	<u>212.2</u>	<u>191.0</u>
Marketable equity securities, non-current	4.9	7.0	9.6
Total cash, cash equivalents and investments	<u>\$ 214.6</u>	<u>\$ 219.2</u>	<u>\$ 200.6</u>

Cash and cash equivalents increased in 2014, as discussed below. Cash held in foreign currencies represent balances in Canadian dollars and Mexican pesos, with the \$16.9 million decrease in 2014 resulting primarily from a reduction in Canadian dollars held. The value of non-current marketable equity securities decreased by \$2.1 million due to unrecognized losses on equity investments, partially offset by the purchase of investments for approximately \$0.6 million.

As further discussed in Note 15 of Notes to Consolidated Financial Statements, on June 1, 2013, we completed the acquisition of Aurizon Mines Ltd. for total consideration of US\$714.5 million (CAD\$740.8 million), comprised of cash paid by Hecla of US\$496.2 million (CAD\$514.5 million) and issuance of 56,997,790 shares of Hecla common stock valued at US\$218.3 million (CAD\$226.3). Aurizon's cash and cash equivalents balances at the close of the acquisition totaling approximately US\$177.6 million were transferred to us as part of the acquisition.

On April 12, 2013, we completed an offering of Notes in the total principal amount of US\$500 million, as discussed in Note 6 of Notes to Consolidated Financial Statements. The net proceeds of \$490 million from the offering of the Notes were used to partially fund the acquisition of Aurizon, as discussed above, and for general corporate purposes, including expenses related to the Aurizon acquisition. In addition, on April 14, 2014, we entered into an agreement with the Hecla Mining Company Retirement Plan Trust pursuant to which we contributed \$6.5 million in aggregate principal amount of the Notes in order to satisfy the funding requirement for one of our defined benefit pension plans for 2014. The Notes are due May 1, 2021 and bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013.

In 2011, we settled Hecla Limited's Coeur d'Alene Basin environmental litigation and related claims pursuant to a Consent Decree entered by the Court on September 8, 2011. Payments of approximately \$168 million, \$25 million, and \$15 million (and related interest) were made in October 2011, 2012, and 2013, respectively. In addition, a payment of approximately \$14.1 million in proceeds from warrants exercised during the second quarter of 2014 was made in July 2014. Finally, a payment of approximately \$41.3 million, consisting primarily of proceeds from the exercise of the remaining outstanding warrants, was made in August 2014, which satisfied Hecla Limited's remaining obligation under the Consent Decree.

The #4 Shaft project, which is discussed further in the *Lucky Friday Segment* section above, is expected to involve capital expenditures of approximately \$215 million through 2016, of which \$165 million has been spent as of December 31, 2014 (leaving approximately \$50 million remaining).

Pursuant to our common stock dividend policy described in Note 9 of Notes to Consolidated Financial Statements, our Board of Directors declared and paid dividends on common stock totaling \$3.5 million in 2014, \$6.0 million in 2013, and \$17.1 million in 2012. Our dividend policy has a silver-price-linked component which ties the amount of declared dividends on common stock to our realized silver price for the preceding quarter (subject to a minimum threshold). Another component of our common stock dividend policy anticipates paying an annual minimum dividend. The declaration and payment of dividends on common stock is at the sole discretion of our board of directors, and there can be no assurance that we will continue to declare and pay common stock dividends in the future.

On March 3, 2014, the Board of Directors issued 1,345,072 shares of restricted stock to employees in payment of approximately \$4.6 million in annual and long-term incentive compensation for the period ended December 31, 2013.

On May 8, 2012, we announced that our board of directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions, depending on prevailing market conditions and other factors. The repurchase program may be modified, suspended or discontinued by us at any time. Whether or not we engage in repurchases from time to time may depend on a variety of factors, including not only price and cash resources, but customary black-out restrictions, whether we have any material inside information, limitations on share repurchases or cash usage that may be imposed by our credit agreement or in connection with issuances of securities, alternative uses for cash, applicable law, and other investment opportunities from time to time. As of December 31, 2014, 934,100 shares have been purchased at an average price of \$3.99 per share, leaving approximately 19.1 million shares that may yet be purchased under the program. The closing price of our common stock at February 16, 2015, was \$3.42 per share.

We may defer some capital investment and/or exploration and pre-development activities, engage in asset sales or secure additional capital if necessary to maintain liquidity. We also may pursue additional acquisition opportunities, which could require additional equity issuances or financing. There can be no assurances that such financing will be available to us.

As a result of our current cash balances, the performance of our current operations, current metals prices, and full availability of our \$100 million revolving credit agreement, we believe our cash, cash equivalents, investments, projected cash from operations, and availability of financing (including equity issuances) if needed will be adequate to meet our obligations during the next 12 months. These obligations include, but are not limited to: debt service obligations related to the Notes, capital outlays for the #4 Shaft project and other capital expenditures, potential repurchases of our common stock under the program described above, and payment of dividends on common stock, if declared by our board of directors. We currently estimate that a total of approximately \$145 million will be spent on capital expenditures, primarily for equipment, infrastructure, and development at our mines, in 2015. We also estimate that exploration and pre-development expenditures will total approximately \$18 million in 2015. However, capital, exploration, and pre-development expenditures may change based upon our financial position, metals prices, and other considerations. Our ability to fund the activities described above will depend on our operating performance, metals prices, our ability to estimate costs, sources of liquidity available to us, and other factors. A sustained downturn in metals prices or significant increase in operational or capital costs, other uses of cash, or other factors beyond our control could impact our plans.

	Year Ended December 31,		
	2014	2013	2012
Cash provided by operating activities (in millions)	\$ 83.1	\$ 26.6	\$ 69.0

Cash provided by operating activities increased by \$56.5 million in 2014 compared to 2013 primarily due to higher income, as adjusted for non-cash items. As discussed in *Results of Operations* above, the higher income is primarily attributable to improved gross profit at the Lucky Friday and Casa Berardi units in 2014 and costs incurred in 2013 for the acquisition of Aurizon. Working capital and other operating asset and liability changes resulted in a net cash flow decrease of \$51.1 million compared to a decrease in cash flows of \$33.1 million in 2013. Significant variances in working capital changes between 2014 to 2013 included payments of approximately \$55.4 million in the third quarter of 2014 to satisfy the remaining obligation under the Coeur d'Alene Basin environmental litigation settlement, primarily with proceeds from the exercise of warrants to purchase our common stock, as discussed above, and lower accounts payable balances due to reduced capital, exploration, and pre-development spending at the end of 2014. These variances were partially offset by lower cash requirements for accrued payroll and related benefits during 2014 due to the payment of incentive compensation and 401(k) employer contributions in shares of our common stock, higher incentive compensation accruals, and lower inventory and accounts receivable balances due to the timing of sales at Greens Creek and Casa Berardi.

Cash provided by operating activities decreased by \$42.4 million in 2013 compared to 2012 primarily due to lower income, as adjusted for non-cash items. As discussed in *Results of Operations* above, the lower income is primarily attributable to lower precious metals prices, costs related to the acquisition of Aurizon, and interest expense related to the Senior Notes issued in April 2013. Working capital and other operating asset and liability changes resulted in a net cash flow decrease of \$33.1 million compared to a decrease in cash flows of \$34.1 million in 2012. Significant variances in working capital changes when comparing 2013 to 2012 included lower accounts payable balances due to reduced capital, exploration, and pre-development spending at the end of 2013, decreases in accrued taxes due to lower pre-tax income, as discussed above, and higher inventories primarily due to the timing of shipments at Greens Creek, partially offset by small reductions of accrued reclamation and closure cost liabilities.

	Year Ended December 31,		
	2014	2013	2012
Cash used in investing activities (in millions)	\$ 118.4	\$ 475.5	\$ 118.0

Capital expenditures were \$122.5 million in 2014, excluding non-cash lease additions of \$9.5 million, which was \$28.2 million lower than capital additions in 2013 when excluding the cash outflow for the acquisition of Aurizon. The decrease was primarily the result of reduced mine development and equipment purchases at Greens Creek and lower development, equipment, and infrastructure costs at Casa Berardi. During 2014, restricted investments related to reclamation bonding at the Casa Berardi unit decreased by \$4.3 million, with no change to our restricted cash balances during 2013. We purchased marketable securities having a cost basis of \$0.6 million and \$6.0 million during 2014 and 2013, respectively.

In 2013, we recognized a cash outflow for the acquisition of Aurizon, net of cash acquired, of \$321.1 million, as discussed above. We also invested \$150.7 million in capital expenditures in 2013, excluding \$12.3 million in non-cash capital lease additions, compared to \$113.1 million, excluding \$13.1 million in capital leases, in 2012. The increase in capital expenditures was primarily due to the addition of the Casa Berardi unit, where we incurred capital expenditures of approximately \$40.0 million following its acquisition. In addition to purchasing investments for \$6.0 million in 2013, we sold investments having a cost basis of \$1.6 million for proceeds of \$1.8 million. We acquired securities for approximately \$5.8 million in 2012, and acquired the Monte Cristo property in Nevada for approximately \$4.5 million in July 2012.

	Year Ended December 31,		
	2014	2013	2012
Cash provided by (used in) financing activities (in millions)	\$ 36.5	\$ 474.9	\$ (26.5)

We received \$54.4 million in proceeds from the exercise of warrants during 2014, as discussed above. In 2013, we received proceeds from the issuance of the Senior Notes, net of initial purchaser discount, of \$490.0 million, and incurred fees of \$1.5 million related to the issuance of the notes. During 2014, 2013, and 2012, we paid cash dividends on our common stock totaling \$3.5 million, \$6.0 million, and \$17.1 million, respectively. We also paid cash dividends of \$0.6 million on our Series B preferred stock during each of those years. We made payments on our capital leases of \$9.1 million, \$7.0 million, and \$5.9 million, in 2014, 2013, and 2012, respectively. We also purchased shares of our common stock for \$3.7 million, \$0.3 million, and \$2.1 million in 2014, 2013, and 2012, respectively, with \$1.5 million and \$1.9 million of the amounts in 2014 and 2012, respectively, related to our stock repurchase program discussed above.

## Contractual Obligations and Contingent Liabilities and Commitments

The table below presents our fixed, non-cancelable contractual obligations and commitments primarily related to our outstanding purchase orders, certain capital expenditures, our credit facility, and lease arrangements as of December 31, 2014 (in thousands):

	Payments Due By Period				
	Less than			After	
	1 year	1-3 years	3-5 years	5 years	Total
Purchase obligations <sup>(1)</sup>	\$ 6,812	\$ –	\$ –	\$ –	\$ 6,812
Commitment fees <sup>(2)</sup>	500	1,000	442	–	1,942
Contractual obligations <sup>(3)</sup>	1,821	1,349	–	–	3,170
Capital lease commitments <sup>(4)</sup>	10,266	11,738	1,782	–	23,786
Operating lease commitments <sup>(5)</sup>	3,456	6,326	1,934	2,081	13,797
Defined benefit pension plans <sup>(6)</sup>	4,863	–	–	–	4,863
Supplemental executive retirement plan <sup>(6)</sup>	385	832	978	4,112	6,307
Senior Notes <sup>(7)</sup>	34,822	69,644	69,644	552,929	727,039
Total contractual cash obligations	\$ 62,925	\$ 90,889	\$ 74,780	\$ 559,122	\$ 787,716

(1) Consist of open purchase orders of approximately \$2.2 million at the Greens Creek unit, \$3.6 million at the Lucky Friday unit and \$1.1 million at the Casa Berardi unit. Included in these amounts are approximately \$1.4 million, \$2.4 million, and \$0.7 million related to various capital projects at the Greens Creek, Lucky Friday and Casa Berardi units, respectively.

(2) We have a \$100 million revolving credit agreement under which we are required to pay a standby fee of 0.5% per annum on undrawn amounts under the revolving credit agreement. This agreement was extended in 2014 until November 18, 2018. There was no amount drawn under the revolving credit agreement as of December 31, 2014, and the amounts above assume no amounts will be drawn during the agreement's term. For more information on our credit facility, see *Note 6 of Notes to Consolidated Financial Statements*.

(3) As of December 31, 2014, we were committed to approximately \$3.2 million in expenditures for various non-capital items at our operating units.

(4) Includes scheduled capital lease payments of \$15.7 million, \$4.4 million and \$3.6 million (including interest), respectively, for equipment at our Greens Creek, Lucky Friday and Casa Berardi units. These leases have fixed payment terms and contain bargain purchase options at the end of the lease periods. See *Note 6 of Notes to Consolidated Financial Statements* for more information.

(5) We enter into operating leases in the normal course of business. Substantially all lease agreements have fixed payment terms based on the passage of time. Some lease agreements provide us with the option to renew the lease or purchase the leased property. Our future operating lease obligations would change if we exercised these renewal options and if we entered into additional operating lease arrangements.

(6) We sponsor defined benefit pension plans covering substantially all U.S. employees and provide certain post-retirement benefits for qualifying retired employees, along with a supplemental executive retirement plan. These amounts represent our estimate of the future funding requirements for these plans. We believe we will have funding requirements related to our defined benefit plans beyond one year; however, such obligations are not fixed in nature and are difficult to estimate, as they involve significant assumptions. See *Note 8 of Notes to Consolidated Financial Statements* for more information.

(7) On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 (the "Notes"). See *Note 6 of Notes to Consolidated Financial Statements* for more information. Additionally, during 2014 we issued \$6.5 million of additional Notes to fund the 2014 funding requirement of one of our defined benefit pension plan. See *Note 8 of Notes to Consolidated Financial Statements* for more information. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013.

We record liabilities for costs associated with mine closure, reclamation of land and other environmental matters. At December 31, 2014, our liabilities for these matters totaled \$57.3 million. Future expenditures related to closure, reclamation and environmental expenditures at our other sites are difficult to estimate, although we anticipate we will incur expenditures relating to these obligations over the next 30 years. For additional information relating to our environmental obligations, see *Note 4 of Notes to Consolidated Financial Statements*.

## Off-Balance Sheet Arrangements

At December 31, 2014, we had no existing off-balance sheet arrangements, as defined under SEC regulations, that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

## Critical Accounting Estimates

Our significant accounting policies are described in *Note 1 of Notes to Consolidated Financial Statements*. As described in *Note 1*, we are required to make estimates and assumptions that affect the reported amounts and related disclosures of assets, liabilities, revenue, and expenses. Our estimates are based on our experience and our interpretation of economic, political, regulatory, and other factors that affect our business prospects. Actual results may differ significantly from our estimates.

We believe that our most critical accounting estimates are related to future metals prices; obligations for environmental, reclamation, and closure matters; mineral reserves; and accounting for business combinations, as they require us to make assumptions that were highly uncertain at the time the accounting estimates were made and changes in them are reasonably likely to occur from period to period. Management has discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors, and the Audit Committee has reviewed the disclosures presented below. In addition, there are other items within our financial statements that require estimation, but are not deemed to be critical. However, changes in estimates used in these and other items could have a material impact on our financial statements.

## Future Metals Prices

Metals prices are key components in estimates that determine the valuation of some of our significant assets and liabilities, including properties, plants and equipment, deferred tax assets, and certain accounts receivable. Metals prices are also an important component in the estimation of reserves. As shown under *Item 1A. – Risk Factors*, metals prices have historically been volatile. Silver demand arises from investment demand, particularly in exchange-traded funds, industrial demand, and consumer demand. Gold demand arises primarily from investment and consumer demand. Investment demand for silver and gold is influenced by various factors, including: the value of the U.S. Dollar and other currencies, changing U.S. budget deficits, widening availability of exchange-traded funds, interest rate levels, the health of credit markets, and inflationary expectations. Uncertainty concerning a global economic recovery could result in continued investment demand for precious metals. Industrial demand for silver is closely linked to world Gross Domestic Product growth, and industrial fabrication levels, as it is difficult to substitute for silver in industrial fabrication. Consumer demand is driven significantly by demand for jewelry and similar retail products. We believe that industrial and economic trends, including urbanization and growth of the middle class in countries such as China and India, will result in continued consumer demand for silver and gold and

industrial demand for silver. However, there can be no assurance whether these trends will continue or how they will impact prices of the metals we produce. In the past, we have recorded impairments to our asset carrying value because of low prices, and we can offer no assurance that prices will either remain at their current levels or increase.

Processes supporting valuation of our assets and liabilities that are most significantly affected by prices include analysis of asset carrying values, depreciation, reserves, and deferred income taxes. On at least an annual basis – and more frequently if circumstances warrant – we examine our depreciation rates, reserve estimates, and the valuation allowances on our deferred tax assets. We examine the carrying values of our assets as changes in facts and circumstances warrant. In our analysis of carrying values and deferred taxes, we apply several pricing views to our forecasting model, including current prices, analyst price estimates, forward-curve prices, and historical prices (see *Mineral Reserves*, below, regarding prices used for reserve estimates). Using applicable accounting guidance and our view of metals markets, we use the average of the various methods to determine whether the values of our assets are fairly stated, and to determine the level of valuation allowances, if any, on our deferred tax assets. In addition, estimates of future metals prices are used in the valuation of certain assets in the determination of the purchase price allocations for our acquisitions (see *Business Combinations* below).

Sales of all metals products sold directly to customers are recorded as revenues when title and risk of loss transfer to the customer (generally at the time of shipment) at estimated forward metals prices for the estimated month of settlement. Due to the time elapsed between the time of shipment to the customer and final settlement with the customer, we must estimate the prices at which sales of our metals will be settled. Previously recorded sales and trade accounts receivable are adjusted to estimated settlement metals prices until final settlement by the customer. Changes in metals prices between shipment and final settlement result in changes to revenues and accounts receivable previously recorded upon shipment. As a result, our trade accounts receivable balances are subject to changes in metals prices until final settlement occurs. For more information, see part *N. Revenue Recognition* of Note 1 of Notes to Consolidated Financial Statements.

We utilize financially-settled forward contracts to manage our exposure to changes in prices for silver, gold, zinc and lead. See *Item 7A. Quantitative and Qualitative Disclosures About Market Risk – Commodity-Price Risk Management* below for more information on our contract programs. These contracts do not qualify for hedge accounting and are therefore marked-to-market through earnings each period. Changes in silver, gold, zinc and lead prices between the dates that the contracts are entered into and their settlements will result in changes to the fair value asset or liability associated with the contracts, with a corresponding gain or loss recognized in earnings.

#### ***Obligations for Environmental, Reclamation and Closure Matters***

Accrued reclamation and closure costs can represent a significant and variable liability on our balance sheet. We have estimated our liabilities under appropriate accounting guidance, and on at least an annual basis – and more frequently if warranted – management reviews our liabilities with our Audit Committee. However, the ranges of liability could exceed the liabilities recognized. If substantial damages were awarded, claims were settled, or remediation costs incurred in excess of our accruals, our financial results or condition could be materially adversely affected.

#### ***Mineral Reserves***

Critical estimates are inherent in the process of determining our reserves. Our reserves are affected largely by our assessment of future metals prices, as well as by engineering and geological estimates of ore grade, accessibility and production cost. Metals prices are estimated at long-term averages, as described in *Item 2. – Property Descriptions*. Our assessment of reserves occurs at least annually, and periodically utilizes external audits.

Reserves are a key component in the valuation of our properties, plants and equipment. Reserve estimates are used in determining appropriate rates of units-of-production depreciation, with net book value of many assets depreciated over remaining estimated reserves. Reserves are also a key component in forecasts, with which we compare future cash flows to current asset values to ensure that carrying values are reported appropriately. Reserves also play a key role in the valuation of certain assets in the determination of the purchase price allocations for acquisitions (see *Business Combinations* below). Reserves are a culmination of many estimates and are not guarantees that we will recover the indicated quantities of metals or that we will do so at a profitable level.

#### ***Business Combinations***

We are required to allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values at the acquisition date. The valuation of assets acquired and liabilities assumed requires management to make significant estimates and assumptions, especially with respect to long-lived assets, including estimates of future metals prices and mineral reserves, as discussed above. In some cases, we use third-party appraisers to determine the fair values and lives of property and other identifiable assets. In addition, costs related to business combinations are included in earnings as incurred, and our financial results for periods in which business combinations are pursued could be adversely affected as a result.

