

Our Company

Minerals Technologies Inc. is a leading, technology-driven minerals company that develops, produces, and markets a broad range of specialty mineral solutions, related systems and services. The Company serves globally a wide range of consumer and industrial markets, including household and personal care, paper and packaging, food and pharmaceutical, automotive, construction, steel and foundry, environmental, and infrastructure.

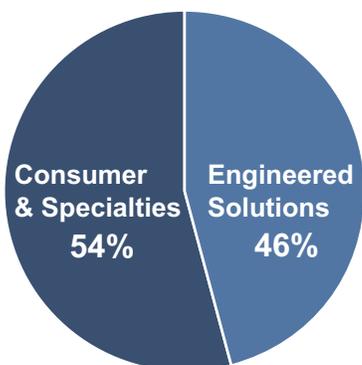

In the first quarter of 2023, the Company realigned its business reporting structure into two segments: Consumer & Specialties and Engineered Solutions, to better align our businesses and technologies with our customers and end markets and create a more efficient and effective management structure, reflecting the way performance is evaluated and resources are allocated.

The Consumer & Specialties segment serves consumer end markets directly with mineral-to-market finished products and also provides specialty mineral-based solutions and technologies that are an essential component of our customers' finished products. This segment includes two product lines: Household & Personal Care and Specialty Additives.

The Engineered Solutions segment serves industrial end markets with engineered systems, mineral blends, and technologies that are designed to improve our customers' manufacturing processes and projects. This segment includes two product lines: High-Temperature Technologies and Environmental & Infrastructure.

The company's portfolio is balanced between those two segments.