#### ***New Accounting Pronouncements***

In July 2013, the FASB issued ASU No. 2013-11, which requires entities to present unrecognized tax benefits as a decrease in a net operating loss, similar tax loss, or tax credit carryforward if certain criteria are met. The FASB's intent was to eliminate the diversity in practice of the presentation of unrecognized tax benefits but does not alter the way in which entities assess deferred tax assets for realizability. ASU No. 2013-11 is effective for annual and interim reporting periods beginning after December 15, 2013. Adoption of this guidance has not had a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09 Revenue Recognition, replacing guidance currently codified in Subtopic 605-10 Revenue Recognition-Overall with various SEC Staff Accounting Bulletins providing interpretive guidance. The guidance establishes a new five step principle-based framework in an effort to significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets. ASU No. 2014-09 is effective for annual and interim reporting periods beginning after December 15, 2016. We are in the process of evaluating this guidance and our method of adoption.

#### ***Forward-Looking Statements***

The foregoing discussion and analysis, as well as certain information contained elsewhere in this annual report on Form 10-K, contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of

1934, as amended, and are intended to be covered by the safe harbor created thereby. See the discussion in *Special Note on Forward-Looking Statements* included prior to *Item 1*.

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion about our risk-management activities includes forward-looking statements that involve risk and uncertainties, as well as summarizes the financial instruments held by us at December 31, 2014, which are sensitive to changes in commodity prices and foreign exchange rates and are not held for trading purposes. Actual results could differ materially from those projected in the forward-looking statements. In the normal course of business, we also face risks that are either non-financial or non-quantifiable (see *Item 1A. – Risk Factors*).

### Provisional Sales

Sales of all metals products sold directly to customers, including by-product metals, are recorded as revenues when title and risk of loss transfers to the customer (generally at the time of shipment) at forward prices for the estimated month of settlement. Due to the time elapsed between shipment to the customer and the final settlement with the customer we must estimate the prices at which sales of our metals will be settled. Previously recorded sales are adjusted to estimated settlement metals prices until final settlement by the customer. Changes in metals prices between shipment and final settlement will result in changes to revenues previously recorded upon shipment. Metals prices can and often do fluctuate widely and are affected by numerous factors beyond our control (see *Item 1A – Risk Factors – A substantial or extended decline in metals prices would have a material adverse effect on us*). At December 31, 2014, metals contained in concentrates and exposed to future price changes totaled approximately 1.7 million ounces of silver, 6,702 ounces of gold, 10,394 tons of zinc, and 4,542 tons of lead. If the price for each metal were to change by ten percent, the change in the total value of the concentrates sold would be approximately \$6.3 million. However, as discussed in *Commodity-Price Risk Management* below, we utilize a program designed and intended to mitigate the risk of negative price adjustments with limited mark-to-market financially-settled forward contracts for our silver, gold, zinc and lead sales.

### Commodity-Price Risk Management

At times, we may use commodity forward sales commitments, commodity swap contracts and commodity put and call option contracts to manage our exposure to fluctuation in the prices of certain metals which we produce. Contract positions are designed to ensure that we will receive a defined minimum price for certain quantities of our production, thereby partially offsetting our exposure to price fluctuations. These instruments do, however, expose us to (i) credit risk in the event of non-performance by counterparties for contracts in which the contract price exceeds the spot price of a commodity and (ii) price risk to the extent that the spot price exceeds the contract price for quantities of our production covered by contract positions.

We are currently using financially-settled forward contracts to manage the exposure to changes in prices of silver, gold, zinc and lead contained in our concentrate shipments between the time of shipment and final settlement. In addition, we use financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead (but not silver and gold) contained in our forecasted future concentrate shipments. These contracts do not qualify for hedge accounting and are marked-to-market through earnings each period. At December 31, 2014, we recorded the following balances related to these contracts:

- a current asset of \$5.3 million which is included in other current assets and is net of \$1.9 million in contracts in a fair value current liability position; and
- a non-current asset of \$6.0 million which is included in other non-current assets and is net of \$1.8 million in contracts in a fair value non-current liability position;

We recognized a \$1.5 million net gain during 2014 on the contracts utilized to manage exposure to prices of metals in our concentrate shipments, which is included in sales of products. The net gain recognized on the contracts offsets losses related to price adjustments on our provisional concentrate sales due to changes to silver, gold, lead and zinc prices between the time of sale and final settlement.

We recognized a \$9.1 million net gain during 2014 on the contracts utilized to manage exposure to prices for forecasted future concentrate shipments, which includes \$3.6 million in gains realized on settled contracts. The net gain on these contracts is included as a separate line item under other income (expense), as they relate to forecasted future shipments, as opposed to sales that have already taken place but are subject to final pricing as discussed in the preceding paragraph. The net gain for 2014 is the result of decreasing zinc and lead prices during the fourth quarter. This program is designed to mitigate the impact of potential future declines in lead and zinc prices from the price levels established in the contracts (see average price information below).

The following table summarizes the quantities of metals committed under forward sales contracts at December 31, 2014:

	Ounces/pounds under contract (in 000's)				Average price per ounce/pound			
	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)
Contracts on provisional sales								
2015 settlements	1,607	6	19,456	8,378	\$ 16.06	\$ 1,195	\$ 1.01	\$ 0.87
Contracts on forecasted sales								
2015 settlements	–	–	46,738	29,652	N/A	N/A	\$ 0.96	\$ 1.07
2016 settlements	–	–	44,699	34,337	N/A	N/A	\$ 0.99	\$ 1.03
2017 settlements	–	–	1,984	–	N/A	N/A	\$ 1.04	N/A

The contracts on forecasted sales above represent approximately 31% of the forecasted payable zinc production for 2015 through 2017 at an average price of \$0.98 per pound and approximately 28% of the forecasted payable lead production for 2015 through 2017 at an average price of \$1.05 per pound.

### Foreign Currency

We operate or have mining interests in Canada and Mexico, which exposes us to risks associated with fluctuations in the exchange rates of the currencies involved, particularly between the U.S. dollar and Canadian dollar. On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd.,

which gave us ownership of the Casa Berardi mine and various mineral interests in Quebec, Canada. We have determined that the functional currency for our Canadian operations is the U.S. dollar. As such, foreign exchange gains and losses associated with the re-measurement of monetary assets and liabilities from Canadian dollars to U.S. dollars are recorded to earnings each period. For 2014, we recognized a net foreign exchange gain of \$11.5 million. Foreign currency exchange rates are influenced by a number of factors beyond our control. We currently do not utilize forward contracts or other contracts to manage our exposure to foreign currency fluctuations, but we may do so in the future. A one percent change in the exchange rate between the U.S. dollar and Canadian dollar from the rate at December 31, 2014 would have resulted in a change of approximately \$1.5 million in our net foreign exchange gain.

## ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our Consolidated Financial Statements are included herein beginning on page F-1. Financial statement schedules are omitted as they are not applicable or the information required is included in the Consolidated Financial Statements.

The following table sets forth supplementary financial data (in thousands, except per share amounts) for each quarter of the years ended December 31, 2014 and 2013, derived from our unaudited financial statements. The data set forth below should be read in conjunction with and is qualified in its entirety by reference to our Consolidated Financial Statements.

	Fourth Quarter	Third Quarter	Second Quarter <sup>(2)</sup>	First Quarter	Total
<b>2014</b>					
Sales of products	\$ 121,985	\$ 135,507	\$ 117,502	\$ 125,787	\$ 500,781
Gross profit	\$ 22,207	\$ 22,023	\$ 18,728	\$ 22,243	\$ 85,201
Net income (loss)	\$ 16,905	\$ 3,676	\$ (14,399)	\$ 11,642	\$ 17,824
Preferred stock dividends	\$ (138)	\$ (138)	\$ (138)	\$ (138)	\$ (552)
Income (loss) applicable to common stockholders	\$ 16,767	\$ 3,538	\$ (14,537)	\$ 11,504	\$ 17,272
Basic income per common share	\$ 0.05	\$ 0.01	\$ (0.04)	\$ 0.03	\$ 0.05
Diluted income per common share	\$ 0.05	\$ 0.01	\$ (0.04)	\$ 0.03	\$ 0.05
<b>2013</b>					
Sales of products	\$ 114,180	\$ 106,629	\$ 85,330	\$ 76,450	\$ 382,589
Gross profit	\$ 14,731	\$ 20,686	\$ 5,111	\$ 25,618	\$ 66,146
Net income (loss) <sup>(1)</sup>	\$ (2,908)	\$ (8,458)	\$ (24,858)	\$ 11,094	\$ (25,130)
Preferred stock dividends	\$ (138)	\$ (138)	\$ (138)	\$ (138)	\$ (552)
Income (loss) applicable to common stockholders	\$ (3,046)	\$ (8,596)	\$ (24,996)	\$ 10,956	\$ (25,682)
Basic income (loss) per common share	\$ (0.01)	\$ (0.03)	\$ (0.08)	\$ 0.04	\$ (0.08)
Diluted income (loss) per common share	\$ (0.01)	\$ (0.03)	\$ (0.08)	\$ 0.04	\$ (0.08)

1) We experienced a temporary suspension of production at our Lucky Friday unit in 2012 and a ramp up in production during much of 2013, which resulted in lower revenue in 2013 compared to 2014. For additional information, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – The Lucky Friday Segment*.

2) On June 1, 2013, we acquired all the issued and outstanding shares of Aurizon Mines Ltd. for cash and stock consideration. The acquisition gives us 100% ownership of the producing Casa Berardi gold mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada. This information reflects our ownership of the Casa Berardi mine and other interests commencing on June 1, 2013. See *Note 15 Acquisitions of Notes to Consolidated Financial Statements*.

## ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

## ITEM 9A. CONTROLS AND PROCEDURES

### *Disclosure Controls and Procedures*

An evaluation was performed under the supervision and with the participation of our management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of December 31, 2014, in assuring them in a timely manner that material information required to be disclosed in this report has been properly recorded, processed, summarized and reported.

### *Management's Annual Report on Internal Control over Financial Reporting*

Management is responsible for establishing and maintaining adequate internal control over our financial reporting, which is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America.

Because of its inherent limitations, any system of internal control over financial reporting, no matter how well designed, may not prevent or detect misstatements due to the possibility that a control can be circumvented or overridden or that misstatements due to error or fraud may occur that are not detected. Also, because of changes in conditions, internal control effectiveness may vary over time.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2014, using criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") and concluded that we have maintained effective internal control over financial reporting as of December 31, 2014, based on these criteria.

An evaluation was performed under the supervision and with the participation of management, including the CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures as required by Exchange Act Rules 13a-15(e) and 15(d)-15(e) as of the end of the reporting period covered by this report. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures, including

controls and procedures designed to ensure that information required to be disclosed by us is accumulated and communicated to our management (including our CEO and CFO), were effective as of December 31, 2014, in assuring them in a timely manner that material information required to be disclosed in this report has been properly recorded, processed, summarized and reported.

Our internal control over financial reporting as of December 31, 2014 has been audited by BDO USA, LLP, an independent registered public accounting firm, as stated in the attestation report which is included herein.

#### ***Changes in Internal Control over Financial Reporting***

There have been no changes in our internal controls over financial reporting during the quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

#### ***Report of Independent Registered Public Accounting Firm***

Board of Directors and Stockholders  
Hecla Mining Company  
Coeur d'Alene, Idaho

We have audited Hecla Mining Company's internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Hecla Mining Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Hecla Mining Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Hecla Mining Company as of December 31, 2014 and 2013, and the related consolidated statements of operations and comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2014 and our report dated February 18, 2015 expressed an unqualified opinion thereon.

/s/ BDO USA, LLP  
Spokane, Washington

(1) Member of Executive Committee

(2) Member of Audit Committee

(3) Member of Corporate Governance and Directors' Nominating Committee

(4) Member of Compensation Committee

(5) Member of Health, Safety, Environmental and Technical Committee

Phillips S. Baker, Jr., has been our Chief Executive Officer since May 2003 and a director since November 2001. Prior to that, Mr. Baker held a variety of other positions with us starting in May 2001. Prior to joining us, Mr. Baker served as Vice President and Chief Financial Officer of Battle Mountain Gold Company (a gold mining company) from March 1998 to January 2001. Mr. Baker served as a director of Questar Corporation (a U.S. natural gas-focused exploration and production, interstate pipeline and local distribution company) from February 2004 to June 2010, and has served as a director for QEP Resources, Inc. (a natural gas and oil exploration and production company) since May 2010.

James A. Sabala was appointed Chief Financial Officer in May 2008 and Senior Vice President in March 2008. Prior to his employment with Hecla, Mr. Sabala was Executive Vice President – Chief Financial Officer of Coeur d'Alene Mines Corporation (a mining company) from 2003 to February 2008. Mr. Sabala also served as Vice President – Chief Financial Officer of Stillwater Mining Company (a mining company) from 1998 to 2002.

Lawrence P. Radford was appointed Senior Vice President – Operations in July 2013, and prior to that was Vice President – Operations from October 2011 to June 2013. Prior to joining Hecla, Mr. Radford was Vice President of South American Operations for Kinross Gold Corporation at its South America operations (gold mining operations) from April 2010 to September 2011. Mr. Radford held various other positions at Kinross from June 2007 to March 2010. He was General Manager for Barrick Gold Corporation at its Cowal operation (a gold mining operation) in West Wyalong, NSW, Australia from January 2006 to May 2007. Mr. Radford also held various positions with Barrick from 1990 to December 2005. Prior to that, he was Planning and Project Engineer for Nerco Delamar Company (a mining company) from 1988 to 1989 and Mining Engineer for Coeur d'Alene Mines Corporation from 1984 to 1988.

Dr. Dean W.A. McDonald was appointed Senior Vice President – Exploration in July 2013 and prior to that was Vice President – Exploration from August 2006 to June 2013. Dr. McDonald was also appointed Senior Vice President – Exploration of our Canadian subsidiary, Hecla Canada Ltd., in July 2013 and was Vice President – Exploration from January 2007 to June 2013. Prior to joining Hecla, Dr. McDonald was Vice President Exploration and Business Development for Committee Bay Resource Ltd. (a Canadian-based exploration and development company) from 2003 to August 2006 and Exploration Manager at Miramar Mining Company/Northern Orion Explorations (an exploration company) from 1996 to 2003. Dr. McDonald has also served as a Director for Canamex Resources Corp. (a mineral exploration company) since August 2013.

Don Poirier was appointed Vice President – Corporate Development in July 2007. Mr. Poirier has also been Vice President – Corporate Development of our Canadian subsidiary, Hecla Canada Ltd., since January 2007. Prior to joining Hecla, Mr. Poirier was a mining analyst with Blackmont Capital (capital market specialists) from September 2002 to June 2007. Mr. Poirier held other mining analyst positions from 1988 to 2002. Mr. Poirier has also served as a Director for Brixton Metals Corporation (an exploration and development company) since May 2013.

David C. Sienko was appointed Vice President and General Counsel in January 2010. Prior to his appointment, Mr. Sienko was a partner with the law firm K&L Gates LLP (formerly Bell, Boyd & Lloyd LLP) from 2004 to January 2010, where he specialized in securities, mergers and acquisitions, and corporate governance. Mr. Sienko was also an associate at Bell, Boyd & Lloyd, LLP, from 2000 to 2004 and at Locke Lord from 1998 to 2000, as well as an attorney with the Securities and Exchange Commission from 1995 to 1998.

John H. Bowles was elected by the stockholders to Hecla's Board of Directors in May 2006. Mr. Bowles was a partner in PricewaterhouseCoopers LLP (an accounting firm) from April 1976 until his retirement in June 2006. He concentrated his practice on public companies operating in the mining industry. Mr. Bowles was a Director of Mercator Minerals LTD. (a copper, molybdenum and silver producing company) from April 2011 to September 2014, a Director of HudBay Minerals Inc. (a zinc, copper, gold and silver mining company) from May 2006 to March 2009, as well as a Director of Boss

Power Corp. (a mineral exploration company) from September 2007 to November 2013. He holds Fellowships in both the British Columbia Institute of Chartered Accountants and the Canadian Institute of Mining and Metallurgy. Mr. Bowles was also the Treasurer of Mining Suppliers Association of British Columbia (an association of providers of equipment, products and related services to the British Columbia mining industry) from May 1999 to May 2012. He has been Director Emeritus of Ducks Unlimited Canada (a national, private, non-profit wetland conservation organization) since March 1996. In 2006, Mr. Bowles was named Mining Person of the Year by the Mining Association of British Columbia.

Ted Crumley has served as a director since 1995 and became Chairman of the Board in May 2006. Mr. Crumley served as the Executive Vice President and Chief Financial Officer of OfficeMax Incorporated (a distributor of office products) from January 2005 until his retirement in December 2005, and as Senior Vice President from November 2004 to January 2005. Prior to that, Mr. Crumley was Senior Vice President and Chief Financial Officer of Boise Cascade Corporation (a wood and paper company), from 1994 to 2004.

George R. Nethercutt, Jr., was appointed to Hecla's Board of Directors in February 2005. Mr. Nethercutt has served as a principal of Nethercutt Consulting LLC (a strategic planning and consulting firm) from January 2007 to January 2012. Prior to that, Mr. Nethercutt was a principal of Lundquist, Nethercutt & Griles, LLC (a strategic planning and consulting firm) from February 2005 to January 2007. Mr. Nethercutt has also been a board member for the Washington Policy Center (a public policy organization providing high quality analysis on issues relating to the free market and government regulation) since January 2005, and a member of the board of IP Street (a software company) from May 2011 to January 2015. In September 2010, Mr. Nethercutt was appointed Of Counsel with the law firm of Lee & Hayes PLLC. Mr. Nethercutt serves as a board member of ARCADIS Corporation (an international company providing consultancy, engineering and management services), the Board of Chancellors for the Juvenile Diabetes Research Foundation International (a charity and advocate of juvenile diabetes research worldwide), and served as U.S. Chairman of the Permanent Joint Board on Defense – U.S./Canada from April 2005 to December 2009. He is the founder and Chairman of the George Nethercutt Foundation (a charitable non-profit educational foundation) formed in February 2007. From 1995 to 2005, Mr. Nethercutt served in the U.S. House of Representatives, including House Appropriations subcommittees on Interior, Agriculture and Defense and the Science Committee's subcommittee on Energy. He has been a member of the Washington State Bar Association since 1972.

Charles B. Stanley was elected to Hecla's Board of Directors in May 2007. Mr. Stanley has been the Chief Executive Officer, President and Director of QEP Resources, Inc. (a natural gas and oil exploration and production company) since May 2010, and Chairman of QEP's board of directors since May 2012. He also served as Chairman, Chief Executive Officer, President and Director of QEP Midstream Partners, LP (a master limited partnership that owns, operates, acquires and develops midstream energy assets) from May 2013 to December 2014. He served as Chief Operating Officer of Questar Corporation (a U.S. natural gas-focused exploration and production, interstate pipeline and local distribution company) from March 2008 to June 2010, and also as its Executive Vice President and Director from February 2002 to June 2010.

Terry V. Rogers was elected to Hecla's Board of Directors in May 2007. Mr. Rogers was the Senior Vice President and Chief Operating Officer of Cameco Corporation (a uranium producer) from February 2003 until his retirement in June 2007. Mr. Rogers also served as President of Kumtor Operating Company (a gold producing company and a division of Cameco Corporation) from 1999 to 2003. He has also served as a Director for Centerra Gold Inc. (a gold mining company) since February 2003.

Dr. Anthony P. Taylor has served as a director since May 2002. Dr. Taylor has been the President, CEO and Director of Selex Resources Ltd. (a private Ontario Corporation engaged in mineral exploration) since January 2012. He previously served as Executive Chairman and Director of Crown Gold Corporation (a public Canadian minerals exploration company) from August 2010 to August 2012, and President, CEO and Director of Gold Summit Corporation (a public Canadian minerals exploration company) from October 2003 to August 2010. He has served as President and Director of Caughlin Preschool Corporation (a private Nevada corporation that operates a preschool) since October 2001.

Information with respect to our directors is set forth under the caption "Proposal 1 – Election of Directors" in our proxy statement to be filed pursuant to Regulation 14A for the annual meeting scheduled to be held on May 20, 2015 (the Proxy Statement), which information is incorporated herein by reference.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders  
Hecla Mining Company  
Coeur d'Alene, Idaho

We have audited the accompanying consolidated balance sheets of Hecla Mining Company as of December 31, 2014 and 2013 and the related consolidated statements of operations and comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Hecla Mining Company at December 31, 2014 and 2013, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Hecla Mining Company's internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated February 18, 2015 expressed an unqualified opinion thereon.

## HECLA MINING COMPANY AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### **Note 1: Summary of Significant Accounting Policies**

**A. Principles of Consolidation** – Our Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America, and include our accounts and our wholly-owned subsidiaries' accounts. All significant inter-company balances and transactions have been eliminated in consolidation.

**B. Assumptions and Use of Estimates** – Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts and related disclosure of assets, liabilities, revenue and expenses at the date of the consolidated financial statements and reporting periods. We consider our most critical accounting estimates to be future metals prices; obligations for environmental, reclamation and closure matters; mineral reserves; and valuation of business combinations. Other significant areas requiring the use of management assumptions and estimates relate to reserves for contingencies and litigation; asset impairments, including long-lived assets and investments; valuation of deferred tax assets; and post-employment, post-retirement and other employee benefit assets and liabilities. We have based our estimates on historical experience and on various other assumptions that we believe to be reasonable. Accordingly, actual results may differ materially from these estimates under different assumptions or conditions.

**C. Cash and Cash Equivalents** – Cash and cash equivalents consist of all cash balances and highly liquid investments with a remaining maturity of three months or less when purchased and are carried at fair value. Cash and cash equivalents are invested in money market funds, certificates of deposit, U.S. government and federal agency securities, municipal securities and corporate bonds.

**D. Investments and Securities Held for Sale** – We determine the appropriate classification of our investments at the time of purchase and re-evaluate such determinations at each reporting date. Short-term investments include certificates of deposit and held-to-maturity securities, based on our intent and ability to hold the securities to maturity. Marketable equity securities are categorized as available for sale and carried at fair market value.

Realized gains and losses on the sale of securities are recognized on a specific identification basis. Unrealized gains and losses are included as a component of accumulated other comprehensive income (loss), unless an other than temporary impairment in value has occurred or we have elected the fair value option accounting method when available for certain investments; in either of those cases, the unrealized gain or loss would be charged to current period net income (loss). The fair value option allows for the fair value measurement of specified assets or liabilities on a case-by-case basis, with unrealized gains and losses recorded to current period net income (loss). Unrealized gains and losses originally included in accumulated other comprehensive income are reclassified to current period net income (loss) when the sale of securities, determination of an other than temporary impairment, or election of the fair value option accounting method occurs.

**E. Inventories** – Inventories are stated at the lower of average costs incurred or estimated net realizable value. Major types of inventories include materials and supplies and metals product inventory, which is determined by the stage at which the ore is in the production process (stockpiled ore and finished goods). Inventories are valued at the lower of full cost of production or net realizable value based on current metals prices.

**Stockpiled ore** inventory represents ore that has been mined, hauled to the surface, and is available for further processing. Stockpiles are measured by estimating the number of tons added and removed from the stockpile, the amount of contained metal ounces or pounds (based on assay data) and the estimated metallurgical recovery rates (based on the expected processing method). Costs are allocated to a stockpile based on relative values of material stockpiled and processed using current mining costs incurred up to the point of stockpiling the ore, including applicable overhead, depreciation, depletion and amortization relating to mining operations, and removed at each stockpile's average cost per recoverable unit.

**Finished goods inventory** includes doré and concentrates at our operations, doré in transit to refiners or at refiners waiting to be processed, and bullion in our accounts at refineries.

**F. Restricted Cash** – Restricted cash and investments primarily represent investments in money market funds, certificates of deposit, guaranteed investment certificates (Canadian deposits), and bonds of U.S. government agencies and are restricted primarily for reclamation funding or surety bonds. Restricted cash balances are carried at fair value.

**G. Properties, Plants and Equipment** – Costs are capitalized when it has been determined an ore body can be economically developed. The development stage begins at new projects when our management and/or Board of Directors makes the decision to bring a mine into commercial production, and ends when the production stage, or exploitation of reserves, begins. Expenditures incurred during the development and production stages for new assets, new facilities, alterations to existing facilities that extend the useful lives of those facilities and major mine development expenditures are capitalized, including primary development costs such as costs of building access ways, shaft sinking, lateral development, drift development, ramps and infrastructure developments. Costs to improve, alter, or rehabilitate primary development assets which appreciably extend the life, increase capacity, or improve the efficiency or safety of such assets are also capitalized.

Costs for exploration, pre-development, secondary development at operating mines, and maintenance and repairs on capitalized property, plant and equipment are charged to operations as incurred. Exploration costs include those relating to activities carried out (a) in search of previously unidentified mineral deposits, (b) at undeveloped concessions, or (c) at operating mines already containing proven and probable reserves, where a determination remains pending as to whether new target deposits outside of the existing reserve areas can be economically developed. Pre-development activities involve costs incurred in the exploration stage that may ultimately benefit production, such as underground ramp development, which are expensed due to the lack of evidence of economic development, which is necessary to demonstrate future recoverability of these expenses. At an underground mine, secondary development costs are incurred for preparation of an ore body for production in a specific ore block, stope or work area, providing a relatively short-lived benefit only to the mine area they relate to, and not to the ore body as a whole.

Drilling and related costs are either classified as exploration or secondary development, as defined above, and charged to operations as incurred, or capitalized, based on the following criteria:

- whether the costs are incurred to further define mineralization at and adjacent to existing reserve areas or intended to assist with mine planning within a reserve area;
- whether the drilling costs relate to an ore body that has been determined to be commercially mineable, and a decision has been made to put the ore body into commercial production; and
- whether, at the time that the cost is incurred, the expenditure: (a) embodies a probable future benefit that involves a capacity, singly or in

combination, with other assets to contribute directly or indirectly to future net cash inflows, (b) we can obtain the benefit and control others' access to it, and (c) the transaction or event giving rise to our right to or control of the benefit has already occurred.

If all of these criteria are met, drilling and related costs are capitalized. Drilling costs not meeting all of these criteria are expensed as incurred. The following factors are considered in determining whether or not the criteria listed above have been met, and capitalization of drilling costs is appropriate:

- completion of a favorable economic study and mine plan for the ore body targeted;
- authorization of development of the ore body by management and/or the Board of Directors; and
- all permitting and/or contractual requirements necessary for us to have the right to or control of the future benefit from the targeted ore body have been met.

Drilling and related costs of approximately \$5.3 million, \$8.0 million, and \$5.0 million for the years ended December 31, 2014, 2013 and 2012, respectively, met our criteria for capitalization listed above at our properties that are in the production stage.

When assets are retired or sold, the costs and related allowances for depreciation and amortization are eliminated from the accounts and any resulting gain or loss is reflected in current period net income (loss). Idle facilities placed on standby are carried at the lower of net carrying value or estimated net realizable value. The net carrying values of idle facilities on standby are written-down to salvage value upon reaching the end of the economic life. Therefore, with the exception of depreciation recorded on mobile equipment used in ongoing exploration and reclamation efforts at such properties, we do not record depreciation on idle facilities when they are not in operation.

Included in property, plant and equipment on our consolidated financial statements are mineral interests, which are tangible assets that include acquired undeveloped mineral interests and royalty interests. Undeveloped mineral interests include: (i) mineralized material and other resources which are measured, indicated or inferred with insufficient drill spacing or quality to qualify as proven and probable reserves; and (ii) inferred material not immediately adjacent to existing proven and probable reserves but accessible within the immediate mine infrastructure. Residual values for undeveloped mineral interests represents the expected fair value of the interests at the time we plan to convert, develop, further explore or dispose of the interests and are evaluated at least annually.

We capitalize portions of interest costs incurred on our debt as a part of the cost of constructing or acquiring certain qualifying assets. The amount of interest capitalized represents the portion of interest cost incurred during the construction or acquisition periods that theoretically could have been avoided if expenditures for the qualifying assets had not been made, limited to the total interest cost actually incurred during the period. Qualifying assets include discrete projects constructed by us or by a third party for our use which required a period of time to prepare the assets for their intended use. Interest capitalization takes place when capital expenditures for qualifying assets have been incurred, activities to prepare the qualifying asset for its intended use are underway, and interest cost is being incurred.

**H. Depreciation, Depletion and Amortization** – Capitalized costs are depreciated or depleted using the straight-line method or unit-of-production method at rates sufficient to depreciate such costs over the shorter of estimated productive lives of such facilities or the useful life of the individual assets. Productive lives range from 1 to 28 years, but do not exceed the useful life of the individual asset. Determination of expected useful lives for amortization calculations are made on a property-by-property or asset-by-asset basis at least annually. Our estimates for reserves, mineralized material, and other resources are a key component in determining our units of production depreciation rates. Our estimates of proven and probable ore reserves, mineralized material, and other resources may change, possibly in the near term, resulting in changes to depreciation, depletion and amortization rates in future reporting periods.

Undeveloped mineral interests and value beyond proven and probable reserves are not amortized until such time as there are proven and probable reserves or the related mineralized material is converted to proven and probable reserves. At that time, the basis of the mineral interest is amortized on a units-of-production basis. Pursuant to our policy on impairment of long-lived assets (discussed further below), if it is determined that an undeveloped mineral interest cannot be economically converted to proven and probable reserves, the basis of the mineral interest is reduced to its net realizable value and an impairment loss is recorded to expense in the period in which it is determined to be impaired.

**I. Impairment of Long-lived Assets** – Management reviews and evaluates the net carrying value of all facilities, including idle facilities, for impairment upon the occurrence of other events or changes in circumstances that indicate that the related carrying amounts may not be recoverable. We estimate the net realizable value of each property based on the estimated undiscounted future cash flows that will be generated from operations at each property, the estimated salvage value of the surface plant and equipment, and the value associated with property interests.

Although management has made a reasonable estimate of factors based on current conditions and information, assumptions underlying future cash flows are subject to significant risks and uncertainties. Estimates of undiscounted future cash flows are dependent upon estimates of metals to be recovered from proven and probable ore reserves, and to some extent identified mineralization and other resources beyond proven and probable reserves, future production and capital costs and estimated metals prices (considering current and historical prices, forward pricing curves and related factors) over the estimated remaining mine life. It is reasonably possible that changes could occur in the near term that could adversely affect our estimate of future cash flows to be generated from our operating properties. If undiscounted cash flows are less than the carrying value of a property, an impairment loss is recognized.

**J. Proven and Probable Ore Reserves** – At least annually, management reviews the reserves used to estimate the quantities and grades of ore at our mines which we believe can be recovered and sold economically. Management's calculations of proven and probable ore reserves are based on financial, engineering and geological estimates, including future metals prices and operating costs. From time to time, management obtains external audits of reserves. A partial third-party audit of 2012 reserves at Greens Creek and a third-party audit of 2013 reserves at Lucky Friday were concluded during 2013. A third party review of 2013 reserves at Casa Berardi was performed during 2013.

Reserve estimates will change as existing reserves are depleted through production and as production costs and/or metals prices change. A significant drop in metals prices may reduce reserves by making some portion of such ore uneconomic to develop and produce. Changes in reserves may also reflect that actual grades of ore processed may be different from stated reserve grades because of variation in grades in areas mined, mining dilution and other factors. Our reserve estimates may change based on actual production experience. It is reasonably possible that certain of our estimates of proven and probable ore reserves will change in the near term, which could result in a change to estimated future cash flows, associated carrying values of the asset and amortization rates in future reporting periods, among other things.

Declines in the market prices of metals, increased production or capital costs, reduction in the grade or tonnage of the deposit or an increase in the dilution of the ore or reduced recovery rates may render ore reserves uneconomic to exploit. If our realized price for the metals we produce were to decline substantially below the levels set for calculation of reserves for an extended period, there could be material delays in the development of new

projects, net losses, reduced cash flow, restatements or reductions in reserves and asset write-downs in the applicable accounting periods. Reserves should not be interpreted as assurances of mine life or of the profitability of current or future operations. No assurance can be given that the estimate of the amount of metal or the indicated level of recovery of these metals will be realized.

**K. Pension Plans and Other Post-retirement Benefits** – We maintain defined benefit pension plans covering substantially all U.S. employees and provide certain post-retirement benefits for qualifying retired employees. Canadian employees participate in Canada's public retirement income system, and are not eligible to participate in the defined benefit pension plans that we maintain for U.S. employees. Pension benefits under the plans we maintain generally depend on length and level of service and age upon retirement. Substantially all benefits are paid through pension trusts. We contributed approximately \$0.3 million per year related to our unfunded supplemental executive retirement plan in years 2014, 2013 and 2012, and expect to contribute \$0.4 million related to this plan in 2015. We made cash contributions of approximately \$1.0 million and \$1.1 million to our defined benefit pension plans in 2013 and 2012, respectively. In 2014, we contributed our Senior Notes in the aggregate principal amount of \$6.5 million to one of our defined benefit pension plans. In January 2015, we contributed approximately \$4.9 million in shares of our common stock to our defined benefit plans, with no additional contributions anticipated in 2015.

Regulations regarding employers' accounting for defined benefit pension and other post-retirement plans, among other things, require us to:

- Recognize the funded status of our defined benefit plans in our consolidated financial statements; and
- Recognize as a component of other comprehensive income (loss) the actuarial gains and losses and prior service costs and credits that arise during the period but are not immediately recognized as components of net periodic benefit cost.

We also maintain two defined contribution (401(k)) plans as described in *Note 8*.

**L. Income and Production Taxes** – We provide for federal, state and foreign income taxes currently payable, as well as those deferred due to timing differences between reporting income and expenses for financial statement purposes versus tax purposes. Federal, state and foreign tax benefits are recorded as a reduction of income taxes, when applicable. We record deferred tax liabilities and assets for expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax bases of those assets and liabilities, as well as operating loss and tax credit carryforwards, using enacted tax rates in effect in the years in which the differences are expected to reverse.

We evaluate uncertain tax positions in a two-step process, whereby (i) it is determined whether it is more likely than not that the tax positions will be sustained based on the technical merits of the position and (ii) for those tax positions that meet the more-likely-than-not recognition threshold, the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with the related tax authority would be recognized.

We classify mine license taxes incurred in the states of Alaska and Idaho as other direct production costs reported in our gross profits. Resource taxes incurred in Quebec, Canada are classified as income taxes.

For additional information, see *Note 5 – Income Taxes*.

**M. Reclamation and Remediation Costs (Asset Retirement Obligations)** – At our operating properties, we record a liability for the present value of our estimated environmental remediation costs, and the related asset created with it, in the period in which the liability is incurred. The liability is accreted and the asset is depreciated over the life of the related assets. Adjustments for changes resulting from the passage of time and changes to either the timing or amount of the original present value estimate underlying the obligation are made in the period incurred.

At our non-operating properties, we accrue costs associated with environmental remediation obligations when it is probable that such costs will be incurred and they are reasonably estimable. Accruals for estimated losses from environmental remediation obligations have historically been recognized no later than completion of the remedial feasibility study for such facility and are charged to current earnings under provision for closed operations and environmental matters. Costs of future expenditures for environmental remediation are not discounted to their present value unless subject to a contractually obligated fixed payment schedule. Such costs are based on management's current estimate of amounts to be incurred when the remediation work is performed, within current laws and regulations.

Future closure, reclamation and environmental-related expenditures are difficult to estimate in many circumstances, due to the early stage nature of investigations, uncertainties associated with defining the nature and extent of environmental contamination, the application of laws and regulations by regulatory authorities, and changes in reclamation or remediation technology. We periodically review accrued liabilities for such reclamation and remediation costs as evidence becomes available indicating that our liabilities have potentially changed. Changes in estimates at our non-operating properties are reflected in current period net income (loss).

Accruals for closure costs, reclamation, and environmental matters for operating and non-operating properties totaled \$57.3 million at December 31, 2014. It is reasonably possible the ultimate cost of reclamation and remediation could change in the future, and that changes to these estimates could have a material effect on future operating results as new information becomes known.

**N. Revenue Recognition and Trade Accounts Receivable** – Sales of all metals products sold directly to customers, including by-product metals, are recorded as revenues and accounts receivable when title and risk of loss transfer to the customer (generally at the time of shipment) at estimated forward prices for the anticipated month of settlement. Due to the time elapsed from shipment to the customer and the final settlement with the customer, we must estimate the prices at which sales of our metals will be settled. Previously recorded sales and accounts receivable are adjusted to estimated settlement metals prices until final settlement by the customer.

Sales and accounts receivable for concentrate shipments are recorded net of charges by the customers for treatment, refining, smelting losses, and other charges negotiated by us with the customers. Charges are estimated by us upon shipment of concentrates based on contractual terms, and actual charges do not vary materially from our estimates. Costs charged by customers include fixed treatment and refining costs per ton of concentrate, and also include price escalators which allow the customers to participate in the increase of lead and zinc prices above a negotiated baseline.

Changes in metals prices between shipment and final settlement will result in adjustments to revenues and accounts receivable related to sales of concentrate previously recorded upon shipment. Our concentrate sales and accounts receivable are based on provisional sales prices containing an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the concentrates at the forward price at the time of the sale. The embedded derivative, which does not qualify for hedge accounting, is adjusted to market through earnings each period prior to final settlement.

At December 31, 2014, metals contained in concentrates and exposed to future price changes totaled 1.7 million ounces of silver, 6,702 ounces of gold, 10,394 tons of zinc, and 4,542 tons of lead. However, as discussed in *P. Risk Management Contracts* below, we seek to mitigate the risk of negative price adjustments by using financially settled forward contracts for some of our sales.

Sales of metals in products tolled by refiners and sold directly by us, rather than sold to smelters, are recorded at contractual amounts when title and risk of loss transfer to the buyer.

Changes in the market price of metals significantly affect our revenues, profitability, and cash flow. Metals prices can and often do fluctuate widely and are affected by numerous factors beyond our control, such as political and economic conditions, demand, forward selling by producers, aggregation by metals speculators and others, expectations for inflation, central bank sales, custom smelter activities, the relative exchange rate of the U.S. dollar, investor sentiment, and global mine production levels. The aggregate effect of these factors is impossible to predict. Because our revenue is derived from the sale of silver, gold, lead, and zinc, our earnings are directly related to the prices of these metals.

**O. Foreign Currency** – The functional currency for our operations located in the U.S., Mexico and Canada was the U.S. dollar for all periods presented. Accordingly, for the Casa Berardi unit in Canada and San Sebastian project in Mexico, we have translated our monetary assets and liabilities at the period-end exchange rate, and non-monetary assets and liabilities at historical rates, with income and expenses translated at the average exchange rate for the current period. All translation gains and losses have been included in the current period net income (loss).

For the years ended December 31, 2014 and 2013, we recognized total net foreign exchange gains of \$11.5 million and \$3.0 million, respectively. For the year ended December 31, 2012, we recognized total net foreign exchange losses of \$0.1 million.

**P. Risk Management Contracts** – We use derivative financial instruments as part of an overall risk-management strategy that is used as a means of managing exposure to base metals prices. We do not hold or issue derivative financial instruments for speculative trading purposes. As of December 31, 2014 and 2013, none of these contracts qualified for hedge accounting and all unrealized gains and losses are therefore reported in earnings.

We measure derivative contracts as assets or liabilities based on their fair value. Amounts recognized for the fair value of derivative asset and liability positions with the same counterparty and which would be settled on a net basis are offset against each other on our consolidated balance sheets. Gains or losses resulting from changes in the fair value of derivatives in each period are recorded either in current earnings or other comprehensive income (“OCI”), depending on the use of the derivative, whether it qualifies for hedge accounting and whether that hedge is effective. Amounts deferred in OCI are reclassified to sales of products (for metals price-related contracts) or interest expense (for interest rate-related contracts, which we have used in the past) when the hedged transaction has occurred. Ineffective portions of any change in fair value of a derivative are recorded in current period other operating income (expense).

We utilize two financially-settled forward contract programs to manage the exposure to changes in prices of (i) silver, gold, zinc, and lead contained in our concentrate shipments between the time of sale and final settlement and (ii) zinc and lead contained in our forecasted future concentrate shipments. The contracts under these programs do not qualify for hedge accounting, and are marked-to-market through earnings each period. See Note 10 for additional information on base metal derivative contracts, including open positions as of December 31, 2014.

**Q. Stock Based Compensation** – The fair values of equity instruments granted to employees and having vesting periods are expensed over the vesting periods on a straight-line basis. The fair values of instruments having no vesting period are expensed when granted. We recognized stock-based compensation expense of approximately \$5.0 million, \$4.5 million, and \$3.1 million, respectively, during 2014, 2013 and 2012, which was recorded to general and administrative expenses, exploration and cost of sales and other direct production costs. As of December 31, 2014, the majority of the instruments outstanding were fully vested.

For additional information on our employee stock option and restricted stock unit compensation, see Note 9.

**R. Legal Costs** – Legal costs incurred in connection with a potential loss contingency are recorded to expense as incurred.

**S. Basic and Diluted Income (Loss) Per Common Share** – We calculate basic earnings per share on the basis of the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated using weighted average number of common shares outstanding during the period plus the effect of potential dilutive common shares during the period using the treasury stock and if-converted methods.

Potential dilutive common shares include outstanding stock options, unvested restricted stock awards, stock units, warrants and convertible preferred stock for periods in which we have reported net income. For periods in which we reported net losses, potential dilutive common shares are excluded, as their conversion and exercise would be anti-dilutive. See Note 13 for additional information.

**T. Comprehensive Income (Loss)** – In addition to net income (loss), comprehensive income (loss) includes certain changes in equity during a period, such as adjustments to minimum pension liabilities, adjustments to recognize the over-funded or underfunded status of our defined benefit pension plans, and cumulative unrecognized changes in the fair value of available for sale investments, net of tax, if applicable.

**U. Fair Value Measurements** – We disclose the following information for each class of assets and liabilities that are measured at fair value:

1. the fair value measurement;
2. the level within the fair value hierarchy in which the fair value measurements in their entirety fall, segregating fair value measurements using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3);
3. for fair value measurements using significant unobservable inputs (Level 3), a reconciliation of the beginning and ending balances, separately presenting changes during the period attributable to the following:
  - a. total gains or losses for the period (realized and unrealized), segregating those gains or losses included in earnings, and a description of where those gains or losses included in earnings are reported in the statement of operations;
  - b. the amount of these gains or losses attributable to the change in unrealized gains or losses relating to those assets or liabilities still held at the reporting period date and a description of where those unrealized gains or losses are reported;
  - c. purchases, sales, issuances, and settlements (net); and
  - d. transfers into and/or out of Level 3.
4. the amount of the total gains or losses for the period included in earnings that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date and a description of where those unrealized gains or losses are reported in the statement of operations; and
5. in annual periods only, the valuation technique(s) used to measure fair value and a discussion of changes in valuation techniques, if any, during the period.

**V. New Accounting Pronouncements** – In July 2013, the FASB issued ASU No. 2013-11, which requires entities to present unrecognized tax benefits as a decrease in a net operating loss, similar tax loss, or tax credit carryforward if certain criteria are met. The FASB's intent was to eliminate the diversity in practice of the presentation of unrecognized tax benefits but does not alter the way in which entities assess deferred tax assets for

realizability. ASU No. 2013-11 is effective for annual and interim reporting periods beginning after December 15, 2013. Adoption of this guidance has not had a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09 Revenue Recognition, replacing guidance currently codified in Subtopic 605-10 Revenue Recognition-Overall with various SEC Staff Accounting Bulletins providing interpretive guidance. The guidance establishes a new five step principle-based framework in an effort to significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets. ASU No. 2014-09 is effective for annual and interim reporting periods beginning after December 15, 2016. We are in the process of evaluating this guidance and our method of adoption.

## **Note 2. Cash, Investments, and Restricted Cash**

### **CASH**

Our cash is maintained in various financial institutions, with a large majority of our cash balances at December 31, 2014 invested in either U.S. government paper (treasury or agency) or U.S. government or treasury money market funds which are not insured by the Federal Deposit Insurance Corporation ("FDIC") or the Canada Deposit Insurance Corporation ("CDIC"). A small portion of our cash balances are held in bank accounts insured by the FDIC for up to \$250,000 per institution and by the CDIC for up to CAD\$100,000 per institution.

### **INVESTMENTS**

At December 31, 2014 and 2013, the fair value of our non-current investments was \$4.9 million and \$7.0 million, respectively. Marketable equity securities are carried at fair market value, as they are classified as "available-for-sale." The basis of our non-current investments, representing equity securities, was approximately \$7.3 million and \$9.8 million, respectively, at December 31, 2014 and 2013. During the third quarter of 2014 and fourth quarter of 2013, we recognized \$2.4 million and \$3.0 million losses, respectively, in current earnings on impairments of equity shares, as we determined the impairments to be other-than-temporary. In 2014, we acquired common stock in other mining companies for a total cost of \$0.6 million.

At December 31, 2014, total unrealized loss positions of \$2.0 million, net of unrealized gains of \$21 thousand, for our non-current investments were included in accumulated other comprehensive loss.

Our non-current investments balance as of December 31, 2014 includes our ownership of approximately 29% of the outstanding common shares of Typhoon Exploration Inc. ("Typhoon"), having a cost basis of \$0.7 million and fair value of \$0.5 million, and our ownership of approximately 19% of Brixton Metals Corporation ("Brixton"), having a cost basis of \$0.5 million and a fair value of \$0.3 million. We elected to apply the fair value option accounting method to the Typhoon and Brixton investments upon those investments meeting the criteria for equity method accounting. We evaluate the accounting treatment of our individual investments based on whether we believe our ownership percentage and other factors indicate that we have the ability to exercise significant influence in the financial and/or operational decisions of the investee. As of December 31, 2014, we have determined that no other investments held by us meet the criteria for equity method accounting.

### **RESTRICTED CASH AND INVESTMENTS**

Various laws and permits require that financial assurances be in place for certain environmental and reclamation obligations and other potential liabilities. Restricted investments primarily represent investments in money market funds, certificates of deposit, and guaranteed investment certificates (Canadian deposits). These investments (which included current and non-current balances) are restricted primarily for reclamation funding or surety bonds and were \$0.9 million at December 31, 2014, and \$5.2 million at December 31, 2013. The decrease in restricted cash was attributed to a modification of Casa Berardi's reclamation funding, which substituted a letter of credit for previously held cash collateral.

In June of 2014, we successfully modified the type of financial guarantee for reclamation work required by the Quebec Mining Act from restricted cash deposits to a letter of credit. This allowed the release of formerly restricted cash totaling \$7.5 million.

## **Note 3: Properties, Plants, Equipment and Mineral Interests, and Lease Commitments**

### **PROPERTIES, PLANTS, EQUIPMENT AND MINERAL INTERESTS**

Our major components of properties, plants, equipment, and mineral interests are (in thousands):

	December 31,	
	2014	2013
Mining properties, including asset retirement obligations	\$ 336,962	\$ 312,692
Development costs	250,340	204,598
Plants and equipment	698,100	626,818
Land	15,799	15,799
Mineral interests	929,844	946,144
Construction in progress	224,216	200,921
	<u>2,455,261</u>	<u>2,306,972</u>
Less accumulated depreciation, depletion and amortization	623,697	515,371
Net carrying value	<u>\$ 1,831,564</u>	<u>\$ 1,791,601</u>

During 2014, we incurred total capital expenditures, excluding non-cash items for additions acquired under capital leases and adjustments for asset retirement obligations, capitalized interest, and deferred taxes, of approximately \$122.5 million. The additions included \$49.4 million at the Lucky Friday unit, \$26.2 million at the Greens Creek unit, and \$46.6 million at the Casa Berardi unit.

On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd. ("Aurizon") for CAD\$740.8 million (\$714.5 million). See Note 15 for more information.

Properties, plants, equipment, and mineral interests includes the portion of interest costs incurred on our debt capitalized as a part of the cost of constructing certain qualifying assets. For the years ended December 31, 2014 and 2013, capitalized interest totaled \$11.8 million and \$6.5 million, respectively.

## CAPITAL LEASES

We periodically enter into lease agreements primarily for equipment at our Greens Creek, Lucky Friday and Casa Berardi units which we have determined to be capital leases. As of December 31, 2014 and 2013, we have recorded \$50.7 million and \$41.2 million, respectively, for the gross amount of assets acquired under the capital leases and \$8.6 million and \$10.1 million, respectively, in accumulated depreciation, classified as plants and equipment in *Properties, plants, equipment and mineral interests*. See Note 6 for information on future obligations related to our capital leases.

## OPERATING LEASES

We enter into operating leases during the normal course of business. During the years ended December 31, 2014, 2013 and 2012, we incurred expenses of \$3.5 million, \$3.1 million and \$3.1 million, respectively, for these leases. At December 31, 2014, future obligations under our non-cancelable operating leases were as follows (in thousands):

Year ending December 31,	
2015	\$ 3,456
2016	3,364
2017	2,962
2018	966
2019	968
Thereafter	2,081
Total	\$ 13,797

## Note 4: Environmental and Reclamation Activities

The liabilities accrued for our reclamation and closure costs at December 31, 2014 and 2013, were as follows (in thousands):

	2014	2013
Operating properties:		
Greens Creek	\$ 39,237	\$ 34,530
Lucky Friday	1,069	919
Casa Berardi	6,233	7,795
Non-operating properties:		
Coeur d'Alene Basin	-	55,499
Johnny M	5,830	303
Republic	1,389	3,023
All other sites	3,492	3,122
Total	57,250	105,191
Reclamation and closure costs, current	(1,631)	(58,425)
Reclamation and closure costs, long-term	\$ 55,619	\$ 46,766

The activity in our accrued reclamation and closure cost liability for the years ended December 31, 2014, 2013 and 2012, was as follows (in thousands):

Balance at January 1, 2012	\$ 153,811
Accruals for estimated costs	4,325
Revision of estimated cash flows due to changes in reclamation plans	(3,738)
Payment of reclamation obligations	(41,183)
Balance at December 31, 2012	113,215
Accruals for estimated costs	2,250
Liability addition due to acquisition of the Casa Berardi unit	7,998
Payment of reclamation obligations	(18,272)
Balance at December 31, 2013	105,191
Accruals for estimated costs	9,952
Revision of estimated cash flows due to changes in reclamation plans	675
Payment of reclamation obligations	(58,568)
Balance at December 31, 2014	\$ 57,250

On September 8, 2011, a Consent Decree (the "Consent Decree") settling environmental litigation and related claims involving Hecla Limited pertaining to historic releases of mining wastes in the Coeur d'Alene Basin was approved and entered by the U.S. District Court in Idaho. The Consent Decree resolved all existing claims of the Plaintiffs against Hecla Limited and its affiliates under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("CERCLA") (and certain other statutes) for past response costs, future environmental remediation costs, and natural resource damages related to historic releases of mining wastes in the Coeur d'Alene River Basin. The Consent Decree also resolved all remaining obligations of Hecla Limited under the 1994 Consent Decree relating to the "Box," a rectangular 21-square-mile site located near Kellogg, Idaho within the Bunker Hill Superfund site. The Consent Decree contains comprehensive terms of settlement, including financial terms which required that Hecla Limited pay, in the aggregate, \$264.4 million to the Plaintiffs over approximately three years following the settlement. Payments of approximately \$168 million, \$25 million, and \$15 million (and related interest) were made in October 2011, 2012, and 2013, respectively, pursuant to the terms of the Consent Decree. In addition, a payment of approximately \$14.1 million in proceeds from warrants exercised during the second quarter of 2014 was made in July 2014. Finally, a payment of approximately \$41.3 million, consisting primarily of proceeds from the exercise of the remaining

outstanding warrants, was made in August 2014, which satisfied Hecla Limited's remaining payment obligations under the Consent Decree.

## ASSET RETIREMENT OBLIGATIONS

Below is a reconciliation as of December 31, 2014 and 2013 (in thousands) of the asset retirement obligations ("ARO") relating to our operating properties, which are included in our total accrued reclamation and closure costs of \$57.3 million and \$105.2 million, respectively, discussed above. The estimated reclamation and abandonment costs were discounted using credit adjusted, risk-free interest rates ranging from 6% to 8% from the time we incurred the obligation to the time we expect to pay the retirement obligation.

	2014	2013
Balance January 1	\$ 43,244	\$ 34,325
Changes in obligations due to changes in reclamation plans	675	-
Addition due to acquisition of the Casa Berardi unit	-	7,998
Accretion expense	3,089	1,958
Payment of reclamation obligations	(469)	(1,037)
Balance at December 31	<u>\$ 46,539</u>	<u>\$ 43,244</u>

In the fourth quarter of 2012, we updated our ARO at Greens Creek to reflect a preliminary revised reclamation and closure plan having estimated undiscounted costs of approximately \$73.9 million, an increase from the \$53.4 million in the previous plan. In late 2013, a Record of Decision was completed for proposed expansion of tailings capacity. In addition, in early 2014 we were engaged in negotiations with the U.S. Forest Service and state agencies on their proposed revisions to our previously-submitted reclamation and closure plan. In 2014, we updated our ARO at Greens Creek to reflect a revised reclamation and closure plan having estimated undiscounted costs of approximately \$96.7 million, an increase from the \$73.9 million in the previous plan, which was primarily the result of a new requirement to include perpetual water treatment in the closure plan. This resulted in an increase to the ARO asset and liability of \$2.2 million after discounting the estimated costs to present value. As part of the revised closure plan, we increased our reclamation bonding from \$30 million to approximately \$68.9 million in 2014.

## Note 5: Income Taxes

Major components of our income tax benefit (provision) for the years ended December 31, 2014, 2013 and 2012 are as follows (in thousands):

	2014	2013	2012
Current:			
Domestic	\$ 7,761	\$ 2,963	\$ (7,086)
Foreign	(619)	(175)	(459)
Total current income tax benefit (provision)	7,142	2,788	(7,545)
Deferred:			
Domestic	(1,572)	247	(1,334)
Foreign	(330)	6,760	-
Total deferred income tax benefit (provision)	(1,902)	7,007	(1,334)
Total income tax benefit (provision)	<u>\$ 5,240</u>	<u>\$ 9,795</u>	<u>\$ (8,879)</u>

Domestic and foreign components of income (loss) before income taxes for the years ended December 31, 2014, 2013 and 2012 are as follows (in thousands):

	2014	2013	2012
Domestic	\$ (1,505)	\$ (1,681)	\$ 37,025
Foreign	14,089	(33,244)	(13,192)
Total	<u>\$ 12,584</u>	<u>\$ (34,925)</u>	<u>\$ 23,833</u>

The annual tax benefit (provision) is different from the amount that would be provided by applying the statutory federal income tax rate to our pretax income (loss). The reasons for the difference are (in thousands):

	2014		2013		2012	
Computed "statutory" benefit (provision)	\$ (4,405)	35%	\$ 12,224	35%	\$ (8,342)	35%
Percentage depletion	6,034	(48)	3,946	11	5,575	(24)
Change in valuation allowance other than utilization	(6,314)	50	(3,870)	(11)	(3,837)	16
State taxes, net of federal taxes	1,671	(13)	720	2	(1,110)	5
Transaction costs	-	-	(1,743)	(5)	-	-
Foreign currency translation of monetary assets	16,368	(130)	3,445	10	-	-
Rate differential on foreign earnings	(5,938)	47	(4,255)	(12)	(780)	3
Compensation	(1,308)	10	(326)	(1)	(444)	2
Other	(868)	7	(346)	(1)	59	-
	<u>\$ 5,240</u>	<u>(42)%</u>	<u>\$ 9,795</u>	<u>28%</u>	<u>\$ (8,879)</u>	<u>37%</u>

We evaluated the positive and negative evidence available to determine the amount of valuation allowance required on our deferred tax assets. At December 31, 2014 and 2013, the balances of our valuation allowances were \$32 million and \$27 million, respectively, primarily for foreign net operating loss carryforwards. The amount of the deferred tax asset considered recoverable, however, could be reduced in the near term if estimates of

future taxable income are reduced.

At December 31, 2014 and 2013, the net deferred tax liability was \$42 million and \$51 million, respectively. The individual components of our net deferred tax assets and liabilities are reflected in the table below (in thousands).

	December 31,	
	2014	2013
Deferred tax assets:		
Accrued reclamation costs	\$ 20,573	\$ 39,262
Deferred exploration	32,225	35,267
Foreign net operating losses	25,790	27,923
Domestic net operating losses	73,018	54,181
AMT credit carryforwards	14,698	22,155
Pension and benefit obligation	16,876	10,354
Foreign exchange gain	16,555	2,488
Miscellaneous	29,976	28,589
Total deferred tax assets	<u>229,711</u>	<u>220,219</u>
Valuation allowance	<u>(32,094)</u>	<u>(27,155)</u>
Total deferred tax assets	<u>197,617</u>	<u>193,064</u>
Deferred tax liabilities:		
Miscellaneous	(7,620)	(5,966)
Properties, plants and equipment	<u>(232,397)</u>	<u>(238,497)</u>
Total deferred tax liabilities	<u>(240,017)</u>	<u>(244,463)</u>
Net deferred tax asset (liability)	<u>\$ (42,400)</u>	<u>\$ (51,399)</u>

We plan to permanently reinvest earnings from foreign subsidiaries with the exception of Hecla Quebec Inc., our wholly-owned subsidiary which owns our Casa Berardi mine and other interests in Quebec, Canada. For the years 2014, 2013 and 2012, we had no unremitted foreign earnings. Foreign net operating losses carried forward are shown above as a deferred tax asset, with a partial valuation allowance as discussed below.

We recorded a valuation allowance to reflect the estimated amount of deferred tax assets, which may not be realized principally due to the expiration of foreign net operating losses and foreign tax credit carryforwards. The changes in the valuation allowance for the years ended December 31, 2014, 2013 and 2012, are as follows (in thousands):

	2014	2013	2012
Balance at beginning of year	\$ (27,155)	\$ (23,030)	\$ (22,895)
Increase related to non-utilization of net operating loss carryforwards and non-recognition of deferred tax assets due to uncertainty of recovery	(6,314)	(3,870)	(3,837)
Decrease related to utilization and expiration of deferred tax assets, other	1,375	(255)	3,702
Balance at end of year	<u>\$ (32,094)</u>	<u>\$ (27,155)</u>	<u>\$ (23,030)</u>

As of December 31, 2014, for U.S. income tax purposes, we have federal and state net operating loss carryforwards of \$218 million and \$87 million, respectively. These net operating loss carryforwards have a 20 year expiration period, the earliest of which could expire in 2020. We have foreign and provincial net operating loss carryforwards of approximately \$87 million and \$12 million, respectively, which expire between 2015 and 2034. We have approximately \$15 million in alternative minimum tax credit carryforwards which do not expire and are eligible to reduce future U.S. tax liabilities. Our utilization of U.S. net operating loss carryforwards may be subject to annual limitations if there is a change in control as defined under Internal Revenue Code Section 382.

At December 31, 2014 and 2013 we had \$20 million of federal net operating loss carryovers relating to excess tax benefits from the exercise of employee stock options and the vesting of restricted stock awards. These amounts are not reflected in our deferred tax asset for net operating loss carryovers. We recognize the excess tax benefits from the exercise of employee stock options and the vesting of restricted stock awards in the period in which these tax benefits reduce income taxes payable, after net operating loss carryforwards are fully utilized.

We file income tax returns in the U.S. federal jurisdiction, various state and foreign jurisdictions. We are no longer subject to income tax examinations by U.S. federal and state tax authorities for years prior to 2000, or examinations by foreign tax authorities for years prior to 2008. We currently have no tax years under examination.

We had no unrecognized tax benefits as of December 31, 2014 or 2013. Due to the net operating loss carryover provision, coupled with the lack of any unrecognized tax benefits, we have not provided for any interest or penalties associated with any uncertain tax positions. If interest and penalties were to be assessed, our policy is to charge interest to interest expense, and penalties to other operating expense. It is not anticipated that there will be any significant changes to unrecognized tax benefits within the next 12 months.

## **Note 6: Senior Notes, Credit Facilities and Capital Leases**

### **SENIOR NOTES**

On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 in a private placement conducted pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended, and in 2014, an additional \$6.5 million aggregate principal amount of the Notes were issued to our pension plan as described below (collectively, the "Notes"). The Notes are governed by the Indenture, dated as of April 12, 2013, as amended (the "Indenture"), among Hecla Mining Company ("Hecla") and certain of our subsidiaries and The Bank of New York Mellon Trust Company, N.A., as trustee. The net proceeds from the initial offering of the Notes (\$490 million) were used to partially fund the acquisition of Aurizon and for general corporate purposes, including expenses related to the Aurizon acquisition.

In connection with the sale of the Notes, we entered into a Registration Rights Agreement, dated as of April 12, 2013, pursuant to which Hecla and

the Guarantors agreed to exchange the Notes for a new issue of debt securities registered under the Securities Act, with terms substantially identical to those of the Notes (except with respect to certain transfer restrictions and certain obligations to pay special interest as described in the Notes). The exchange offer was completed in January 2014 with 99.99% of the then outstanding Notes tendered for exchange.

The Notes are recorded net of a 2% initial purchaser discount totaling \$10 million at the time of the April 2013 issuance and having an unamortized balance of \$8.0 million as of December 31, 2014. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date on which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. During 2014 and 2013, interest expense related to the Notes and amortization of the initial purchaser discount and fees related to the issuance of the Notes, net of \$11.8 million and \$6.5 million, respectively, in capitalized interest, totaled \$24.6 million and \$19.1 million, respectively.

The Notes are guaranteed on a senior unsecured basis by certain of our subsidiaries (the "Guarantors"). The Notes and the guarantees are, respectively, Hecla's and the Guarantors' general senior unsecured obligations and are subordinated to all of Hecla's and the Guarantors' existing and future secured debt to the extent of the assets securing that secured debt. In addition, the Notes are effectively subordinated to all of the liabilities of Hecla's subsidiaries that are not guaranteeing the Notes, to the extent of the assets of those subsidiaries.

The Notes will be redeemable in whole or in part, at any time and from time to time on or after May 1, 2016, on the redemption dates and at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to the date of redemption. Prior to May 1, 2016, we may redeem some or all of the Notes at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, to the redemption date, plus a "make whole" premium. We may redeem up to 35% of the Notes before May 1, 2016 with the net cash proceeds from certain equity offerings.

Upon the occurrence of a change of control (as defined in the Indenture), each holder of Notes will have the right to require us to purchase all or a portion of such holder's Notes pursuant to a change of control offer (as defined in the Indenture), at a purchase price equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the date of purchase, subject to the rights of holders of the Notes on the relevant record date to receive interest due on the relevant interest payment date.

On April 14, 2014, we entered into a contribution agreement with the Hecla Mining Company Retirement Plan Trust pursuant to which we agreed to contribute Notes to the trust over the course of 2014 in order to satisfy the funding requirement for one of our defined benefit pension plans for 2014. On the same day we filed a registration statement with the SEC for resale of the Notes that we agreed to contribute to the trust. In 2014, we contributed Notes in the aggregate principal amount of \$6.5 million to the trust in satisfaction of our funding obligation for 2014. The contribution agreement has been amended to provide that no further contributions are required, as the funding obligation has been satisfied.

## CREDIT FACILITIES

In February 2014, we entered into a \$100 million senior secured revolving credit facility, which was amended in November 2014 to extend the maturity date to November 18, 2018. The credit facility is collateralized by the shares of common stock held in our material domestic subsidiaries and by our joint venture interests in the Greens Creek mine, all of our rights and interests in the joint venture agreement, and all of our rights and interests in the assets of the joint venture. This credit facility replaced our previous \$100 million credit facility which had the same terms of collateral as described above. Below is information on the interest rates, standby fee, and financial covenant terms under our current credit facility:

Interest rates:	
Spread over the London Interbank Offer Rate	2.25 – 3.25%
Spread over alternative base rate	1.25 – 2.25%
Standby fee per annum on undrawn amounts	0.50%
Covenant financial ratios:	
Senior leverage ratio (debt secured by liens/EBITDA)	not more than 2.50:1
Leverage ratio (total debt less unencumbered cash/EBITDA)	not more than 4.00:1
Interest coverage ratio (EBITDA/interest expense)	not more than 3.00:1

We were in compliance with all covenants under the credit agreement and no amounts were outstanding as of December 31, 2014. We have not drawn funds on the current revolving credit facility as of the filing date of this report.

## CAPITAL LEASES

We have entered into various lease agreements primarily for equipment at our Greens Creek, Lucky Friday and Casa Berardi units, which we have determined to be capital leases. At December 31, 2014, the total liability associated with the capital leases, including certain purchase option and provincial tax amounts, was \$23.1 million, with \$9.5 million of the liability classified as current and \$13.7 million classified as non-current. At December 31, 2013, the total liability balance associated with capital leases was \$22.8 million, with \$8.5 million of the liability classified as current and \$14.3 million classified as non-current. The total obligation for future minimum lease payments was \$23.8 million at December 31, 2014, with \$1.1 million attributed to interest.

At December 31, 2014, the annual maturities of capital lease commitments, including interest, were (in thousands):

<u>Twelve-month period ending December 31,</u>	
2015	\$ 10,266
2016	7,622
2017	4,115
2018	1,782
Total	23,785
Less: imputed interest	(1,128)
Net capital lease obligation	<u>\$ 22,657</u>

## **Note 7: Commitments, Contingencies, and Obligations**

### **GENERAL**

We follow the FASB Accounting Standards Codification guidance in determining our accruals and disclosures with respect to loss contingencies, and evaluate such accruals and contingencies for each reporting period. Accordingly, estimated losses from loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

### ***Rio Grande Silver Guaranty***

Our wholly-owned subsidiary, Rio Grande Silver Inc. ("Rio"), is party to a joint venture with Emerald Mining & Leasing, LLC ("EML") and certain other parties with respect to a land package in the Creede Mining District of Colorado that is adjacent to other land held by Rio. Rio holds a 70% interest in the joint venture. In connection with the joint venture, we are required to guarantee certain environmental remediation-related obligations of EML to a third party up to a maximum liability to us of \$2.5 million. As of December 31, 2014, we have not been required to make any payments pursuant to the guaranty. We may be required to make payments in the future, limited to the \$2.5 million maximum liability, should EML fail to meet its obligations to the third party. However, to the extent that any payments are made by us under the guaranty, EML, in addition to other parties, have jointly and severally agreed to reimburse and indemnify us for any such payments. We have not recorded a liability relating to the guaranty as of December 31, 2014.

### ***Lucky Friday Water Permit Matters***

Over the last several years, the Lucky Friday unit has experienced several regulatory issues relating to its water discharge permits and water management more generally.

- In late 2008 and early 2009, Hecla Limited experienced a number of alleged permit exceedances for water discharges at the Lucky Friday unit. These alleged violations resulted in Hecla Limited entering into a Consent Agreement and Final Order ("CAFO") and a Compliance Order with the EPA in April 2009, which included an extended compliance timeline. In connection with the CAFO, Hecla Limited paid the maximum administrative penalty to the EPA of \$177,500 to settle any liability for such alleged exceedances.
- In 2009, additional alleged permit exceedances for water discharges at the Lucky Friday unit occurred. In 2010, alleged unpermitted discharges of pollutants occurred at the Lucky Friday unit. These alleged permit exceedances and certain alleged unpermitted discharges were the subject of a December 2010 notice of violation ("2010 NOV") from the EPA informing Hecla Limited that the EPA was prepared to seek civil penalties for these alleged violations. Hecla Limited disputes many of EPA's assertions, but commenced negotiations with the EPA in 2010 in an attempt to resolve the matter. There has not yet been any resolution of the 2010 NOV.
- In 2012, the Lucky Friday unit had two weekly water samples, one of which exceeded the permit concentration limit for lead (but not the associated load limit), and one of which exceeded the permit limits for zinc. Also, in late 2012, heavy rains resulted in alleged impacted storm water being discharged to a nearby river. After these incidents, in February 2013, the EPA issued a notice of violation and request for information to Hecla Limited alleging that the storm water incidents were each a violation of Hecla Limited's storm water permit. In March 2014, the Lucky Friday unit had a weekly water sample which exceeded the maximum daily permitted concentration limit for zinc (but not the associated load limit).

The EPA referred the two alleged 2012 permit exceedances, along with the alleged violations in the 2010 NOV and some additional alleged unpermitted discharges from 2010 that were not included in the 2010 NOV, to the U.S. Department of Justice to possibly file a civil complaint by the United States against Hecla Limited. In addition, it is possible that the United States may include other alleged unpermitted discharges (including the 2012 storm water incidents) or permit violations in any complaint. There is the potential for larger civil penalties in the context of a United States complaint than in an administrative action by the EPA such as the 2009 CAFO.

In December 2013, the EPA issued to Hecla Limited a notice of violation ("2013 NOV") alleging certain storm water reporting violations under Lucky Friday's Clean Water Act Multi-Sector General Stormwater Permit for Industrial Activities. The 2013 NOV also contained a request for information under Section 308 of the Clean Water Act directing Hecla Limited to undertake a comprehensive groundwater investigation of Lucky Friday's tailings pond no. 3 to evaluate whether the pond is causing the discharge of pollutants via seepage to groundwater that is discharging to surface water. We cannot ascertain what impacts, if any, the 2013 NOV and request for information will have on the matters that were already pending with the United States, including the 2010 NOV.

Hecla Limited strives to maintain its water discharges at the Lucky Friday unit in full compliance with its permits and applicable laws; however, we cannot provide assurances that in the future it will be able to fully comply with the permit limits and other regulatory requirements regarding water management.

We believe that it is reasonably possible that Hecla Limited faces some liability for the above water issues; however, we cannot with reasonable certainty estimate the amount or range of any such liability because, among other reasons, we have not completed the investigation called for by the request for information contained in the 2013 NPOV, and thus we do not know what the impact of the investigation will be.

### ***Johnny M Mine Area near San Mateo, McKinley County, New Mexico***

In May 2011, the EPA made a formal request to Hecla Mining Company for information regarding the Johnny M Mine Area near San Mateo, McKinley County, New Mexico, and asserted that Hecla Mining Company may be responsible under CERCLA for environmental remediation and past costs the EPA has incurred at the site. Mining at the Johnny M was conducted for a limited period of time by a predecessor of our subsidiary, Hecla Limited. In August 2012, Hecla Limited and the EPA entered into a Settlement Agreement and Administrative Order on Consent for Removal Action ("Consent Decree"), pursuant to which Hecla Limited agreed to pay (i) \$1.1 million to the EPA for its past response costs at the site and (ii) any future response costs at the site, in exchange for a covenant not to sue by the EPA. Hecla Limited paid the \$1.1 million to the EPA for its past response costs in the fourth quarter of 2012 and in December 2014, submitted to EPA the Engineering Estimate and Cost Analysis ("EE/CA") for the site. The EE/CA evaluates three alternative response actions: 1) no action, 2) off-site disposal, and 3) on-site disposal. The range in estimated costs of these alternatives is \$0 to \$221 million, and in the EE/CA, Hecla Limited recommends that EPA approve on-site disposal, which is currently estimated to cost \$5.6 million,

on the basis that such alternative is the most appropriate response action under CERCLA. There is no guarantee EPA will select this alternative. The EPA must review and approve the EECA, including the response action alternatives, after which the approved response action will be implemented by Hecla Limited. Based on the foregoing, we believe it is probable that Hecla Limited will incur a liability for remediation at the site, and our best estimate of that liability as of the date of this report is \$5.6 million. There can be no assurance that Hecla Limited's liability will not be more than \$5.6 million, or that its ultimate liability will not have a material adverse effect on Hecla Limited's or our results from operations or financial position.

#### ***Carpenter Snow Creek Site, Cascade County, Montana***

In July 2010, the EPA made a formal request to Hecla Mining Company for information regarding the Carpenter Snow Creek Superfund Site located in Cascade County, Montana. The Carpenter Snow Creek Site is located in a historic mining district, and in the early 1980s Hecla Limited leased 6 mining claims and performed limited exploration activities at the site. Hecla Limited terminated the mining lease in 1988.

In June 2011, the EPA informed Hecla Limited that it believes Hecla Limited, among several other viable companies, may be liable for cleanup of the site or for costs incurred by the EPA in cleaning up the site. The EPA stated in the June 2011 letter that it has incurred approximately \$4.5 million in response costs and estimated that total remediation costs may exceed \$100 million. Hecla Limited cannot with reasonable certainty estimate the amount or range of liability, if any, relating to this matter because of, among other reasons, the lack of information concerning the site.

#### ***South Dakota and Colorado Superfund Sites Related to CoCa Mines, Inc.***

In 1991, Hecla Limited acquired all of the outstanding common stock of CoCa Mines, Inc. ("CoCa"). CoCa is alleged to have current or prior ownership interests, and engaged in exploration activities, at each of Gilt Edge Mine in South Dakota and in the area adjacent to the Nelson Tunnel property in Creede, Colorado.

##### Gilt Edge Mine Superfund Site

In August 2008, the EPA made a formal request to CoCa for information regarding the Gilt Edge Mine Site located in Lawrence County, South Dakota, and asserted that CoCa may be liable for environmental cleanup at the site. The Gilt Edge Mine Site was explored and/or mined beginning in the 1870s. Beginning in the mid-1970s, CoCa held property interests at the site (primarily in the form of mining claims), and was party to an agreement with another mining company (the "operator") that conducted a limited program of exploration work at the site. The two companies assigned the right to mine in 1983 to a third mining company, and by 1986 CoCa had divested itself of any property interests at the site.

In July 2010, the United States informed CoCa that it intended to pursue CoCa and other potentially responsible parties ("PRPs") on a strict, joint and several basis under CERCLA for liability for past and future response costs incurred at Gilt Edge. Currently, the United States alleges that CoCa is liable based on its historical relationship to the site, and that CoCa has succeeded to the liabilities of one or more predecessor entities that may have held certain property interests at the site. Most of the other viable PRPs have settled with the United States. The operator of the exploration effort to which CoCa was a party to settled for \$26 million, while the third mining company referred to above settled for \$4.2 million.

The United States alleges that estimated total costs associated with the site may exceed \$225 million, including both past and future response costs. We believe that it is reasonably possible that CoCa faces some liability under CERCLA based on its historical ownership interests at the site; however, we cannot with reasonable certainty estimate the amount or range of any such liability. Furthermore, in the event CoCa incurs a liability at this site, it has limited assets with which to satisfy any claim. Because of this, we believe that it is possible that the United States will seek to recover some of the alleged \$225 million in costs associated with the site from Hecla Limited, as the sole stockholder of CoCa. However, we believe Hecla Limited has strong defenses and would vigorously defend against any such claim. For example, Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its involvement with the Gilt Edge site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any claims at the Gilt Edge site.

Settlement negotiations with the United States commenced in 2010 and are ongoing. Because of the unpredictability of settlement negotiations or the outcome of any trial, as well as the nature of CERCLA as a strict, joint and several liability statute, we cannot with reasonable certainty estimate the amount or range of liability faced by CoCa or Hecla Limited. Furthermore, there can be no assurance settlement negotiations will be successful, or that Hecla Limited will not incur a material liability with respect to this site.

##### Nelson Tunnel/Commodore Waste Rock Pile Superfund Site

In August 2009, the EPA made a formal request to CoCa for information regarding the Nelson Tunnel/Commodore Waste Rock Pile Superfund Site in Creede, Colorado. CoCa was involved in exploration and mining activities in Creede during the 1970s and the 1980s. In October 2013, the EPA made a formal claim against CoCa for past response costs under CERCLA as an owner/operator of the site, and against Hecla Limited as a corporate successor to CoCa. The EPA is seeking a total of approximately \$5 million for past response costs, plus an undetermined amount of interest from CoCa, Hecla Limited, and other PRPs. The EPA stated that it is continuing its remedial investigation/feasibility study at the site, and once that is complete, it will begin remedial design and remedial action for the site. Presumably, the EPA will also seek reimbursement of at least some of those costs from viable PRPs. In April 2014, CoCa received notice from another PRP alleging that CoCa is required to indemnify it in connection with any liability it may have with respect to the Nelson/Commodore site. We believe that it is reasonably possible that CoCa faces some liability under CERCLA based on its historical ownership interests at the site. However, in the event CoCa incurs a liability for this site, it has limited assets with which to satisfy any claim. Because of this, we believe that it is possible that the United States will seek to recover some of the costs associated with the site from Hecla Limited, as the sole stockholder of CoCa. However, we believe Hecla Limited would have strong defenses to such a claim and would vigorously defend against any such claim. For example, Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its historical activities in the vicinity of the site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any claims at this site.

In sum, despite the potential for liability of CoCa or Hecla Limited at the site, we cannot with reasonable certainty estimate the amount or range of that liability because, among other things, there is little information known on EPA's remediation plans for the site, as well as the unpredictability of settlement negotiations or the outcome of any trial. Thus, there can be no assurance that Hecla Limited will not incur a material liability with respect to this site.

#### **SENIOR NOTES**

On April 12, 2013, we completed an offering of \$500 million aggregate principal amount of 6.875% Senior Notes ("Notes") due 2021. The net proceeds from the offering of the Notes were used to partially fund the acquisition of Aurizon Mines Ltd. ("Aurizon") and for general corporate

purposes, including expenses related to the Aurizon acquisition. In 2014, we completed additional issuances of our Notes in the aggregate principal amount of \$6.5 million, which were contributed to our pension plan to satisfy the funding requirement for 2014. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. See Note 6 for more information.

## OTHER COMMITMENTS

Our contractual obligations as of December 31, 2014 included approximately \$3.2 million for various non-capital costs. In addition, our open purchase orders at December 31, 2014 included approximately \$1.4 million, \$2.4 million, and \$0.7 million, respectively, for various capital items at the Greens Creek, Lucky Friday, and Casa Berardi units, and approximately \$0.8 million, \$1.1 million, and \$0.4 million, respectively, for various non-capital costs at such units. We also have total commitments of approximately \$23.8 million relating to scheduled payments on capital leases, including interest, primarily for equipment at our Greens Creek and Lucky Friday units (see Note 6 for more information).

As part of our ongoing business and operations, we are required to provide surety bonds and bank letters of credit for various purposes, including financial support for environmental reclamation obligations and workers compensation programs. As of December 31, 2014, we had surety bonds totaling \$68.9 million in place as financial support for future reclamation and closure of the Greens Creek mine. In addition, we had letters of credit for approximately \$8.4 million outstanding as of December 31, 2014 for environmental reclamation and workers' compensation insurance bonding. The obligations associated with these instruments are generally related to performance requirements that we address through ongoing operations. As the requirements are met, the beneficiary of the associated instruments cancels or returns the instrument to the issuing entity. Certain of these instruments are associated with operating sites with long-lived assets and will remain outstanding until closure of the sites. We believe we are in compliance with all applicable bonding and will be able to satisfy future bonding requirements as they arise.

## OTHER CONTINGENCIES

In March 2012, Hecla Limited received notice of a complaint filed against it by the United Steel Workers, Local 5114, with the Federal Mine Safety and Health Review Commission for compensation for bargaining unit workers at the Lucky Friday mine idled as a result of the temporary suspension of production at the mine. The complaint alleged the bargaining unit workers were entitled to compensation under Section 111 of the Federal Mine Safety and Health Act of 1977 (the "Mine Act") from November 16, 2011 – the date an order was issued by the Mine Safety Health Administration ("MSHA") to Hecla Limited – until June 12, 2013 – the date the order was terminated. On February 4, 2015, the judge hearing the case issued an Order finding the applicable period of time compensation under Section 111 of the Mine Act to be approximately 8 days and the compensation owed to the employees to be approximately \$13,000, plus interest. The Union has the right to appeal the Order within 30 days.

On April 12, 2013, the family of Larry Marek, an employee of Hecla Limited who was fatally injured in an April 2011 accident, filed a lawsuit against us and certain of our officers and employees seeking damages for, among other claims, wrongful death and infliction of emotional distress. No dollar amount of damages is specified in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and are vigorously defending this lawsuit.

On December 11, 2013, four employees of Hecla Limited who were injured in a December 2011 rock burst filed a lawsuit against us and certain of our employees seeking damages for, among other claims, intentional and willful injury and infliction of emotional distress. The plaintiffs seek damages in excess of \$1,000,000, as claimed in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and intend to vigorously defend this lawsuit.

We also have certain other contingencies resulting from litigation, claims, EPA investigations, and other commitments and are subject to a variety of environmental and safety laws and regulations incident to the ordinary course of business. We currently expect that the resolution of such contingencies will not materially affect our financial position, results of operations or cash flows. However, in the future, there may be changes to these contingencies, and additional contingencies may occur as well, any of which might result in an accrual or a change in the estimated accruals recorded by us, and there can be no assurance that their ultimate disposition will not have a material adverse effect on our financial position, results of operations or cash flows.

## Note 8: Employee Benefit Plans

### PENSIONS AND OTHER POST-RETIREMENT PLANS

We sponsor defined benefit pension plans covering substantially all U.S. employees. The following tables provide a reconciliation of the changes in the plans' benefit obligations and fair value of assets over the two-year period ended December 31, 2014, and the funded status as of December 31, 2014 and December 31, 2013 (in thousands):

	Pension Benefits	
	2014	2013
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 101,155	\$ 99,367
Service cost	4,312	4,025
Interest cost	4,859	3,889
Amendments	–	(4,208)
Actuarial loss	12,575	2,428
Benefits paid	(4,617)	(4,346)
Benefit obligation at end of year	118,284	101,155
Change in fair value of plan assets:		
Fair value of plan assets at beginning of year	69,051	68,515
Actual return on plan assets	3,402	3,479
Employer contributions	6,715	1,403
Benefits paid	(4,617)	(4,346)
Fair value of plan assets at end of year	74,551	69,051
Funded status at end of year	\$ (43,733)	\$ (32,104)

The following table provides the amounts recognized in the consolidated balance sheets as of December 31, 2014 and December 31, 2013 (in thousands):

	Pension Benefits	
	2014	2013
Current liabilities:		
Accrued benefit liability	\$ (385)	\$ (342)
Other non-current liabilities:		
Accrued benefit liability	(43,348)	(31,763)
Accumulated other comprehensive loss	41,041	29,768
Net amount recognized	<u>\$ (2,692)</u>	<u>\$ (2,337)</u>

The benefit obligation and prepaid benefit costs were calculated by applying the following weighted average assumptions:

	Pension Benefits	
	2014	2013
Discount rate: net periodic pension cost	4.81%	4.00%
Discount rate: projected benefit obligation	4.17%	4.81%
Expected rate of return on plan assets	7.20%	7.20%
Rate of compensation increase: net periodic pension cost	4.00%	4.00%
Rate of compensation increase: projected benefit obligation	2.00%	4.00%

The above assumptions were calculated based on information as of December 31, 2014 and December 31, 2013, the measurement dates for the plans. The discount rate is based on the yield curve for investment-grade corporate bonds as published by the U.S. Treasury Department. The expected rate of return on plan assets is based upon consideration of the plan's current asset mix, historical long-term return rates and the plan's historical performance. Our current expected rate on plan assets of 7.2% is based on historical returns over the past five years.

Net periodic pension cost for the plans consisted of the following in 2014, 2013, and 2012 (in thousands):

	Pension Benefits		
	2014	2013	2012
Service cost	\$ 4,312	\$ 4,025	\$ 3,974
Interest cost	4,859	3,889	4,068
Expected return on plan assets	(4,996)	(4,741)	(4,581)
Amortization of prior service cost (benefit)	(337)	66	401
Amortization of net gain from earlier periods	3,275	3,152	2,826
Net periodic pension cost	<u>\$ 7,113</u>	<u>\$ 6,391</u>	<u>\$ 6,688</u>

The allocations of investments at December 31, 2014 and December 31, 2013, the measurement dates of the plan, by asset category in the Hecla Mining Company Retirement Plan and the Lucky Friday Pension Plan are as follows:

	Hecla		Lucky Friday	
	2014	2013	2014	2013
Cash	3%	1%	1%	1%
Large cap U.S. equities	11%	9%	11%	9%
Small cap U.S. equities	6%	6%	6%	6%
Non-U.S. equities	8%	9%	10%	9%
Fixed income	34%	32%	34%	32%
Real estate	15%	20%	16%	20%
Absolute return hedge funds	14%	15%	15%	15%
Real return	9%	8%	7%	8%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

The "Real return" asset category in the table above includes our common stock in the amounts of \$1.4 million and \$1.6 million at December 31, 2014 and December 31, 2013. These investments represent approximately 2% of the total combined assets of the plans at December 31, 2014 and December 31, 2013, respectively.

Each plan's statement of investment policy delineates the responsibilities of the board, the retirement/pension committee, the investment manager(s), and investment adviser/consultant, and provides guidelines on investment management. Investment objectives are established for each of the asset categories included in the pension plans with comparisons of performance against appropriate benchmarks. Each plan's policy calls for investments to be supervised by qualified investment managers. The investment managers are monitored on an ongoing basis by our outside consultant, with formal reporting to us and the consultant performed each quarter. The policy sets forth the following allocation of assets:

	Target	Minimum	Maximum
Large cap U.S. equities	10%	7%	13%
Small cap U.S. equities	5%	4%	6%
Non-U.S. equities	10%	8%	12%
Fixed income	35%	29%	43%
Real estate	15%	12%	18%
Absolute return hedge funds	15%	12%	18%
Real return	10%	8%	12%

Each plan's statement of investment policy and objectives aspires to achieve the assumed long term rate of return on plan assets established by the plan's actuary plus one percent.

Accounting guidance has established a hierarchy of assets measured at fair value on a recurring basis. The three levels included in the hierarchy are:

Level 1: quoted prices in active markets for identical assets or liabilities

Level 2: significant other observable inputs

Level 3: significant unobservable inputs

The fair values by asset category in each plan, along with their hierarchy levels, are as follows as of December 31, 2014 (in thousands):

	Hecla				Lucky Friday			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Interest-bearing cash	\$ 1,798	\$ -	\$ -	\$ 1,798	\$ 136	\$ -	\$ -	\$ 136
Common stock	1,105	-	-	1,105	281	-	-	281
Real estate	-	-	8,889	8,889	-	-	2,458	2,458
Common collective funds	-	12,280	8,454	20,734	-	3,040	2,306	5,346
Mutual funds	26,392	-	-	26,392	7,412	-	-	7,412
Total fair value	<u>\$ 29,295</u>	<u>\$ 12,280</u>	<u>\$ 17,343</u>	<u>\$ 58,918</u>	<u>\$ 7,829</u>	<u>\$ 3,040</u>	<u>\$ 4,764</u>	<u>\$ 15,633</u>

The following is a roll-forward of assets in Level 3 of the fair value hierarchy (in thousands):

	Hecla	Lucky Friday
Beginning balance at January 1, 2014	\$ 18,767	\$ 5,039
Net unrealized gains on assets held at the reporting date		1,457
Purchases		424
Sales	\$ (3,305)	\$ (771)
Ending balance at December 31, 2014	<u>\$ 17,343</u>	<u>\$ 4,764</u>

Of the \$22.1 million in plan assets classified as level 3, \$11.3 million was invested in real estate, and the remaining \$10.8 million was invested in collective investment funds.

The fair values by asset category in each plan, along with their hierarchy levels, were as follows as of December 31, 2013 (in thousands):

	Hecla				Lucky Friday			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Interest-bearing cash	\$ 596	\$ -	\$ -	\$ 596	\$ 393	\$ -	\$ -	\$ 393
Common stock	1,220	-	-	1,220	311	-	-	311
Real estate	-	-	10,797	10,797	-	-	2,865	2,865
Common collective funds	-	9,654	7,970	17,624	-	2,982	2,174	5,156
Mutual funds	23,252	-	-	23,252	6,837	-	-	6,837
Total fair value	<u>\$ 25,068</u>	<u>\$ 9,654</u>	<u>\$ 18,767</u>	<u>\$ 53,489</u>	<u>\$ 7,541</u>	<u>\$ 2,982</u>	<u>\$ 5,039</u>	<u>\$ 15,562</u>

The following is a roll-forward of assets in Level 3 of the fair value hierarchy (in thousands):

	Hecla	Lucky Friday
Beginning balance at December 31, 2012	\$ 16,862	\$ 4,491
Net unrealized gains on assets held at the reporting date		1,486
Purchases		419
Ending balance at December 31, 2013	<u>\$ 18,767</u>	<u>\$ 5,039</u>

Of the \$23.8 million in plan assets classified as Level 3, \$13.7 million was invested in real estate, while \$10.1 million was invested in collective investment funds.

Generally, investments are valued based on information provided by fund managers to our trustee as reviewed by management and its investment advisers. Mutual funds and equities are valued based on available exchange data. Commingled equity funds consist of publicly-traded investments. Fair value for real estate and private equity partnerships is primarily based on valuation methodologies that include third-party appraisals, comparable

transactions, and discounted cash flow valuation models.

Future benefit payments, which reflect expected future service as appropriate, are estimates of what will be paid in the following years (in thousands):

Year Ending December 31,	<b>Pension Plans</b>
2015	\$ 5,249
2016	5,462
2017	5,724
2018	6,186
2019	6,569
Years 2020-2024	39,915

In January 2015, we contributed approximately \$4.9 million in shares of our common stock to our defined benefit plans, with no additional contributions anticipated in 2015. We expect to contribute approximately \$0.4 million to our unfunded supplemental executive retirement plan during 2015.

The following table describes plans for which accumulated benefit obligations ("ABO") were in excess of plan assets, and for which plan assets exceeded ABO (in thousands).

	December 31, 2014		December 31, 2013	
	ABO Exceeds Plan Assets	Plan Assets Exceed ABO	ABO Exceeds Plan Assets	Plan Assets Exceed ABO
	Projected benefit obligation	\$ 118,284	\$ -	\$ 101,155
Accumulated benefit obligation	112,727	-	97,937	-
Fair value of plan assets	74,551	-	69,051	-

For the pension plans and other benefit plans, the following amounts are included in "Accumulated other comprehensive loss, net" on our balance sheet as of December 31, 2014, that have not yet been recognized as components of net periodic benefit cost (in thousands):

	<b>Pension Benefits</b>
Unamortized net (gain)/loss	\$ 42,959
Unamortized prior service benefit	(1,917)

The amounts in "Accumulated other comprehensive loss, net" expected to be recognized as components of net periodic benefit cost during 2015 are (in thousands):

	<b>Pension Benefits</b>
Amortization of net loss	\$ 3,459
Amortization of prior service benefit	(352)

We do not expect to have any of the plans' assets returned during 2015.

Effective July 1, 2013, we amended the Hecla Mining Company Retirement Plan (the "Hecla plan") to change the pension benefit formula and other plan provisions. The amendment resulted in the following changes to the Hecla plan:

- The definition of pensionable compensation was changed to exclude one-half of any performance-based or annual incentive bonus, fringe benefits, reimbursements or other expense allowances, moving expenses, health and welfare benefits, stock awards, income realized from stock options or restricted stock, income from certain property arrangements, long term incentive awards, premium pay rates for overtime, contributions to or distributions from a non-qualified deferred compensation plan, and shift or location differentials. Under the terms of the amended Hecla plan, pensionable compensation includes an employee's base salary and other payments of compensation for services performed during the course of employment, elective deferrals not includable in the gross income of the employee under the Internal Revenue Service Code Sections 125, 132(f)(4), 402(e)(3), 402(h), 403(b) and 457, one-half of any performance-based or annual incentive bonus, one-half of any cash safety incentive award, paid time off other than for disability leave, and compensation for overtime at the employee's regular hourly rate of pay for each hour worked.
- For new employees hired after June 30, 2013, pension benefits will be calculated based on the highest average of any five consecutive years (60 months) of pensionable compensation during the final ten years of service instead of three consecutive years during the final ten years of service for employees hired before July 1, 2013.
- Prior to July 1, 2013, we credited each participant's account annually with an amount equal to 6.0% of pensionable compensation, plus an additional 5.7% of the participant's pensionable compensation in excess of the Social Security taxable wage base ("the cash balance pay credit"). Beginning July 1, 2013, the cash balance pay credit will consist of the 6.0% of pensionable compensation without the 5.7% additional credit.
- Access to cash balance accounts following a termination of employment prior to early or normal retirement age has been limited. Prior to the amendment, a cash balance participant could elect to receive a distribution of the vested portion of his or her account at any age following a termination of employment. This change applies only to amounts credited to a cash balance account after June 30, 2013.
- For new employees hired after June 30, 2013, the cash balance pay credit will be earned based on years of plan participation: 3% for 1 through 5 years; 4.5% for 6 through 10 years; 6% after 10 years.

Canadian employees participate in Canada's public retirement income system, and are not eligible to participate in the defined benefit pension plans that we maintain for U.S. employees. Canada's public retirement income system includes the following components: (i) the Canada (or Quebec)

Pension Plan, which is a contributory, earnings-related social insurance program, and (ii) the Old Age Security program. In addition, the Registered Retirement Savings Plan is a tax-deferred individual savings plan available to Canadian employees.

## CAPITAL ACCUMULATION PLANS

Our employees' Capital Accumulation (401(k)) Plan ("Hecla 401(k) Plan") is available to all U.S. salaried and certain hourly employees and applies immediately upon employment. Employees may contribute from 1% to 50% of their annual compensation to the plan (subject to statutory limits). We make a matching contribution of 100% of an employee's contribution up to 6% of the employee's earnings. Our matching contributions were approximately \$3.2 million in 2014, \$3.0 million in 2013, and \$2.5 million in 2012.

Effective January 1, 2014, the Hecla 401(k) Plan was restated to allow for payment of matching contributions to be made in Hecla common stock on a quarterly basis. Prior to 2014, contributions were made in cash on a payroll-to-payroll basis.

We also maintain an employees' 401(k) plan, which is available to all hourly employees at the Lucky Friday unit after completion of six months of service. Employees may contribute from 2% to 50% of their compensation to the plan (subject to statutory limits). The matching contribution is 55% of an employee's contribution up to, but not exceeding, 5% of the employee's earnings. Our contributions were approximately \$292,000 in 2014, \$293,000 in 2013, and \$407,000 in 2012.

## Note 9: Stockholders' Equity

### COMMON STOCK

We are authorized to issue 500,000,000 shares of common stock, \$0.25 par value per share, of which 369,528,345 shares of common stock were issued as of December 31, 2014. All of our currently outstanding shares of common stock are listed on the New York Stock Exchange under the symbol "HL".

Subject to the rights of the holders of any outstanding shares of preferred stock, each share of common stock is entitled to: (i) one vote on all matters presented to the stockholders, with no cumulative voting rights; (ii) receive such dividends as may be declared by the Board of Directors out of funds legally available therefor; and (iii) in the event of our liquidation or dissolution, share ratably in any distribution of our assets.

### Dividends

In September 2011 and February 2012, our Board of Directors adopted a common stock dividend policy that has two components: (1) a dividend that links the amount of dividends on our common stock to our average quarterly realized silver price in the preceding quarter, and (2) a minimum annual dividend of \$0.01 per share of common stock, in each case, payable quarterly, when declared. For illustrative purposes only, the table below summarizes potential per share dividend amounts at different quarterly average realized price levels according to the first component of the policy:

	Quarterly average realized silver		Quarterly	Annual
	price per ounce		dividend per share	dividend per share
	\$ 30		\$ 0.01	\$ 0.04
	\$ 35		\$ 0.02	\$ 0.08
	\$ 40		\$ 0.03	\$ 0.12
	\$ 45		\$ 0.04	\$ 0.16
	\$ 50		\$ 0.05	\$ 0.20
	\$ 55		\$ 0.06	\$ 0.24
	\$ 60		\$ 0.07	\$ 0.28

The following table summarizes the common stock dividends declared by our Board of Directors:

Declaration date	(A)	(B)	(C)	(A+B+C)	Total dividend amount (in millions)	Month of payment
	Silver-price-linked component per share	Minimum annual component per share	Special dividend per share	Total dividend per share		
November 8, 2011	\$ 0.02	\$ -	\$ -	\$ 0.02	\$ 5.6	December 2011
February 17, 2012	\$ 0.01	\$ 0.0025	\$ -	\$ 0.0125	\$ 3.6	March 2012
May 8, 2012	\$ 0.02	\$ 0.0025	\$ -	\$ 0.0225	\$ 6.4	June 2012
August 7, 2012	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.7	September 2012
November 2, 2012	\$ 0.02	\$ 0.0025	\$ -	\$ 0.0225	\$ 6.4	December 2012
February 25, 2013	\$ -	\$ 0.0025	\$ 0.01	\$ 0.0125	\$ 3.6	March 2013
May 10, 2013	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.7	June 2013
August 8, 2013	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	August 2013
November 5, 2013	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	December 2013
February 21, 2014	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	March 2014
May 5, 2014	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	June 2014
July 31, 2014	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	September 2014
November 5, 2014	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	December 2014
February 17, 2015	\$ -	\$ 0.0025	\$ -	\$ 0.0025	\$ 0.9	March 2015

Because the average realized silver prices for the second and fourth quarters of 2012, along with all periods in 2013 and 2014, were below the minimum threshold of \$30, according to the policy no silver-price-linked component was declared or paid. However, on February 25, 2013, our Board

of Directors declared a special common stock dividend of \$0.01 per share, in addition to the minimum dividend of \$0.0025 per share, for an aggregate dividend of \$3.6 million paid in March 2013. Prior to 2011, no dividends had been declared on our common stock since 1990. The declaration and payment of common stock dividends is at the sole discretion of our Board of Directors.

### ***Common Stock Repurchase Program***

On May 8, 2012, we announced that our Board of Directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions, depending on prevailing market conditions and other factors. The repurchase program may be modified, suspended or discontinued by us at any time. As of December 31, 2014, 934,100 shares have been repurchased under the program, at an average price of \$3.99 per share, leaving 19.1 million shares that may yet be purchased under the program. The closing price of our common stock at February 16, 2015, was \$3.42 per share.

### **STATUS OF WARRANTS**

At December 31, 2013, there were 22,307,623 common stock purchase warrants outstanding, all of which were exercised during 2014 for total proceeds of approximately \$54.4 million. As of December 31, 2014, there were no stock purchase warrants outstanding. Under the financial terms of the 2011 Consent Decree settling the Coeur d'Alene Basin environmental (CERCLA) litigation, the proceeds from the exercise of our outstanding warrants were paid to the United States and the Coeur d'Alene Indian Tribe.

### **PREFERRED STOCK**

Our certificate of incorporation authorizes us to issue 5,000,000 shares of preferred stock, par value \$0.25 per share. The preferred stock is issuable in series with such voting rights, if any, designations, powers, preferences and other rights and such qualifications, limitations and restrictions as may be determined by our Board of Directors. The Board may fix the number of shares constituting each series and increase or decrease the number of shares of any series. As of December 31, 2014, 157,816 shares of Series B preferred stock were outstanding. Our Series B preferred stock is listed on the New York Stock Exchange under the symbol "HL PB."

#### ***Ranking***

The Series B preferred stock ranks senior to our common stock and any shares of Series A junior participating preferred stock (none of which have ever been issued) with respect to payment of dividends, and amounts due upon liquidation, dissolution or winding up.

While any shares of Series B preferred stock are outstanding, we may not authorize the creation or issue of any class or series of stock that ranks senior to the Series B preferred stock as to dividends or amounts due upon liquidation, dissolution or winding up without the consent of the holders of 66 2/3% of the outstanding shares of Series B preferred stock and any other series of preferred stock ranking on a parity with respect to the Series B preferred stock as to dividends and amounts due upon liquidation, dissolution or winding up, voting as a single class without regard to series.

#### ***Dividends***

Series B preferred stockholders are entitled to receive, when, as and if declared by the Board of Directors out of our assets legally available therefor, cumulative cash dividends at the rate per annum of \$3.50 per share of Series B preferred stock. Dividends on the Series B preferred stock are payable quarterly in arrears on October 1, January 1, April 1 and July 1 of each year (and, in the case of any undeclared and unpaid dividends, at such additional times and for such interim periods, if any, as determined by the Board of Directors), at such annual rate. Dividends are cumulative from the date of the original issuance of the Series B preferred stock, whether or not in any dividend period or periods we have assets legally available for the payment of such dividends. Accumulations of dividends on shares of Series B preferred stock do not bear interest.

All quarterly dividends on our Series B preferred stock for 2012, 2013 and 2014 were declared and paid in cash.

#### ***Redemption***

The Series B preferred stock is redeemable at our option, in whole or in part, at \$50 per share, plus all dividends undeclared and unpaid on the Series B preferred stock up to the date fixed for redemption.

#### ***Liquidation Preference***

The Series B preferred stockholders are entitled to receive, in the event that we are liquidated, dissolved or wound up, whether voluntary or involuntary, \$50 per share of Series B preferred stock plus an amount per share equal to all dividends undeclared and unpaid thereon to the date of final distribution to such holders (the "Liquidation Preference"), and no more. Until the Series B preferred stockholders have been paid the Liquidation Preference in full, no payment will be made to any holder of Junior Stock upon our liquidation, dissolution or winding up. The term "junior stock" means our common stock and any other class of our capital stock issued and outstanding that ranks junior as to the payment of dividends or amounts payable upon liquidation, dissolution and winding up to the Series B preferred stock. As of December 31, 2014 and 2013, our Series B preferred stock had a Liquidation Preference of \$7.9 million.

#### ***Voting Rights***

Except in certain circumstances and as otherwise from time to time required by applicable law, the Series B preferred stockholders have no voting rights and their consent is not required for taking any corporate action. When and if the Series B preferred stockholders are entitled to vote, each holder will be entitled to one vote per share.

#### ***Conversion***

Each share of Series B preferred stock is convertible, in whole or in part at the option of the holders thereof, into shares of common stock at a conversion price of \$15.55 per share of common stock (equivalent to a conversion rate of 3.2154 shares of common stock for each share of Series B preferred stock). The right to convert shares of Series B preferred stock called for redemption will terminate at the close of business on the day preceding a redemption date (unless we default in payment of the redemption price).

## STOCK AWARD PLANS

We use stock-based compensation plans to aid us in attracting, retaining and motivating our employees, as well as to provide us with the ability to provide incentives more directly linked to increases in stockholder value. These plans provide for the grant of options to purchase shares of our common stock and the issuance of restricted stock units.

Stock-based compensation expense amounts recognized for the years ended December 31, 2014, 2013 and 2012 were approximately \$5.0 million, \$4.5 million, and \$3.1 million, respectively. Over the next twelve months, we expect to recognize approximately \$2.8 million in additional compensation expense as the remaining options and restricted stock units vest.

### *Stock Incentive Plans*

During the second quarter of 2010, our stockholders voted to approve the adoption of our 2010 Stock Incentive Plan and to reserve up to 20,000,000 shares of common stock for issuance under the plan. The Board of Directors committee that administers the 2010 plan has broad authority to fix the terms and conditions of individual agreements with participants, including the duration of the award and any vesting requirements. As of December 31, 2014, there were 15,414,727 shares available for future grant under the 2010 plan.

### *Directors' Stock Plan*

In 1995, we adopted the Hecla Mining Company Stock Plan for non-employee Directors (the "Directors' Stock Plan"), which may be terminated by our Board of Directors at any time. Each non-employee director is to be credited on May 30 of each year with that number of shares determined by dividing \$24,000 by the average closing price for our common stock on the New York Stock Exchange for the prior calendar year. All credited shares are held in trust for the benefit of each director until delivered to the director. Delivery of the shares from the trust occurs upon the earliest of: (1) death or disability; (2) retirement; (3) a cessation of the director's service for any other reason; or (4) a change in control. The shares of our common stock credited to non-employee directors pursuant to the Directors' Stock Plan may not be sold until at least six months following the date they are delivered. A maximum of one million shares of common stock may be granted pursuant to the Directors' Stock Plan. During 2014, 2013, and 2012, respectively, 39,468, 28,050, and 18,492 shares were credited to the non-employee directors. During 2014, 2013 and 2012, \$109,000, \$111,000, and \$80,000, respectively, was charged to general and administrative expense associated with the Directors' Stock Plan. At December 31, 2014, there were 555,167 shares available for grant in the future under the plan.

In addition to the foregoing, in May of each year, each non-employee director is also granted additional common stock under our 2010 Stock Incentive Plan. For 2014, 2013, and 2012, respectively, 110,910, 94,200, and 59,484 shares were credited to the non-employee directors, and \$366,000, \$276,000, and \$275,000 respectively, was charged to operations associated with the 2010 Stock Incentive Plan.

## STATUS OF STOCK OPTIONS

No stock options have been granted since 2010. The aggregate intrinsic value of options outstanding and exercisable as of December 31, 2014 before applicable income taxes was zero, based on our closing stock price of \$2.79 per common share at December 31, 2014. All options outstanding were fully vested at December 31, 2014.

Transactions concerning stock options pursuant to our stock option plans are summarized as follows:

	Shares Subject to Options	Weighted Average Exercise Price
Outstanding, December 31, 2013	612,745	\$ 4.29
Expired	(353,403)	\$ 3.42
Outstanding, December 31, 2014	259,342	\$ 5.47

All of the outstanding options above were exercisable at December 31, 2014. The weighted average remaining contractual term of options outstanding and exercisable at December 31, 2014 was less than one year. There were no options exercised during 2014, 2013 or 2012.

## RESTRICTED STOCK UNITS

Unvested restricted stock units granted by the board of directors to employees are summarized as follows:

	Shares	Weighted Average Grant Date Fair Value per Share
Unvested, January 1, 2014	2,085,301	\$ 3.56
Granted	1,457,267	\$ 3.30
Canceled	(72,031)	\$ 3.10
Distributed	(1,234,962)	\$ 3.74
Unvested, December 31, 2014	2,235,575	\$ 3.31

The 2,235,575 unvested units at December 31, 2014 will vest as follows:

1,012,100	in June 2015
777,878	in June 2016
26,000	in August 2016
419,597	in June 2017

Unvested units may be forfeited by participants through termination of employment in advance of vesting. We have recognized approximately \$3.3 million in compensation expense since grant date, and will record an additional \$4.1 million in compensation expense over the remaining vesting period related to these units.

In connection with the vesting of restricted stock units, employees have in the past, at their election and when permitted by us, chosen to satisfy

their tax withholding obligations through net share settlement, pursuant to which the Company withholds the number of shares necessary to satisfy such withholding obligations. Pursuant to such net settlements, in 2014 we repurchased 695,961 shares for \$2.3 million, or approximately \$3.27 per share.

#### Note 10: Derivative Instruments

At times, we may use commodity forward sales commitments, commodity swap contracts and commodity put and call option contracts to manage our exposure to fluctuation in the prices of certain metals which we produce. Contract positions are designed to ensure that we will receive a defined minimum price for certain quantities of our production, thereby partially offsetting our exposure to fluctuations in the market. These instruments do, however, expose us to (i) credit risk in the event of non-performance by counterparties for contracts in which the contract price exceeds the spot price of a commodity and (ii) price risk to the extent that the spot price exceeds the contract price for quantities of our production contained under contract positions.

We are currently using financially-settled forward contracts to manage the exposure to changes in prices of silver, gold, zinc and lead contained in our concentrate shipments between the time of shipment and final settlement. In addition, we use financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead (but not silver and gold) contained in our forecasted future concentrate shipments. These contracts do not qualify for hedge accounting and are marked-to-market through earnings each period. At December 31, 2014, we recorded the following balances related to these contracts:

- a current asset of \$5.3 million which is included in other current assets and is net of \$1.9 million in contracts in a fair value current liability position; and
- a non-current asset of \$6.0 million which is included in other non-current assets and is net of \$1.8 million in contracts in a fair value non-current liability position;

We recognized a \$1.5 million net gain during 2014 on the contracts utilized to manage exposure to prices of metals in our concentrate shipments, which is included in sales of products. The net gain recognized on the contracts offsets losses related to price adjustments on our provisional concentrate sales due to changes to silver, gold, lead and zinc prices between the time of sale and final settlement.

We recognized a \$9.1 million net gain during 2014 on the contracts utilized to manage exposure to prices for forecasted future concentrate shipments, which includes \$3.6 million in gains realized on settled contracts. The net gain on these contracts is included as a separate line item under other income (expense), as they relate to forecasted future shipments, as opposed to sales that have already taken place but are subject to final pricing as discussed in the preceding paragraph. The net gain for 2014 is the result of decreasing zinc and lead prices during the fourth quarter. This program is designed to mitigate the impact of potential future declines in lead and zinc prices from the price levels established in the contracts (see average price information below).

The following tables summarize the quantities of metals committed under forward sales contracts at December 31, 2014 and 2013:

	Ounces/pounds under contract (in 000's)				Average price per ounce/pound			
	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)
<b>December 31, 2014</b>

2015 settlements	1,607	6	19,456	8,378	\$ 16.06	\$ 1,195	\$ 1.01	\$ 0.87
Contracts on forecasted sales								
2015 settlements	–	–	46,738	29,652	N/A	N/A	\$ 0.96	\$ 1.07
2016 settlements	–	–	44,699	34,337	N/A	N/A	\$ 0.99	\$ 1.03
2017 settlements	–	–	1,984	–	N/A	N/A	\$ 1.04	N/A
<b>December 31, 2013</b>								
Contracts on provisional sales								
2014 settlements	673	3	11,188	3,472	19.50	1,205	\$ 0.89	\$ 1.00
Contracts on forecasted sales								
2014 settlements	–	–	31,967	34,282	N/A	N/A	\$ 1.00	\$ 1.04
2015 settlements	–	–	39,683	36,982	N/A	N/A	\$ 0.96	\$ 1.07
2016 settlements	–	–	3,803	30,589	N/A	N/A	\$ 0.93	\$ 1.03

Production at the Lucky Friday mine was temporarily suspended in 2012, so we liquidated forward contracts related to forecasted Lucky Friday base metal sales for total net proceeds of \$3.1 million.

Our concentrate sales are based on a provisional sales price containing an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the concentrates at the forward price at the time of the sale. The embedded derivative, which does not qualify for hedge accounting, is adjusted to market through earnings each period prior to final settlement.

#### Note 11: Business Segments and Significant Customers

We discover, acquire, develop, produce, and market concentrates and doré containing silver, gold, lead and zinc. Our products consist of both metal concentrates, which we sell to custom smelters and brokers, and unrefined bullion bars (doré), which may be sold as doré or further refined before sale to precious metals traders. We are currently organized and managed in three segments, which represent our operating units: the Greens Creek unit, the Lucky Friday unit and the Casa Berardi unit. As further discussed in Note 15, we completed the acquisition of Aurizon on June 1, 2013, giving us 100% ownership of the Casa Berardi mine in Quebec, Canada. As a result, we added a new reporting segment in 2013 for the Casa Berardi unit.

General corporate activities not associated with operating units and their various exploration activities, as well as discontinued operations and idle properties, are presented as "other." Interest expense, interest income and income taxes are considered general corporate items, and are not allocated to our segments.

Sales of metal concentrates and metal products are made principally to custom smelters, brokers and metals traders. The percentage of sales contributed by each segment is reflected in the following table:

	Year Ended December 31,		
	2014	2013	2012
Greens Creek	49.0%	68.8%	100.0%
Lucky Friday	17.9%	11.6%	–%
Casa Berardi	33.1%	19.6%	–%
	<u>100%</u>	<u>100%</u>	<u>100%</u>

The tables below present information about reportable segments as of and for the years ended December 31, 2014, 2013 and 2012 (in thousands).

	2014	2013	2012
Net sales to unaffiliated customers:			
Greens Creek	\$ 245,175	\$ 263,263	\$ 320,895
Lucky Friday	89,757	44,204	248
Casa Berardi	165,849	75,122	–
	<u>\$ 500,781</u>	<u>\$ 382,589</u>	<u>\$ 321,143</u>
Income (loss) from operations:			
Greens Creek	\$ 39,758	\$ 62,178	\$ 138,245
Lucky Friday	21,502	(3,563)	(25,179)

Other	400,500	353,241	410,428
	<u>\$ 2,262,064</u>	<u>\$ 2,232,119</u>	<u>\$ 1,378,290</u>

The Lucky Friday segment had nominal sales during 2012 due to the halt of production most of the year. At the end of 2011, MSHA began a special impact inspection at the Lucky Friday mine which resulted in an order to remove built-up cementitious material from the Silver Shaft. In response, we submitted a plan to MSHA and received approval to remove the material, and this work commenced in the first quarter of 2012. The Silver Shaft work was completed in early 2013, and limited production at the Lucky Friday began in February. We experienced a ramp-up in mine output during the year, as additional production areas of the mine came on line, until we reached full production levels in September 2013. The smelter contracts related to treatment of Lucky Friday concentrates were suspended during the care-and-maintenance period based on *force majeure*. Once the Silver Shaft work was completed down to the 4900 foot level, we commenced work on a haulage way bypassing an area at the 5900 level impacted by a rock burst in December 2011, and the bypass was completed in early 2013.

The following is sales information by geographic area based on the location of smelters and brokers (for concentrate shipments) and the location of parent companies (for doré sales to metals traders) for the years ended December 31, 2014, 2013 and 2012 (in thousands):

	2014	2013	2012
United States	\$ 22,200	\$ 22,361	\$ 25,438
Canada	295,027	170,632	34,441
Japan	58,466	50,039	70,371
Korea	70,548	86,035	120,106
China	53,067	50,479	72,133
Total, excluding gains/losses on forward contracts	<u>\$ 499,308</u>	<u>\$ 379,546</u>	<u>\$ 322,489</u>

Sales of products for 2014 also include a net gain of \$1.5 million on financially-settled forward contracts for silver, gold, lead and zinc contained in our concentrate sales. 2013 sales included a net gain of \$3.0 million and 2012 sales included a net loss of \$1.3 million on the contracts for lead and zinc. See Note 10 for more information.

The following are our long-lived assets by geographic area as of December 31, 2014 and 2013 (in thousands):

	2014	2013
United States	\$ 1,081,699	\$ 1,053,374
Canada	749,810	738,172
Mexico	55	55
	<u>\$ 1,831,564</u>	<u>\$ 1,791,601</u>

Sales from continuing operations to significant metals customers as a percentage of total sales were as follows for the years ended December 31, 2014, 2013 and 2012:

	Year Ended December 31,		
	2014	2013	2012
Teck Metals Ltd.	25.8%	25.0%	10.7%
Korea Zinc	14.1%	22.5%	37.2%
Trafigura AG	7.0%	8.8%	22.4%
MS Zinc	5.9%	7.5%	12.3%
CIBC	17.0%	10.9%	–%
Mitsui	15.8%	8.4%	–%

### Note 12: Fair Value Measurement

The table below sets forth our assets and liabilities (in thousands) that were accounted for at fair value on a recurring basis and the fair value calculation input hierarchy level that we have determined applies to each asset and liability category. See Note 8 for information on the fair values of our defined benefit pension plan assets.

	Balance at December 31, 2014	Balance at December 31, 2013	Input Hierarchy Level
Assets:			
Cash and cash equivalents:			
Money market funds and other bank deposits	\$ 209,665	\$ 212,175	Level 1
Available for sale securities:			
Equity securities – mining industry	4,920	7,019	Level 1
Trade accounts receivable:			
Receivables from provisional concentrate sales	17,696	17,672	Level 2
Derivative contracts:			
Base metal forward contracts	11,347	4,461	Level 2
Restricted cash balances:			
Certificates of deposit and other bank deposits	883	5,217	Level 1
Total assets	<u>\$ 244,511</u>	<u>\$ 246,544</u>	

Cash and cash equivalents consist primarily of money market funds and are valued at cost, which approximates fair value.

Current and non-current restricted cash balances consist primarily of certificates of deposit and U.S. Treasury securities and are valued at cost, which approximates fair value.

Our current and non-current investments consist of marketable equity securities which are valued using quoted market prices for each security multiplied by the number shares held by us.

Trade accounts receivable consist of amounts due to us for shipments of concentrates and doré sold to customers. Revenues and the corresponding accounts receivable for sales of metals products are recorded when title and risk of loss transfer to the customer (generally at the time of shipment). Sales of concentrates are recorded using estimated forward prices for the anticipated month of settlement applied to our estimate of payable metal quantities contained in each shipment. Sales are recorded net of estimated treatment and refining charges, which are also impacted by changes in metals prices and quantities of contained metals. We must estimate the prices at which sales of our concentrates will be settled due to the time elapsed between shipment and final settlement with the customer. Receivables for previously recorded concentrate sales are adjusted to reflect estimated settlement metals prices at the end of each period until final settlement by the customer. We obtain the forward metals prices used each period from a pricing service. Changes in metals prices between shipment and final settlement will result in changes to revenues previously recorded upon shipment. The embedded derivative contained in our concentrate sales is adjusted to fair market value through earnings each period prior to final settlement.

During the second quarter of 2010, we began utilizing financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead contained in our concentrate shipments that have not reached final settlement. We also began utilizing financially-settled forward contracts in the second quarter of 2010 to manage the exposure to changes in prices of zinc and lead contained in our forecasted future concentrate shipments. In the third quarter of 2013 we began to utilize financially-settled forward contracts to manage the exposure to changes in prices of silver and gold, as well as lead and zinc in our concentrate shipments (see Note 10 for more information). These contracts do not qualify for hedge accounting, and are marked-to-market through earnings each period. The fair value of each contract represents the difference between the forward metal price for the contract settlement period as of the measurement date and the contract settlement metal price, multiplied by the quantity of metal involved in the contract.

Our Senior Notes, which were recorded at their carrying value of \$498.5 million, net of unamortized initial purchaser discount at December 31, 2014,

had a fair value of \$450.2 million at December 31, 2014. Third-party quotes, which we consider to be Level 2 inputs, are utilized to estimate fair values of the Senior Notes. See Note 6 for more information.

**Note 13: Income (Loss) per Common Share**

We are authorized to issue 500,000,000 shares of common stock, \$0.25 par value per share. At December 31, 2014, there were 369,528,345 shares of our common stock issued and 2,151,482 shares issued and held in treasury, for a net of 367,376,863 shares outstanding.

We calculate basic earnings per share using, as the denominator, the weighted average number of common shares outstanding during the period. Diluted earnings per share uses, as its denominator, the weighted average number of common shares outstanding during the period plus the effect of potential dilutive common shares during the period using the treasury stock method for options, warrants, and restricted stock units, and if-converted method for convertible preferred shares.

Potential dilutive common shares include outstanding stock options, restricted stock awards, stock units, warrants and convertible preferred stock for periods in which we have reported net income. For periods in which we reported net losses, potential dilutive common shares are excluded, as their conversion and exercise would not reduce earnings per share. Under the if-converted method, preferred shares would not dilute earnings per share in any of the periods presented.

A total of 157,816 shares of preferred stock were outstanding at December 31, 2014.

The following table represents net income per common share – basic and diluted (in thousands, except earnings per share):

	Year Ended December 31,		
	2014	2013	2012
<b>Numerator</b>			
Net income (loss)	\$ 17,824	\$ (25,130)	\$ 14,954
Preferred stock dividends	(552)	(552)	(552)
Net income (loss) applicable to common shares	<u>\$ 17,272</u>	<u>\$ (25,682)</u>	<u>\$ 14,402</u>
<b>Denominator</b>			
Basic weighted average common shares	353,442	318,679	285,375
Dilutive stock options, restricted stock, and warrants	3,993	–	12,191
Diluted weighted average common shares	<u>357,435</u>	<u>318,679</u>	<u>297,566</u>
Basic earnings (loss) per common share	\$ 0.05	\$ (0.08)	\$ 0.05
Diluted earnings (loss) per common share	\$ 0.05	\$ (0.08)	\$ 0.05

For the years ended December 31, 2014 and 2012, we excluded options whose exercise prices exceeded the average prices of our stock during the periods, as their exercise would not have reduced earnings per share. The following options were excluded:

	Year Ended December 31,	
	2014	2013
Stock options	259,342	570,005

For the year ended December 31, 2013, all outstanding options, restricted share units, and warrants were excluded from the computation of diluted earnings (loss) per share, as our reported net losses for that period would cause their conversion and exercise to have no effect on the calculation of earnings (loss) per share.

**Note 14: Other Comprehensive Income (Loss)**

The following table lists the beginning balance, yearly activity and ending balance of each component of “Accumulated other comprehensive loss, net” (in thousands):

	Unrealized	Adjustments	Total
	Gains (Losses) On Securities	For Pension Plans	Accumulated Other Comprehensive Loss, Net
Balance January 1, 2012	\$ 835	\$ (24,333)	\$ (23,498)
2012 change	1,224	(1,644)	(420)
Balance December 31, 2012	2,059	(25,977)	(23,918)
2013 change	(4,611)	2,230	(2,381)
Balance December 31, 2013	(2,552)	(23,747)	(26,299)
2014 change	1,143	(6,875)	(5,732)
Balance December 31, 2014	<u>\$ (1,409)</u>	<u>\$ (30,622)</u>	<u>\$ (32,031)</u>

The \$1.1 million change and negative \$4.6 million change in unrealized gains (losses) on securities in 2014 and 2013, respectively, are net of \$2.4 million and \$3.0 million for the reclassification to current earnings of impairments of equity securities, as we deemed the impairments to be other-than-temporary. The amounts above are net of the income tax effect of such balances and activity as summarized in the following table (in thousands):

	Income Tax Effect of:		
	Unrealized		Total
	Gains	Adjustments	Accumulated
	(Losses)	For	Other
	On Securities	Pension Plans	Comprehensive
			Loss, Net
Balance January 1, 2012	\$ 457	\$ 6,146	\$ 6,603
2012 change	145	1,130	1,275
Balance December 31, 2012	602	7,276	7,878
2013 change	17	(1,512)	(1,495)
Balance December 31, 2013	619	5,764	6,383
2014 change	6	4,653	4,659
Balance December 31, 2014	<u>\$ 625</u>	<u>\$ 10,417</u>	<u>\$ 11,042</u>

See Note 2 for more information on our marketable securities and Note 8 for more information on our employee benefit plans.

### Note 15: Acquisitions

#### ACQUISITION OF AURIZON MINES LTD.

On June 1, 2013, we acquired all of the issued and outstanding common shares of Aurizon for consideration valued at US\$4.32 (CAD\$4.47) per share (the "Acquisition"). Under the terms of the Acquisition, each holder of Aurizon common shares (a "Shareholder") had the option of electing to receive either CAD\$4.75 in cash (the "Cash Alternative") or 0.9953 of a Hecla share (the "Share Alternative") per Aurizon share, subject in each case to proration. Each Shareholder received CAD\$3.11 (US\$3.00) in cash and 0.3442 of a Hecla share for each Aurizon share, with limited exceptions in which certain stockholders received 100% of their consideration in Hecla shares. Aurizon had 164,838,377 issued and outstanding common shares prior to consummation of the Acquisition. An additional 747,132 Aurizon common shares were issued immediately prior to consummation of the Acquisition related to the conversion of in-the-money Aurizon stock options, resulting in a total of 165,585,509 issued and outstanding Aurizon common shares at the time of consummation of the Acquisition. Consideration transferred to consummate the Acquisition was comprised of cash paid by us of CAD\$514.5 million (US\$496.2 million) and issuance of 56,997,790 shares of Hecla common stock valued at CAD\$226.3 (US\$218.3 million) for total consideration of CAD\$740.8 million (US\$714.5 million) based on the US\$ to CAD\$ exchange rate of 0.9645 at the time of consummation. The value of Hecla stock issued as consideration was based upon the closing price at the time of consummation of CAD\$3.97 (US\$3.83) per share.

The cash portion of the Acquisition was primarily funded by the issuance of Senior Notes in April 2013 for net proceeds of \$490 million. See Note 6 for more information.

On August 23, 2013, Aurizon transferred its jurisdiction of incorporation by continuing from British Columbia to the Canadian federal jurisdiction. Aurizon is now governed by the *Canadian Business Corporations Act*. Concurrently with the continuation, Aurizon changed its name to Hecla Quebec Inc.

The following summarizes the allocation of purchase price to the fair value of assets acquired and liabilities assumed as of the date of acquisition (in thousands):

Consideration:	
Cash payments	\$ 496,211
Hecla stock issued (56,997,790 shares at \$3.83 per share)	218,302
Total consideration	<u>\$ 714,513</u>
Fair value of net assets acquired:	
Assets:	
Cash	\$ 177,587
Accounts receivable	14,307
Inventory – bullion and stockpiled ore	8,090
Inventory – supplies	5,704
Other current assets	7,036
Properties, plants, equipment and mineral interests, net	715,391
Non-current restricted cash and investments	4,471
Other non-current assets	795
Total assets	<u>933,381</u>
Liabilities:	
Accounts payable	22,227
Accrued payroll and related benefits	7,613
Accrued taxes	509
Non-current deferred tax liability	177,016
Non-current reclamation	11,113
Other non-current liabilities	390
Total liabilities	<u>218,868</u>
Net assets	<u>\$ 714,513</u>

The \$715.4 million fair value for “Properties, plants, equipment, and mineral interests, net” is comprised of \$11.1 million for the asset retirement obligation asset, \$127.8 million for plant and equipment, and \$576.5 million for development, value beyond proven and probable reserves, and other mineral interests.

The unaudited pro forma financial information below represents the combined results of our operations as if the Acquisition had occurred at the beginning of the periods presented. The unaudited pro forma financial information is presented for informational purposes only and is not indicative of the results of operations that would have occurred if the acquisition had taken place at the beginning of the periods presented, nor is it indicative of future operating results.

(in thousands, except per share amounts)	Twelve Months Ended	
	December 31,	
	2013	2012
Sales of products	\$ 458,755	\$ 544,770
Net income (loss)	(9,539)	28,194
Income (loss) applicable to common stockholders	(10,091)	27,642
Basic and diluted income (loss) per common share	(0.03)	0.08

The pro forma financial information includes adjustments to reflect the depreciation and amortization of assets acquired, an estimate of interest expense related to the Senior Notes that would have been incurred, and the issuance of Hecla stock as consideration in the acquisition.

#### Note 16: Guarantor Subsidiaries

Presented below are Hecla’s condensed consolidating financial statements as required by Rule 3-10 of Regulation S-X of the Securities Exchange Act of 1934, as amended, resulting from the guarantees by certain of Hecla’s subsidiaries (the “Guarantors”) of the Notes (see Note 6 for more information). The Guarantors consist of the following of Hecla’s 100%-owned subsidiaries: Hecla Limited; Silver Hunter Mining Company; Rio Grande Silver, Inc.; RHL Holdings, Inc.; Hecla MC Subsidiary, LLC; Hecla Silver Valley, Inc.; Burke Trading, Inc.; Hecla Alaska LLC; Hecla Greens Creek Mining Company; Hecla Admiralty Company; and Hecla Juneau Mining Company. We completed the initial offering of the Notes on April 12, 2013, and a related exchange offer for virtually identical notes registered with the SEC on January 3, 2014.

The condensed consolidating financial statements below have been prepared from our financial information on the same basis of accounting as the consolidated financial statements. Investments in the subsidiaries are accounted for under the equity method. Accordingly, the entries necessary to consolidate Hecla, the Guarantors, and Non-Guarantors are reflected in the intercompany eliminations column. In the course of preparing consolidated financial statements, we eliminate the effects of various transactions conducted between Hecla’s subsidiaries. While valid at an individual subsidiary level, such activities are eliminated in consolidation because, when taken as a whole, they do not represent business activity with third-party customers, vendors, and other parties. Examples of such eliminations include the following:

- **Investments in subsidiaries.** The acquisition of a company results in an investment on the records of the parent company and a contribution of capital on the records of the subsidiary. Such investments and capital contributions are eliminated in consolidation.
- **Capital contributions.** Certain of Hecla’s subsidiaries do not generate cash flow, and their cash requirements are routinely met with inter-company advances from their parent companies. On an annual basis, the boards of directors of such parent companies declare contributions of capital to their subsidiary companies, which increase the parents’ investment and the subsidiaries’ additional paid-in capital. In consolidation, investments in subsidiaries and related additional paid-in capital are eliminated.
- **Dividends.** Certain of Hecla’s subsidiaries which generate cash flow routinely provide cash to their parent companies through inter-company transfers. On an annual basis, the boards of directors of such subsidiary companies declare dividends to their parent companies, which reduces the subsidiaries’ retained earnings and increases the parents’ dividend income. In consolidation, such activity is eliminated.
- **Debt.** Inter-company debt agreements have been established between certain of Hecla’s subsidiaries and their parents. The related debt liability and receivable balances, accrued interest expense and income activity, and payments of principal and accrued interest amounts by the subsidiary companies to their parents are eliminated in consolidation.
- **Deferred taxes.** Our ability to realize deferred tax assets and liabilities is considered on a consolidated basis for subsidiaries within the United States, with all subsidiaries’ estimated future taxable income contributing to the ability to realize all such assets and liabilities. However, when Hecla’s subsidiaries are viewed independently, we use the separate return method to assess the realizability of each subsidiary’s deferred tax assets and whether a valuation allowance is required against such deferred tax assets. In some instances, a parent company or subsidiary may possess deferred tax assets whose realization depends on the future taxable incomes of other subsidiaries on a consolidated-return basis, but would not be considered realizable if such parent or subsidiary filed on a separate stand-alone basis. In such a situation, a valuation allowance is assessed on that subsidiary’s deferred tax assets, with the resulting adjustment reported in the eliminations column of the guarantor and parent’s financial statements, as is the case in the financial statements set forth below. The separate return method can result in significant eliminations of deferred tax assets and liabilities and related income tax provisions and benefits. Non-current deferred tax asset balances are included in other non-current assets on the condensed consolidating balance sheets and make up a large portion of that item, particularly for the guarantor balances.

Separate financial statements of the Guarantors are not presented because the guarantees by the Guarantors are joint and several and full and unconditional, except for certain customary release provisions, including: (1) the sale or disposal of all or substantially all of the assets of the Guarantor; (2) the sale or other disposition of the capital stock of the Guarantor; (3) the Guarantor is designated as an unrestricted entity in accordance with the applicable provisions of the indenture; (4) Hecla ceases to be a borrower as defined in the indenture; and (5) upon legal or covenant defeasance or satisfaction and discharge of the indenture.

## CONDENSED CONSOLIDATING BALANCE SHEETS

As of December 31, 2014

This report refers to a non-GAAP measure of adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA"), which is a measure of our operating performance. Adjusted EBITDA is calculated as net income (loss) before the following items: interest expense, income taxes, depreciation, depletion, and amortization expense, exploration expense, pre-development expense, Aurizon acquisition costs, Lucky Friday suspension-related costs (income), interest and other income (expense), foreign exchange gains and losses, gains and losses on derivative contracts, provisional price gains and losses, provision for closed operations and environmental matters, stock-based compensation, and unrealized losses on investments. Management believes that, when presented in conjunction with comparable GAAP measures, Adjusted EBITDA is useful to investors in evaluating our operating performance. The table above reconciles net income (loss), the most comparable GAAP measurement, to Adjusted EBITDA.

Note: numbers in thousands.

## TEN-YEAR FINANCIAL REVIEW

(Amounts for the year ended December 31, 2014-2005, dollars in thousands, except per share and per ounce amounts)

<b>OPERATING RESULTS</b>	<b>2014</b>	<b>2013</b>
Sales of products	\$ 500,781	\$ 382,589
Gross profit	85,201	66,146
Asset write-downs and provisions for closed operations	10,098	5,403
Net income (loss)	17,824	(25,130)
Mandatory Convertible Preferred stock dividends	-	-
Series B Preferred stock dividends	(552)	(552)
Total preferred stock dividends	(552)	(552)

Current ratio	3.48:1	2.27:1
Total liabilities to equity	0.6:1	0.7:1
Book value per common share	\$ 3.78	\$ 3.85

(1) Cash cost, after by-product credits, per silver and gold ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of cash cost, after by-product credits, to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) for the years ended 2014, 2013, and 2012 can be found in the reconciliation section in the Company's Form 10-K, on pages 34 through 37. Various accidents and other events resulted in temporary suspensions of production at the Lucky Friday unit during 2011 and throughout 2012. Care-and-maintenance, mine rehabilitation, investigation, and other costs incurred during the suspension periods not related to production have been excluded from cash costs.

(2) Amounts reported for cash cost, after by-product credits, per gold ounce for 2005 through 2008 are related to our discontinued operations in Venezuela. Greens Creek gold production is not included here and treated as a by-product credit for silver cash cost.

**Note: All estimates are in-situ except for the proven reserve at Greens Creek which is in a surface stockpile. Resources are exclusive of reserves.**

- (a) Mineral reserves are based on \$1,225 gold, \$17.25 silver, \$0.95 lead, and \$0.90 zinc, unless otherwise stated.
- (b) Mineral resources are based on \$1,300 gold, \$20 silver, \$0.95 lead, \$0.90 zinc and \$3.00 copper, unless otherwise stated.
- (1) Mineral reserves are based on \$1,225 gold and a US\$/CAN\$ exchange rate of 1:1.1 Reserve diluted to an average of 23.7% to minimum width of 3 meters. Open pit mineral reserves of the East Mine were estimated in August 2013 based on \$1,300 gold and a US\$/CAN\$ exchange rate of 1:1. Reserve diluted to 20%. Open pit mineral reserves of the Principal Mine were estimated in February 2011 based on \$950 gold and a US\$/CAN\$ exchange rate of 1:1. Reserve diluted to 10%.
- (2) Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.
- (3) Measured, indicated and inferred resources are based on \$1,300 gold and a US\$/CAN\$ exchange rate of 1:1.1. Underground resources are reported at a minimum mining width of 2 to 3 meters. Open pit mineral resources of the Principal Mine were estimated based on \$950 gold and a US\$/CAN\$ exchange rate of 1:1.
- (4) Open pit mineral resources of the 160 Zone were based on \$1,250 gold and a US\$/CAN\$ exchange rate of 1:1. Resources diluted to 12%.
- (5) Measured, indicated and inferred resources are based on \$1,300 gold and a US\$/CAN\$ exchange rate of 1:1. The resources are in-situ without dilution and material loss. Resource model completed in 2011.
- (5) Indicated resources reported at a minimum mining width of 2.0 meters for Hugh Zone and 1.5 meters for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width. San Sebastian Hugh Zone also contains 8,400 tons of copper at 1.7% Cu within 492,700 tons of indicated resource.
- (6) Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on \$26.5 Ag, \$0.85 Pb, and \$0.85 Zn.
- (7) Indicated resources reported at a minimum mining width of 4.3 feet.
- (8) Inferred resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.
- (9) Inferred resources reported at a minimum mining width of 2.0 meters for Hugh Zone and 1.5 meters for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width. San Sebastian Hugh Zone also contains 18,860 tons of copper at 1.5% within 1,255,000 tons of inferred resource.
- (10) Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on \$1,400 Au, \$26.5 Ag, \$0.85 Pb, and \$0.85 Zn.
- (11) Inferred resources reported at a minimum mining width of 4.3 feet.
- (12) Inferred resource reported at a minimum mining width of 5.0 feet; resources based on \$1,400 Au, \$26.5 Ag.

\* Totals may not represent the sum of parts due to rounding.

## Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President–Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101 (“NI 43-101”), supervised the preparation of the scientific and technical information concerning Hecla’s mineral projects in this report. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report prepared for Hecla and Aurizon Mines Ltd. (“Aurizon”) titled “Technical Report for the Greens Creek Mine” effective date March 28, 2013, for the Lucky Friday Mine are contained in a technical report prepared for Hecla and Aurizon titled “Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA” effective date April 2, 2014 and for Casa Berardi are contained in a technical report prepared for Aurizon titled “Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada” effective date March 31, 2014 (the “Casa Berardi Technical Report”). Also included in these three technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Copies of these technical reports are available under Hecla’s and Aurizon’s profiles on SEDAR at [www.sedar.com](http://www.sedar.com).

The current Casa Berardi drill program was performed on core sawed in half and included the insertion of blanks and standards of variable grade in every 24 core samples. Standards were generally provided by Analytical Solutions Ltd and prepared in 30 gram bags. Samples were sent to the Swastika Laboratories in Swastika, Ontario, a registered accredited laboratory, where they were dried, crushed, and split for gold analyses. Analysis for gold was completed by fire assay with AA finish. Gold over-limits were analyzed by fire assay with gravimetric finish. Data received from the lab were subject to validation using in-built program triggers to identify outside limit blank or standard assays that require re-analysis. Over 5% of the original pulps and rejects are sent for re-assay to ALS Chemex in Val d’Or for quality control.

Dr. McDonald reviewed and verified information regarding drill sampling, data verification of all digitally-collected data, drill surveys and specific gravity determinations relating to the Casa Berardi mine. The review encompassed quality assurance programs and quality control measures including analytical or testing practice, chain-of-custody procedures, sample storage procedures and included independent sample collection and analysis. This review found the information and procedures meet industry standards and are adequate for Mineral Resource and Mineral Reserve estimation and mine planning purposes.

## Cautionary Statements Regarding Forward Looking Statements

Statements made or information provided in this report that are not historical facts are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and “forward-looking information” within the meaning of Canadian securities laws. Words such as “may”, “will”, “should”, “expects”, “intends”, “projects”, “believes”, “estimates”, “targets”, “anticipates” and similar expressions are used to identify these forward-looking statements. Such forward-looking statements or forward-looking information include statements or information regarding estimates of the Company’s mineral resources and mineral reserves, projected exploration and pre-development expenditures to be incurred in 2015; exploration drilling at Greens Creek, the Lucky Friday and San Sebastian; metallurgical testwork, scoping studies and test pit excavation at San Sebastian; and exploration and pre-development activities at San Juan Silver, at the Company’s properties in Silver Valley and at Republic. The material factors or assumptions used to develop such forward-looking statements or forward-looking information include that the Company’s plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated, to which the Company’s operations are subject, as well as metals prices and exchange rate assumptions noted at the end of Table A relevant to mineral reserve and resourced estimates.

Forward-looking statements involve a number of risks and uncertainties that could cause actual results to differ materially from those projected, anticipated, expected or implied. These risks and uncertainties include, but are not limited to, metals price volatility, volatility of metals production and costs, litigation, regulatory and environmental risks, operating risks, project development risks, political risks, labor issues, ability to raise financing and exploration risks and results; including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration, and with respect to Hecla’s non-operating and exploration properties, that few properties that are explored are ultimately developed into producing mines. Refer to the Company’s Form 10-K and 10-Q reports for a more detailed discussion of factors that may impact expected future results. The Company undertakes no obligation and has no intention of updating forward-looking statements other than as may be required by law.

## Cautionary Statements to Investors on Reserves and Resources

Reporting requirements in the United States for disclosure of mineral properties are governed by the SEC and included in the SEC’s Securities Act Industry Guide 7, entitled “Description of Property by Issuers Engaged or to be Engaged in Significant Mining Operations” (Guide 7). However, the Company is also a “reporting issuer” under Canadian securities laws, which require estimates of mineral resources and reserves to be prepared in accordance with Canadian National Instrument 43-101 (NI 43-101). NI 43-101 requires all disclosure of estimates of potential mineral resources and reserves to be disclosed in accordance with its requirements. Such Canadian information is being included here to satisfy the Company’s “public disclosure” obligations under Regulation FD of the SEC and to provide U.S. holders with ready access to information publicly available in Canada.

Reporting requirements in the United States for disclosure of mineral properties under Guide 7 and the requirements in Canada under NI 43-101 standards are substantially different. This document contains a summary of certain estimates of the Company, not only of proven and probable reserves within the meaning of Guide 7, which requires the preparation of a “final” or “bankable” feasibility study demonstrating the economic feasibility of mining and processing the mineralization using the three-year historical average price for any reserve or cash flow analysis to designate reserves and that the primary environmental analysis or report be filed with the appropriate governmental authority, but also of mineral resource and mineral reserve estimates estimated in accordance with the definitional standards of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in NI 43-101. The terms “measured resources”, “indicated resources,” and “inferred resources” are Canadian mining terms as defined in accordance with NI 43-101. These terms are not defined under Guide 7 and are not normally permitted to be used in reports and registration statements filed with the SEC in the United States, except where required to be disclosed by foreign law. The term “resource” does not equate to the term “reserve”. Under Guide 7, the material described herein as “indicated resources” and “measured resources” would be characterized as “mineralized material” and is permitted to be disclosed in tonnage and grade only, not ounces. The category of “inferred resources” is not recognized by Guide 7. Investors are cautioned not to assume that any part or all of the mineral deposits in such categories will ever be converted into proven or probable reserves. “Resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of such a “resource” will ever be upgraded to a higher category or will ever be economically extracted. Investors are cautioned not to assume that all or any part of a “resource” exists or is economically or legally mineable. Investors are also especially cautioned that the mere fact that such resources may be referred to in ounces of silver and/or gold, rather than in tons of mineralization and grades of silver and/or gold estimated per ton, is not an indication that such material will ever result in mined ore which is processed into commercial silver or gold.

The annual meeting of shareholders will be held at Lavery, de Billy, L.L.P., 1 Place Ville Marie, Suite 4000, Montreal, Quebec, at 10 a.m. EDT on Thursday, May 21, 2015.

Hecla Mining Company (NYSE:HL) is the largest primary silver producer in the U.S. – and one of the lowest-cost – as well as a growing gold producer. Hecla owns two primary silver mines in Alaska (Greens Creek) and Idaho (Lucky Friday) and the Casa Berardi gold mine in Quebec. 2014 silver production reached 11.1 million ounces; gold production was 186,997 ounces. In addition to its diversified silver and gold operating and cash-flow generating base, Hecla has a number of exploration properties and pre-development projects in five world-class silver and gold mining districts in North America. With an active exploration and development program, the company has consistently grown its reserve base for future production, with 2014 reserves totaling 173 million ounces of silver and 2.1 million ounces of gold. Established in 1891, Hecla is headquartered in Coeur d'Alene, Idaho, and has a sister office in Vancouver, B.C. The company's common stock has been traded on the New York Stock Exchange for 50 years.
